SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

Dr. Douglas Peterson, Warnell School of Forest Resources (Fisheries Division), University of Georgia, Athens, Georgia 30602, has requested a 5-year permit to maintain and conduct research on 95 hatchery-reared shortnose sturgeon at the University of Georgia to meet the following objectives: (1) quantify differences in the environmental tolerances of northern versus southern range shortnose sturgeon and (2) evaluate ontogenetic changes in the environmental tolerances of juvenile shortnose sturgeon. The fish would be obtained from the Warm Springs National Fish Hatchery and Regional Fisheries Center (USFWS), Warm Springs, Georgia 31830, under NMFS Permit 1604. Using a series of replicated laboratory (lethal and non-lethal) experiments, the researcher would evaluate the individual, additive, and interactive effects of the three habitat variables most critical in determining summer habitat quality for both juveniles and adult shortnose sturgeon: maximum water temperature, maximum salinity, and minimum concentration of dissolved oxygen. Researchers would also examine how environmental tolerances of shortnose sturgeon change with age and conditioning (chronic exposure). Future scientific research with these fish would involve studies of nutrition, tagging, physiology, environmental tolerance, contaminants, fish health, behavioral, tagging, genetics, and fish culture techniques. The permit would not authorize any takes from the wild, nor would it authorize any release of captive sturgeon into the wild.

Dated: October 2, 2009.

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.
