

Decision

On June 10, 2010, the TVA Board approved the NTRLMP as described in preferred Alternative C of the FEIS. TVA believes that implementation of Alternative C provides suitable opportunities for developed recreation, conservation of natural resources, and management of sensitive resources. This decision incorporates mitigation measures that would further minimize the potential for adverse impacts to the environment. These measures are listed below.

Environmentally Preferred Alternative

The environmentally preferred alternative is Alternative C, under which approximately half of NTR lands are allocated to natural resource conservation (Zone 4) and sensitive resource management (Zone 3) uses, and all parcels with identified sensitive resources are allocated to Zone 3, which allows the least opportunity for land disturbance and is, therefore, the most protective land use zone.

Mitigation Measures

TVA is adopting the following measures to minimize environmental impacts:

- All activities will be conducted in accordance with the stipulations defined in the programmatic agreement (PA) between TVA, the Tennessee SHPO, and the Advisory Council on Historic Preservation. Until a similar PA is executed with the Virginia SHPO, TVA will incorporate the identification, evaluation, and treatment procedures established under Section 106 of the National Historic Preservation Act to effectively mitigate any adverse effects to historic properties.

- Invasive plants listed as Rank 1 (Severe Threat), Rank 2 (Significant Threat), or Rank 3 (Lesser Threat) on the Tennessee Exotic Plant Pest Council list of Invasive Exotic Pest Plants in Tennessee will not be used in landscaping activities on the reservoir lands.

- Revegetation and erosion-control measures will utilize seed mixes comprised of native species or noninvasive nonnative species.

With the implementation of the above measures, TVA has determined that adverse environmental impacts of future land development proposals on the TVA-managed reservoir lands would be substantially reduced. Before taking actions that could result in adverse environmental effects or before authorizing such actions to occur on properties it controls, TVA would perform a site-specific environmental

review to determine the need for other necessary mitigation measures or precautions. These protective measures represent all of the practicable measures to avoid or minimize environmental harm associated with the alternative adopted by the TVA Board.
