

Seattle, Washington. The NDP provides the guidelines, policy, and training for all NOAA Divers, which includes all NOAA employees who dive, as well as contractors and volunteers, among others, who conduct diving operations.

With more than 300 divers, the National Oceanic and Atmospheric Administration (NOAA) has the largest complement of divers of any civilian federal agency. NOAA Divers conduct operations in our nation's waters and beyond in support of NOAA's scientific research and operations. They are called upon to work in various conditions ranging from the warm, clear waters of a marine sanctuary, to the cold, murky waters of a commercial harbor. The tasks NOAA Divers complete are as varied as the waters they dive in, with most divers supporting projects and research of the National Ocean Service (NOS), the National Marine Fisheries Service (NMFS), and the Office of Marine and Aviation Operations (OMAO).

NOAA Divers are required to maintain a high level of proficiency, both in practice (in the water) and in theoretical understanding (academic learning) in order to continue to dive at NOAA. In addition, NOAA Divers must maintain medical fitness to dive and are required to send their diving equipment out for maintenance as scheduled. If requirements are not met, divers may become unauthorized to dive or suspended. In order to become NOAA Divers, candidates must first submit a diving physical to the NOAA Diving Medical Officers to determine if they are medically fit to dive. After that, divers must complete medical documentation annually to maintain authorization to dive. To maintain fitness to dive, it is imperative that divers recognize the need for a continual and aggressive exercise program that exceeds basic health maintenance standards.

Affected Public: Individuals.

Frequency: As needed.

Respondent's Obligation: Required to Obtain or Retain Benefits.

Legal Authority: 29 CFR Subpart T, Commercial Diving Operations.
