Abstract: (a) General Information: The Federal Oil and Gas Royalty Management Act of 1982 (“FOGRMA”) directs the Secretary of the Interior (“Secretary”) to “establish a comprehensive inspection, collection and fiscal and production accounting and auditing system to provide the capability to accurately determine oil and gas royalties, interest, fines, penalties, fees, deposits, and other payments owed, and to collect and account for such amounts in a timely manner.” See 30 U.S.C. 1711. ONRR performs these and other mineral revenue management responsibilities for the Secretary. See U.S. Department of the Interior Departmental Manual, 112 DM 34.1 (Sept. 9, 2020). ONRR uses the production, royalty, and other information collected in this ICR to ensure that a lessee properly pays royalty and other mineral revenues due on oil, gas, and geothermal resources produced from Federal and Indian lands. ONRR also shares the data with the Bureau of Safety and Environmental Enforcement, Bureau of Ocean Energy Management, Bureau of Land Management, Bureau of Indian Affairs, and Tribal and State governments for their land and lease management responsibilities. The requirement to report accurately and timely is mandatory.

(b) Information Collections: This ICR covers the paperwork requirements under 30 CFR part 1210, subparts B, C, and D, and part 1212, subpart B as follows:

(1) Royalty Reporting: Regulations at 30 CFR part 1210, subparts B and D and part 1212, subpart B, require a lessee to report and remit royalty on oil, gas, and geothermal resources, and to make, retain, and, upon request, provide for inspection accurate and complete records demonstrating proper royalty and other payment. A lessee submits ONRR form 2014, *Report of Sales and Royalty Remittance*, monthly to report royalty on oil, gas, and geothermal leases. Each line contains the royalty owed and the basic elements necessary to calculate the royalty, such as lease number, agreement number, unit number, product code, sales type, sales volume, sales value, processing allowances, transportation allowances, royalty value prior to allowances, and royalty value less allowances. A lessee

also uses the form to report certain rents.

(2) Production Reporting: Regulations at 30 CFR part 1210, subparts C and D and part 1212, subpart B, require an operator to submit production reports if it operates a Federal or Indian oil and gas lease or federally approved unit or communitization agreement, and to make, retain, and, upon request, provide for inspection accurate and complete records for demonstrating royalty payment. An operator uses the following forms for production accounting and reporting:

(i) Form ONRR-4054, Oil and Gas Operations Report: An operator submits this report monthly. Part A tracks the oil and gas volume produced from each Federal or Indian well. Part B tracks disposition of the oil and gas. Part C tracks the oil and gas inventory on the property. ONRR compares the production information with the sales and other royalty data that a lessee submits on form ONRR-2014 to ensure that the lessee paid and reported the proper royalty on the reported oil and gas production. ONRR also uses the information from parts A, B, and C to track all oil and gas from the point of production to the point of first sale or other disposition.

(ii) Form ONRR-4058, Production Allocation Schedule Report: Unless certain conditions are met, an operator must submit this report if it operates an offshore facility measurement point handling production from a Federal oil and gas lease or federally approved unit agreement that is commingled (with approval) with production from any other source prior to measurement for royalty determination. The report is filed monthly to allocate the production to each source. ONRR uses the data to verify accurate production and royalty reporting.
