SUPPLEMENTARY INFORMATION: SSA has developed a DRAFT SSA Scientific Integrity Policy to help ensure science and scientific activities are proposed, conducted, reviewed, managed, communicated, and used in ways that preserve accuracy and objectivity. The policy aligns with Federal Government scientific integrity efforts described in the 2021 Presidential Memorandum on *Restoring Trust in Government Through Scientific Integrity and Evidence-Based*

²⁸ 17 CFR 200.30-3(a)(12).

*Policymaking*¹ (2021 Presidential Memorandum), as well as the National Science and Technology Council reports, *Protecting the Integrity of Government Science*² (January 2022) and *A Framework for Federal Scientific Integrity Policy and Practice*³ (January 2023).

Background

For nearly 90 years, we have administered programs and provided services that make a difference in millions of people's lives. In fiscal year (FY) 2023, our programs provided a combined total of about \$1.4 trillion in benefit payments to an average of over 70 million beneficiaries. The major programs we administer—the Old-Age Survivors and Disability Insurance program and the Supplemental Security Income program—provide an important source of economic security for millions of Americans. Our fundamental mission is to deliver quality Social Security services that ensure equity and accessibility, improve the customer experience, and address systemic barriers to participation in our programs.

The 2021 Presidential Memorandum states the Administration's goal is to make evidence-based decisions guided by the best available science and data, recognizing that scientific and technological information, data, and evidence are central to the development and iterative improvement of sound policies and to the equitable delivery of programs across every area of the Federal Government. The 2021 Presidential Memorandum emphasizes that political interference in the work of Federal scientists and other scientists who support the work of the Federal Government (e.g., government contractors, volunteers) and in the communication of scientific facts undermines the welfare of the Nation, contributes to systemic inequities and injustices, and violates the trust that the public places in our government to best serve its collective interests.

We conduct scientific activities that include evaluations of pilot projects, evaluations of demonstration projects, quantitative studies, qualitative studies, and mixed methods studies that inform important priorities, such as delivering services effectively, improving the way we conduct business, updating policies and regulations, and ensuring effective

stewardship. For example, we conducted evidence-building activities relevant to our Equity Action Plan,⁴ which was created in accordance with Executive Order (E.O.) 13985 on Advancing Racial Equity and Support for Underserved Communities Through the Federal Government,⁵ as well as E.O. 14058 on Transforming Federal Customer Experience and Service Delivery to Rebuild Trust in Government.⁶ This aligns with our *Agency Strategic Plan, Fiscal Years 2022–2026*,⁷ which includes a strategy for deepening our understanding of our customers and what drives their evolving service preferences.

We also conduct extramural research, demonstration projects, and outreach under sections 1110, 1115, and 1144 of the Social Security Act (Act). Sections 1110 and 1115 of the Act provide the waiver authority we need to conduct extramural research and demonstration projects, while section 1144 of the Act addresses outreach activities to inform and assist Medicare beneficiaries with low income who may be eligible for Medicare cost sharing or subsidized prescription drug coverage. A previous authority, under section 234 of the Act, allowed us to waive Disability Insurance program rules to enhance labor force participation; that authority sunset in 2022. We currently fund a range of scientific projects designed to:

- Help us keep pace with advancements in medicine and technology;
- Modernize our vocational rules;
- Test work support models;
- Analyze program trends, gaps, and inconsistencies; and
- Measure the public's understanding of our programs, as well as the impact of program changes.
