The Proposal

The FAA is considering an amendment to 14 CFR part 71 to modify Class E airspace at Ashtabula, OH, for Ashtabula County Airport. Controlled airspace extending upward from 700 feet above the surface of the earth is needed to contain aircraft executing instrument approach procedures. Class E airspace areas extending upward from 700 feet above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9L, dated September 2, 2003, and effective September 16, 2003, which is incorporated by reference in 14 CFR 71.1. The Class E designations listed in this document would be removed subsequently in the Order.

The FAA has determined that this proposed regulation only involves an establishment body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Proposed Revision of VOR Federal Airway V-521

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking, (NPRM).

SUMMARY: This action proposes to revise a segment of Very High Frequency Omnidirectional Range (VOR) Federal Airway (V-521), in the vicinity of Fort Myers, FL, between the Lee County Very High Frequency Omnidirectional Range/Tactical Air Navigation (VORTAC), and the RINSE intersection (a navigation fix on V-521 that is formed by an intersection of radials from the Lee County and Labelle VORTACs). Specifically, this action would change the alignment of that segment of the airway from the Lee County VORTAC 014° (T) radial to the 012° (T) radial. This action would support a new standard terminal arrival route (STAR) serving the Southwest Florida International Airport and the Page Field Airport at Fort Myers, FL.

The Proposal

The FAA is proposing an amendment to title 14 Code of Federal Regulations (14 CFR) part 71 to revise a segment of V-521 in the vicinity of Fort Myers, FL, between the Lee County VORTAC, and the RINSE intersection (a navigation fix on V-521). Specifically, this action would change the alignment of that segment of the airway from the Lee County VORTAC 014° (T) radial to the Lee County VORTAC 012° (T) radial. This change is needed to support a new arrival route called the "RINSE ONE STAR" that is being developed to serve aircraft arriving at the Southwest Florida International Airport, and Page Field Airport in Fort Myers, FL. In conjunction with the development of the new STAR, the RINSE intersection will be relocated to a point within one mile of its current position. The proposed modification of V-521 is needed to ensure that the airway remains aligned with the RINSE intersection. These changes are the result of a comprehensive airspace redesign plan to enhance the management of aircraft operations traffic into and out of southwest Florida.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this proposed action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1D, Policies and Procedures for Considering Environmental Impacts. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.
