

range management and livestock grazing; mineral resources; and special status species, among others. The Kanab Approved RMP/ROD is nearly the same as Alternative B in the Kanab Proposed RMP/Final EIS, published in July 2008, and carries forward the designation decisions for two ACECs, as described in the Proposed RMP/Final EIS.

The Moab Field Office Approved RMP/ROD addresses management of approximately 1.8 million acres of BLM-administered surface lands and 1.9 million acres of federally owned mineral estate in Grand County and a small portion of San Juan County, Utah. The planning effort addressed a variety of management issues, including: Recreation opportunities especially within Special Recreation Management Areas; off-highway vehicle management; cultural resources; special designations including ACECs and suitability recommendations for wild and scenic rivers; lands with wilderness characteristics; visual resources; range management and livestock grazing; oil, gas and mining; and special status species, among others. The Moab Approved RMP/ROD is nearly the same as Alternative C in the Moab Proposed RMP/Final EIS, published in August 2008, and carries forward the designation decisions for five ACECs, as described in the Proposed RMP/Final EIS.

The Price Field Office Approved RMP/ROD addresses management of approximately 2.5 million acres of BLM-administered surface lands and 2.8 million acres of federally owned mineral estate in Emery and Carbon Counties, Utah. The planning effort addressed a variety of management issues, including: Oil and gas leasing; management of recreation opportunities in Special Recreation Management Areas; visual resources; off-highway vehicle management; special designations, including ACECs and suitability recommendations for wild and scenic rivers; range management and livestock grazing; lands with wilderness characteristics; and cultural resources, among others. The Price Approved RMP/ROD is the nearly the same as Alternative D in the Price Proposed RMP/Final EIS, published in August 2008, and carries forward the designation decisions for 13 ACECs, as described in the Proposed RMP/Final EIS.

The Richfield Field Office Approved RMP/ROD addresses management of approximately 2.1 million acres of BLM-administered surface lands and 3.0 million acres of federally owned mineral estate in Garfield, Piute, Sanpete, Sevier and Wayne Counties,

Utah. The planning effort addressed a variety of resource issues, including: Visual resources; recreation and off-highway vehicle management; lands with wilderness characteristics; cultural resources; special designations, including ACECs and suitability recommendations for wild and scenic rivers; range management and livestock grazing; minerals and energy resources; and special status species, among others. The Richfield Approved RMP/ROD is the nearly the same as Alternative B in the Richfield Proposed RMP/Final EIS, published in August 2008, and carries forward the designation decisions of two ACECs, as described in the Proposed RMP/Final EIS.

The Vernal Field Office Approved RMP/ROD addresses management of approximately 1.7 million acres of BLM-administered surface lands and 2.8 million acres of federally owned mineral estate in Daggett, Duchesne, and Uintah Counties, Utah. The planning effort addressed a variety of management issues, including: Oil and gas leasing; rights-of-way; recreation and off-highway vehicle management; cultural resources; special designations, including ACECs and suitability recommendations for wild and scenic rivers; range management and livestock grazing; and special status species, among others. The Vernal Approved RMP/ROD is the nearly the same as Alternative A in the Vernal Proposed RMP/Final EIS, published in August 2008, and carries forward the designation decisions for seven ACECs, as described in the Proposed RMP/Final EIS.

The BLM Director's Office has dismissed or resolved each of the 87 protests received, thus allowing for immediate implementation of the Approved RMPs. These RODs serve as the final decision by the Department of the Interior for the land use plan and implementation-level decisions in the Approved RMP.

SUPPLEMENTARY INFORMATION:**I. Background**

Title 30 CFR 75.1200, 75.1200-1, 75.1201, 75.1202, 75.1202-1, and 75.1203 require underground coal mine operators to have in a fireproof repository in an area on the surface of the mine chosen by the mine operator to minimize the danger of destruction by fire or other hazards, an accurate and up-to-date map of such mine drawn on scale. These standards specify the information which must be shown, the range of acceptable scale, the surveying technique or equivalent accuracy required of the surveying which must be used to prepare the map, that the maps must be certified as accurate by a registered engineer or surveyor, that the maps must be kept continuously up-to-date by temporary notations and must

be revised and supplemented to include the temporary notations at intervals not more than 6 months. In addition, the mine operator must provide the MSHA District Manager a copy of the certified mine map annually during the operating life of the mine. These maps are essential to the planning and safe operation of the mine. In addition, these maps provide a graphic presentation of the locations of working sections and the locations of fixed surface and underground mine facilities and equipment, escapeway routes, coal haulage and man and materials haulage entries and other information essential to mine rescue or mine fire fighting activities in the event of mine fire, explosion or inundations of gas or water. The information is essential to the safe operation of adjacent mines and mines approaching the worked out areas of active or abandoned mines. Section 75.372 requires underground mine operators to submit three copies of an up-to-date mine map to the District Manager at intervals not exceeding 12 months.

Title 30 CFR 75.1204 and 75.1204-1 require that whenever an underground coal mine operator permanently closes or abandons a coal mine, or temporarily closes a coal mine for a period of 90 days, the operator shall file with MSHA a copy of the mine map revised and supplemented to the date of closure. Maps are retained in a repository and are made available to mine operators of adjacent properties. The maps are necessary to provide an accurate record of underground areas that have been mined to help prevent active mine operators from mining into abandoned areas that may contain water or harmful gases.

Title 30 CFR 77.1200, 77.1201 and 77.1202 require surface coal mine operators to maintain an accurate and up-to-date map of the mine and specified the information to be shown on the map, the acceptable range of map scales, that the map be certified by a registered engineer or surveyor, and that the map be available for inspection by the Secretary or his authorized representative. These maps are essential for the safe operation of the mine and provide essential information to operators of adjacent surface and underground mine operators. Properly prepared, effectively utilized surface mine maps can prevent outbursts of water impounded in underground mine workings and/or inundations of underground mines by surface impounded water or water and or gases impounded in surface auger mining worked out areas.
