

standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

2. Does the National Technology Transfer and Advancement Act apply to this proposed rule?

No. This proposed rulemaking does not involve technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

1. What is Executive Order 12898?

Executive Order (EO) 12898 (59 FR 7629 (Feb. 16, 1994)) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

2. Does Executive Order 12898 apply to this rule?

EPA has determined that this proposed rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it does not affect the level of protection provided to human health or the environment. As this rule does not impose any enforceable duty upon State, tribal, or local governments, this rule will neither increase nor decrease environmental protection.

SUPPLEMENTARY INFORMATION: On January 5, 2011 HHS/CDC published a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** (76 FR 678) proposing to amend its regulations (42 CFR 71.53) for the importation of live nonhuman primates (NHPs) by extending existing requirements for the importation of *Macaca fascicularis* (cynomolgus), *Chlorocebus aethiops* (African green) and *Macaca mulatta* (rhesus) monkeys to all NHPs. Filovirus testing would continue to be required only for Old World NHPs. In the NPRM, HHS/CDC also proposed to reduce the frequency at which importers of cynomolgus, African green, and rhesus monkeys are required to renew their registrations, from every 180 days to every two years. HHS/CDC proposed to incorporate existing guidelines into the regulations and add new provisions to address: (1) NHPs imported as part of a trained animal act; (2) NHPs imported or transferred by zoological societies; (3) The transfer of NHPs from approved laboratories; and (4) Non-live imported NHP products. Finally, HHS/CDC proposed that all NHPs be imported only through ports of entry where a CDC quarantine station is located. HHS/CDC provided a 60 day public comment period. Written comments were to be received on or before March 7, 2011. We have received a request asking for a 45 day extension of the comment period. In consideration of that request, HHS/CDC is extending the comment period by 45 days to April 25, 2011.

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Initiation of status review and solicitation of new information.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), under the authority of the Endangered Species Act of 1973, as amended (Act), announce the initiation of a status review for the longfin smelt (*Spirinchus thaleichthys*). To ensure that the status review is comprehensive, we are requesting scientific and commercial data and other information regarding this species. Based on the status review, we will issue a 12-month finding, which will address whether the listing may be warranted, as provided in section 4(b)(3)(B) of the Act.

DATES: To allow us adequate time to conduct this review, we request that we receive information on or before April 11, 2011. After this date, you must submit information directly to the Field Office (*see FOR FURTHER INFORMATION CONTACT* section below). Please note that we may not be able to fully address or incorporate information that we receive after the above requested date.

SUPPLEMENTARY INFORMATION:

Request for Information

To ensure the status review is complete and based on the best available scientific and commercial information, we request information on the longfin smelt. We request any additional information from governmental agencies, Native American Tribes, the scientific community, industry, and any other interested parties. We seek information on:

- (1) The species' biology, range, and population trends, including:
 - (a) Habitat requirements for feeding, breeding, and sheltering;
 - (b) Genetics and taxonomy;
 - (c) Historical and current range, including distribution patterns;
 - (d) Historical and current population levels, and current and projected trends; and
 - (e) Past and ongoing conservation measures for the species or its habitat.
- (2) The factors that are the basis for making a listing determination for a species under section 4(a) of the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531 *et seq.*), which are:

- (a) The present or threatened destruction, modification, or curtailment of its habitat or range;
 - (b) Overutilization for commercial, recreational, scientific, or educational purposes;
 - (c) Disease or predation;
 - (d) The inadequacy of existing regulatory mechanisms; or
 - (e) Other natural or manmade factors affecting its continued existence.
- (3) The potential effects global climate change may have on the longfin smelt or its habitat.

If, after the status review, we determine that listing the longfin smelt is warranted, we will propose critical habitat (*see definition in section 3(5)(A) of the Act*), under section 4 of the Act, to the maximum extent prudent and determinable at the time we propose to list the species. Therefore, within the geographical range currently occupied by the longfin smelt, we also request data and information on:
