Under section 6(f)(1)(A) of FIFRA, registrants may request, at any time, that their pesticide registrations be amended to delete one or more pesticide uses. These companies have requested that EPA waive the 180-day comment period. In light of this request, EPA is granting the request to waive the 180-day comment period and is providing a 30-day public comment period before taking action on the requested amendments to delete uses. EPA expects to grant the requested amendments to delete the uses described in Table 1 at the close of the comment period for this announcement.

III. Existing Stocks

The registrants have requested voluntary cancellation of the dimethoate registrations identified in Tables 2 and 3, and submitted amendments to amend registrations identified in Table 4 to delete uses of dimethoate identified in Table 1. Pursuant to section 6(f) of FIFRA, EPA expects to grant these requests for voluntary cancellation and amendment upon the close of the comment period. EPA anticipates that the cancellation order would allow for 1-year use of existing stocks, defined in

EPA's existing stocks policy (56 FR 29362, June 26, 1991) as those stocks of a registered pesticide product which are currently in the United States and which have been packaged, labeled, and/or released for shipment prior to the effective date of the cancellation or amendment. Any distribution, sale, or use of existing stocks 1-year after the effective date of the amendment or cancellation order that the Agency intends to issue that is not consistent with the terms of that order will be considered a violation of section 12(a)(2)(K) and/or 12(a)(1)(A) of FIFRA.

II. Receipt of Requests to Cancel and Amend Registrations to Delete Uses.

A. Background

EPA is publishing a single notice in response to registrants' requests to cancel products and/or delete product uses for disulfoton and naled from their labels. (See the table below for specific information regarding the cancellation or deletion requests).

Registration Eligibility Decision (RED) documents summarize the findings of EPA's reregistration process for individual chemical cases, and reflect the Agency's decisions on risk assessment and risk management for uses of individual pesticides. Naled and disulfoton belong to a group of pesticides known collectively as organophosphates (OPs). EPA will issue Interim Reregistration Eligibility Decisions assessing the risks of exposure from individual organophosphates in the near future. EPA will also consider the cumulative risks from all organophosphates, as they all share a common mechanism of toxicity affecting the nervous system by inhibiting *cholinesterase*.

Disulfoton is an insecticide first registered in 1961, to control a variety of pests affecting domestic indoor and outdoor potted plants and ornamentals, including herbaceous plants, flowers, woody shrubs and trees. Naled is an insecticide and acaricide first registered in the United States in 1959, primarily used to control mosquitos (70% of its use). As part of the reregistration

process, Value Garden Supply, LLC and Bayer Corporation have elected to voluntarily cancel certain products and/or delete product uses from their product labels rather than develop the data necessary to support reregistration. Sergeant's Pet Products has requested voluntary cancellation of certain end-use product registrations.

EPA will consider any comments received within 30 days of publication of this notice in the **Federal Register** prior to cancelling affected uses.

B. Requests for Voluntary Amendments to Delete Uses From the Registrations of End-Use and Technical Product Labels

Pursuant to section 6(f)(1)(A) of FIFRA, the following companies have submitted a request to amend some of their technical and/or end-use registrations of pesticide products containing disulfoton and naled, deleting the listed product(s) bearing such use. The registrations, for which amendments to delete products and/or uses were requested, are identified in the following table:

NOTICE FOR VOLUNTARY CANCELLATION OF REGISTERED USES

Chemical	PC Code	Company Address	Nature of Action	Products Affected (EPA Reg. #)	Uses Deleted

Under section 6(f)(1)(A) of FIFRA, registrants may request, at any time, that their pesticide registrations be amended to delete one or more pesticide uses or request a voluntary cancellation of a product registration. The aforementioned companies have

requested to amend their registrations and that EPA waive any applicable 180-day comment period that applies to cancellation and/or deletion of minor agricultural uses. In light of this request, EPA is granting the request to waive the 180-day comment period and is

providing a 30-day public comment period before taking action on the requested amendments to delete uses or cancel product registrations. EPA intends to grant the requested amendments to delete uses or cancel

product registrations at the close of the comment period for this announcement.

III. Proposed Existing Stocks Provisions

The registrants have requested voluntary cancellation for the disulfoton and naled registrations identified in the table. EPA intends to grant the requests for voluntary cancellations and use deletions. For purposes of the cancellation order that the Agency intends to issue at the close of the comment period for this announcement, the term "existing stocks" will be defined, as prescribed in the **Federal Register** of June 26, 1991 (56 FR 29362) (FRL-3846-4), as those stocks of a registered pesticide product which are currently used in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation or amendment. For disulfoton products, EPA intends to permit registrants of these products to distribute and sell existing stocks of cancelled products or products bearing deleted uses for 12 months from the effective date of cancellation. In the case of naled, the registrant has requested the effective date of cancellation to be March 1, 2002, as well as a provision for the sale or distribution of existing stocks until December 31, 2002. EPA intends to grant this request. The Agency also intends to permit all persons other than the registrant to sell, distribute, or use disulfoton or naled products until

supplies are exhausted. Any distribution, sale, or use of existing stocks that is not consistent with the terms of that order will be considered a violation of section 12(a)(2)(K) and/or 12(a)(1)(A) of FIFRA.
