

(c) Location of key manufacturing and production assets, and risks posed by these assets' physical location;

(d) Exclusive or dominant supply of critical or essential goods and materials by or through nations that are, or may become, unfriendly or unstable;

(e) Availability of substitutes or alternative sources for critical or essential goods and materials;

(f) Need for research and development capacity to sustain leadership in the development of goods and materials critical or essential to high-capacity battery manufacturing;

(g) Current domestic education and manufacturing workforce skills and any identified gaps, opportunities and potential best practices;

(h) Role of transportation systems in supporting the high-capacity battery supply chain and risks associated with these transportation systems;

(i) Risks posed by climate change to the availability, production, or transportation of goods and materials critical to high-capacity manufacturing;

(vi) Potential impact of the failure to sustain or develop elements of the high-capacity supply chain in the United States on other key downstream capabilities. Also, the potential impact of purchases of high-capacity batteries products by downstream customers, including volume and price, product generation and alternate inputs.

(vii) Policy recommendations or suggested executive, legislative, regulatory changes, or actions to ensure a resilient supply chain for high-capacity batteries (e.g., reshoring, nearshoring, or developing domestic suppliers, cooperation with allies to identify or develop alternative supply chains, building redundancy into supply chains, ways to address risks due to vulnerabilities in digital products or climate change).

(viii) Any additional comments relevant to the assessment of the high-capacity batteries manufacturing and advanced packing supply chains required by E.O. 14017.

DOE encourages commenters, when addressing the elements above, to structure their comments using the same text as identifiers for the areas of inquiry to which their comments respond to assist DOE in more easily reviewing and summarizing the comments received in response to these specific comment areas. For example, a commenter submitting comments responsive to (i) critical and essential goods and materials underlying the high-capacity battery supply chain, would use that same text as a heading in the public comment followed by the commenter's specific comments in this area.
