II. Discussion

The information in this draft report, NUREG-2212, "Standard Review Plan for Applications for 10 CFR part 70 Licenses for Possession and Use of Special Nuclear Materials of Critical Mass but not Subject to the Requirements in 10 CFR part 70, subpart H," is intended to provide staff guidance to assist applicants and licensees in preparing applications for licenses for critical mass quantities of SNM exceeding specific threshold quantities. In particular, it describes the types of information required under section 70.22 of title 10 of the *Code of Federal Regulations* (10 CFR), "Contents of applications," for an application for a new, renewal of, and/or amendment to an SNM license, for facilities licensed under 10 CFR part 70, "Domestic Licensing of Special Nuclear Material," but that are not subject to the 10 CFR part 70, subpart H, "Additional Requirements for Certain Licensees Authorized To Possess a Critical Mass of Special Nuclear Material" (commonly known as greater than critical mass (GTCM) applicants, licensees, and/or facilities). The NUREG provides NRC staff reviewers with guidance that describes methods or approaches that the staff has found acceptable for meeting applicable NRC requirements in 10 CFR part 70. Implementation of the criteria and guidelines in NUREG-2212

by staff members in their review of applications provides assurance that a given design ensures adequate protection of the public health and safety and the environment. This draft NUREG follows the format and style of NUREG-1556, Volume 17, Revision 1 "Consolidated Guidance about Materials Licenses: Program-Specific Guidance About Special Nuclear Material of Less than Critical Mass Licenses," (ADAMS Accession No. ML18190A207), however, additional detailed information on the safety programs applicable to part 70 GTCM facilities is included. Draft NUREG-2212 also follows the format and style of NUREG-1520, Revision 2 "Standard Review Plan for Fuel Cycle Facilities License Applications," (ADAMS Accession No. ML15176A258), which focuses on those activities unique to facilities that are subject to part 70, subpart H requirements.

Dated: December 2, 2022.

For the Nuclear Regulatory Commission.

Shana R. Helton,

Director, Division of Fuel Management, Office of Nuclear Material Safety and Safeguards.
