

participants must be located in a HRSA-designated rural area.

HRSA currently collects information about RHND awards using an OMB-approved set of performance measures and seeks to revise that approved collection. The proposed revisions are being implemented to better gather award recipient data in response to previously accumulated award recipient feedback, peer-reviewed research, and information gathered from the previously approved RHND measures.

A 60-day notice was published in the **Federal Register** on July 20, 2023, 88 FR 46800–46801. There was one public comment. No changes were made to the information collection since the comment was outside the scope of this ICR.

Need and Proposed Use of the Information: This program needs measures that will enable HRSA to provide aggregate program data required by Congress under the Government Performance and Results Act of 1993. These measures cover the principal topic areas of interest to HRSA, including: (1) access to care, (2) population demographics, (3) staffing, (4) consortium/network, (5) sustainability, and (6) project specific domains. All measures will evaluate

HRSA's progress toward achieving its goals.

The proposed changes include additional components under questions surrounding the network's benefits and funding strategies, as well as the types of participant organizations. Questions surrounding Health Information Technology and Telehealth have been modified to reflect an updated telehealth definition based on renewed knowledge on the use of both Health Information Technology and Telehealth, and to improve understanding of how these important technologies are affecting HRSA award recipients. The Demographics and Services section now includes a question requesting grantees to identify which counties they have served during the project. Finally, revised National Quality Forum and Centers for Medicare & Medicaid Services measures were included to allow uniform collection efforts throughout the HRSA Federal Office of Rural Health Policy.

The total number of responses has remained at 44 since the previous ICR. While the new RHND grant cycle maintained the same number of award recipients and number of respondents, in consideration of the new cohort of awardees, HRSA has increased the estimated average burden per response.

The increase in burden is largely due to the amount of time it takes to build systems to capture and report data at the start of a new project. Larger networks or consortiums with multiple partners and programs across different organizations also reported higher burdens due to the wait time in between requests.

Likely Respondents: Respondents will be award recipients of the Rural Health Network Development Program.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

Total Estimated Annualized Burden Hours:

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Performance Improvement and Measurement System Database	44	1	44	48.8	2,147.2
Total	44	1	44	48.8	2,147.2

Title: Terrorism Risk Insurance Program (TRIP).

OMB Control Number: 1505–0200.

Type of Review: Extension without change of a currently approved collection.

Description: The Terrorism Risk Insurance Act of 2002, as amended (TRIA or the Act), established the Terrorism Risk Insurance Program (TRIP or Program). The Act establishes a temporary Federal program of shared public and private compensation for insured commercial property and casualty losses resulting from an “act of terrorism,” as defined by TRIA. In order for the Program to make payments following a certified “act of terrorism,” the losses from an event must exceed certain thresholds and be in excess of participating insurer deductibles. Only “acts of terrorism” that have been certified as such by the Secretary (in consultation with the Attorney General and the Secretary of Homeland Security) are subject to the compensation provisions of the Program. In the event Treasury does make payments under the Program, it may be required, through surcharges imposed upon all commercial policyholders, to recoup some or all of any amounts expended.

Since the inception of the Program in 2002, Treasury has sought and obtained from the Office of Management and Budget (OMB) approvals for information collections that will be necessary if Treasury needs to process claims for the Federal share of compensation, and potentially recoup amounts expended as required under TRIA. Most of these information collections are managed through forms that have been developed by Treasury to permit participating insurers to demonstrate that they are entitled to payments for the Federal share of compensation. In some cases (as explained further in this Notice), the information collection is not subject to a specific form but is based upon
