

3. *Alternatives.* This study will investigate the following alternatives: No action alternative, creation, enhancement, or protection of marsh islands and/or back barrier marsh including creation and/or restoration of bird nesting habitat; construction of vegetative buffers along riparian drainages; removal and/or control of exotic and invasive species; and protection and establishment of SAV habitats. The final outcome of this study would be a feasibility report and an Environmental Impact Statement (EIS), which would recommend projects for construction authorization.

4. *Public Involvement.* Public participation in the EIS process will be strongly encouraged both formally and informally, to support the formulation of a more technically feasible and socially and politically acceptable ecosystem restoration project. Public involvement activities for this study will include but are not limited to: periodic dissemination of information and study findings via meetings and the Wilmington District web site; identification of restoration problems, needs, and opportunities; evaluation of potential restoration measures and subsequent development of alternatives; issuance of public and scoping notices and meetings; public and stakeholder workshops; and posting of the completed EIS on the Internet as well as in hard copy at readily accessible public locations.

5. *Scoping.* All private parties and Federal, State, and local agencies having an interest in the study are hereby notified of the initiation of the Currituck Sound EIS and are invited to comment at this time. An initial scoping letter dated 13 April 2001 was circulated during the early planning phase of this study. This Notice of Intent (NOI) constitutes an updated scoping request.

A formal scoping meeting is not planned at this time but may be held if it is determined that new information could be obtained that would not otherwise be available. All comments received as a result of this NOI and the previous scoping letter will be considered in the preparation of the EIS.

In accordance with the Council on Environmental Quality's (CEQ's) NEPA regulations (40 CFR 1506.1), Federal agencies with jurisdiction by law or with special expertise shall be invited to be Cooperating Agencies. Through an email dated 12 July 2010, Agency representatives were invited to participate in this study as a Cooperating Agency. To date, no formal Cooperating Agency status has been established with any Agencies.

6. *Coordination.* The USACE will consult with the U.S. Fish and Wildlife Service under the Endangered Species Act and the Fish and Wildlife Coordination Act; with the National Marine Fisheries Service under the Magnuson-Stevens Fishery Conservation and Management Act and the Endangered Species Act; and with the North Carolina State Historic Preservation Office under the National Historic Preservation Act. Additionally, the USACE will coordinate the DEIS with the North Carolina Division of Water Quality to assess the potential water quality impacts pursuant to Section 401 of the Clean Water Act, and with the North Carolina Division of Coastal Management to determine the project's consistency with the Coastal Zone Management Act. Other Agencies will be consulted with as required.

7. *Availability of the Environmental Impact Statement.* The earliest the DEIS will be available for public review would be February 2012. The DEIS or a Notice of Availability will be distributed to affected Federal, State, and local agencies, Indian tribes, and other interested parties.
