

section 112(d). The source categories for which EPA had previously issued section 112(d) standards and that are the subject of the Complaints are: Gasoline Distribution (Stage 1), 59 FR 64303 (December 14, 1994); Commercial Sterilizers, 59 FR 62585 (December 6, 1994); Industrial Cooling Towers, 59 FR 46339 (September 8, 1994); Magnetic Tape, 59 FR 64580 (December 15, 1994); Hazardous Organic National Emissions Standards for Hazardous Air Pollutants, 59 FR 19402 (April 22, 1994); and the Degreasing Organic Cleaners (Halogenated Solvent Cleaning), 59 FR 61801 (December 2, 1994).

The proposed consent decree establishes deadlines for EPA final action, including a March 31, 2006 and December 15, 2006 deadline. Specifically, the proposed consent decree calls for EPA to review the existing emission standards for the six source categories noted above and either revise those standards if determined necessary pursuant to section 112(d)(6), or conclude that no revisions are necessary. The proposed consent decree further calls for EPA to review the existing emission standards for the same six source categories pursuant to section 112(f)(2) and either promulgate standards pursuant to section 112(f)(2) or conclude that such standards are not required.

For a period of thirty (30) days following the date of publication of this notice, the Agency will receive written comments relating to the proposed consent decree from persons who were not named as parties or interveners to the litigation in question. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act. Unless EPA or the Department of Justice determine, based on any comment which may be submitted, that consent to the consent decree should be withdrawn, the terms of the decree will be affirmed.

II. Additional Information About Commenting on the Proposed Consent Decree

A. How Can I Get a Copy of the Consent Decree?

EPA has established an official public docket for this action under Docket ID No. OGC-2005-0009 which contains a copy of the consent decree. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA

Docket Center, EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OEI Docket is (202) 566-1752.

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at <http://www.epa.gov/edocket/> to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once in the system, select "search," then key in the appropriate docket identification number.

It is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EPA's electronic public docket as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. Information claimed as CBI and other information whose disclosure is restricted by statute is not included in the official public docket or in EPA's electronic public docket. EPA's policy is that copyrighted material, including copyrighted material contained in a public comment, will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the EPA Docket Center.

B. How and to Whom Do I Submit Comments?

You may submit comments as provided in the ADDRESSES section. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an e-mail address or other contact information in the body of your comment and with any disk or CD-ROM you submit. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot

read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Your use of EPA's electronic public docket to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an "anonymous access" system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment. In contrast to EPA's electronic public docket, EPA's electronic mail (e-mail) system is not an "anonymous access" system. If you send an e-mail comment directly to the Docket without going through EPA's electronic public docket, your e-mail address is automatically captured and included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.

Dated: August 1, 2005.

Richard B. Ossias,

Acting Associate General Counsel, Air and Radiation Law Office, Office of General Counsel.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[MN87; FRL-7949-4]

Notice of Issuance of Prevention of Significant Deterioration Construction Permit and Part 71 Federal Operating Permit to Great Lakes Gas Transmission L.P.

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: This notice announces that, on June 30, 2005, pursuant to Titles I and V of the Clean Air Act, 42 U.S.C. 7401-7479 and 7501-7515, the Environmental Protection Agency (EPA), Region 5 issued a Prevention of Significant Deterioration Construction Permit (PSD permit) and a Title V Permit to Operate (Title V permit) to Great Lakes Gas Transmission L.P. (Great Lakes). These permits authorize the company to construct and operate

Compressor Station No. 5 (CS #5), one of five Great Lakes compressor stations located in Minnesota. Although these permits authorize the company to construct and operate, the source previously had sought and been issued a construction permit by the Minnesota Pollution Control Agency (MPCA). The federal construction permit supersedes the previously issued MPCA permit.

The compressor station is composed of three natural gas-fired turbines and one natural gas-fired standby electrical generator, which the source uses to add pressure along a natural gas pipeline. The turbines are located in Cloquet, Minnesota on privately-owned fee land within the exterior boundaries of the Fond du Lac Band of Lake Superior Chippewa Indian Reservation.

DATES: During the public comment period, ending May 16, 2005, EPA received no comments on either the draft PSD or Title V permit. Therefore, in accordance with 40 CFR 124.15 and 71.11(i)(2)(iii), both permits became effective immediately upon permit issuance, June 30, 2005.

ADDRESSES: The final signed permits are available for public inspection online at <http://www.epa.gov/region5/air/permits/epermits.htm> or during normal business hours at the following address: EPA, Region 5, 77 West Jackson Boulevard (AR-18J), Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Ethan Chatfield, EPA, Region 5, 77 W. Jackson Boulevard (AR-18J), Chicago, Illinois 60604, (312) 886-5112, or chatfield.ethan@epa.gov.

SUPPLEMENTARY INFORMATION: This supplemental information is organized as follows:

- A. What Is the Background Information?
- B. What Action Is EPA Taking?

A. What Is the Background Information?

Great Lakes operates nearly 2,000 miles of large diameter underground pipeline, through which it transports natural gas for delivery to customers in the midwest and northeast United States and eastern Canada. The pipeline's 14 compressor stations, located approximately 75 miles apart, operate to keep natural gas moving through the system. Compressors operated at these stations add pressure to natural gas in the pipeline, causing it to flow to the next compressor station. The pipeline normally operates continuously, but at varying load, 24 hours per day and 365 days per year.

CS #5 is located approximately 17 miles west of Cloquet, Minnesota, near

the intersection of county roads 847 and 851, on the Fond du Lac Band of Lake Superior Chippewa Indian Reservation in St. Louis County, Minnesota. The station consists of three stationary natural gas-fired turbines (EU-001 through EU-003), which drive three natural gas compressors, and one natural gas-fired standby electrical generator (EU-004), which provides electrical power for critical operations during temporary electrical power outages and during peak loading.

Since CS #5 is a major stationary source, Great Lakes was required to obtain a preconstruction permit under 40 CFR 52.21. Furthermore, because CS #5 is subject to section 111 of the Clean Air Act and is located in Indian Country, 40 CFR 71.3(a) and 71.4(b) make it subject to the permitting requirements of 40 CFR part 71. On June 30, 2005, EPA issued a PSD construction permit (PSD-FDL-R50001-04-01) and a federal Title V Permit (No. V-FDL-R50006-04-01) which incorporates all applicable air quality requirements, including monitoring sufficient to yield reliable data on the source's compliance with the permit. In accordance with the requirements of 40 CFR 71.11(d) and 124.10, EPA provided the public with the required 30 days to comment on the draft permit. EPA did not receive any comments during the public comment period.

B. What Action Is EPA Taking?

EPA is notifying the public of the issuance of the PSD and Title V permits to Great Lakes Gas Transmission L.P. Because EPA did not receive comments on the permits, only persons who demonstrate that there are new grounds for review that were not reasonably foreseeable during the public comment period may, within 30 days of the date of this notice, seek review of the Title V operating permit pursuant to 40 CFR 71.11.

Dated: July 22, 2005.

Bharat Mathur,

Acting Regional Administrator, Region 5.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-7949-3]

Notice of Proposed Administrative Order on Consent Under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), as Amended, 42 U.S.C. 9622(h)(1), Creighton Chemical Superfund Site, Creighton, NE, Docket No. CERCLA 07-2005-0310

AGENCY: Environmental Protection Agency.

ACTION: Notice of Proposed Administrative Order on Consent, Creighton Chemical Superfund Site, Creighton, Nebraska.

SUMMARY: Notice is hereby given that a proposed administrative order on consent regarding the Creighton Chemical Superfund Site located in Knox County, Nebraska, will be signed the United States Environmental Protection Agency (EPA) following completion of the public comment period.

DATES: EPA will receive, for a period of thirty (30) days from the date of this publication, written comments relating to the proposed administrative order.

ADDRESSES: Comments should be addressed to Denise L. Roberts, Senior Assistant Regional Counsel, United States Environmental Protection Agency, Region VII, 901 N. 5th Street, Kansas City, Kansas 66101 and should refer to: In the Matter of Creighton Chemical Superfund Site, Creighton, Nebraska, Docket No. CERCLA-07-2005-0310.

The proposed administrative order may be examined or obtained in person or by mail from Denise L. Roberts, United States Environmental Protection Agency, Region VII, 901 N. 5th Street, Kansas City, KS 66101, (913) 551-7559.

SUPPLEMENTARY INFORMATION: This proposed administrative order on consent concerns the Creighton Chemical Superfund Site, located in Creighton, Nebraska. It is made and entered into by EPA and The Estate of Ralph Block (Settling Party).

In response to the release or threatened release of hazardous substances at or from the Site, EPA undertook response actions at the Site pursuant to Section 14 of CERCLA, 42 U.S.C. 9604, and may undertake additional response actions in the future. EPA performed a removal action at the Site. In performing response action at the Site, EPA has incurred response costs and will incur additional response costs in the future.
