SUPPLEMENTARY INFORMATION: OMB regulations at 5 CFR 1320, which implement provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104-13), require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities [see 5 CFR 1320.8(d)]. OSM has submitted a request to OMB to renew its approval of the collection of information contained in 30 CFR Parts 779 and 783—Surface and Underground Mining Permit Applications—Minimum Requirements for Information on Environmental Resources. OSM is requesting a 3-year term of approval for the information collection activity.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this collection of information is 1029-0035. Responses are required to obtain a benefit for this collection.

As required under 5 CFR 1320.8(d), a **Federal Register** notice soliciting comments on this collection of information was published on November 28, 2011 (76 FR 72972). One comment was received. The commenter suggested that there is a connection between coal mine drilling and earthquakes, and that coal companies should be required to report recent earthquakes in the area where drilling is proposed to occur.

Earthquakes range from extremely small and virtually unnoticeable events to catastrophic events that cause considerable damage. Unlike oil and gas drilling operations, coal mining is typically undertaken at a much shallower depth, and without injection of great volumes of water to fracture (frack) the rock strata. Therefore, OSM's engineers consider it virtually impossible for coal mine drilling to cause a reportable earthquake. To be certain, we checked with the United States Geological Survey to determine if there is any evidence of coal mine drilling causing earthquakes. We found no mention of coal mine drilling causing earthquakes of any size. In conclusion, we have determined that the comment is not supported by available scientific information and therefore does not warrant conducting national rulemaking to request earthquake data in the permit area.

This notice provides the public with an additional 30 days in which to comment on the following information collection activity:
