BILLING CODE 7533-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-409; NRC-2012-0151]

Dairyland Power Cooperative; La Crosse Boiling Water Reactor Exemption From Certain Security Requirements

1.0 Background

The La Crosse Boiling Water Reactor (LACBWR) is owned and was operated by the Dairyland Power Cooperative (DPC). The LACBWR was a nuclear power plant of nominal 50 Mw electrical output, which utilized a forced-circulation, direct-cycle boiling water reactor as its heat source. The plant is located on the east bank of the Mississippi River in Vernon County, Wisconsin. The plant was one of a series of demonstration plants funded, in part, by the U.S. Atomic Energy Commission (AEC). The nuclear steam supply system and its auxiliaries were funded by the AEC, and the balance of the plant was funded by the DPC. The Allis-Chalmers Company was the original licensee; the AEC later sold the plant to the DPC and provided them with a provisional operating license.

The LACBWR was permanently shut down on April 30, 1987, and reactor defueling was completed on June 11, 1987. Pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) 50.82, the decommissioning plan was approved August 7, 1991. The decommissioning plan serves as the post-shutdown decommissioning activities report (PSDAR). The DPC has been conducting dismantlement and decommissioning activities. The DPC is

developing an onsite independent spent fuel storage installation (ISFSI) and plans to move spent fuel to the ISFSI later in 2012.

2.0 Request/Action

Part 73, "Physical Protection of Plant and Materials," provides in part, "This part prescribes requirements for the establishment and maintenance of a physical protection system which will have capabilities for the protection of special nuclear material at fixed sites and in transit and of plants in which special nuclear material is used." In 10 CFR 73.55, entitled "Requirements for physical protection of licensed activities in nuclear power reactors against radiological sabotage," paragraph (b)(1) states, "The licensee shall establish and maintain a physical protection program, to include a security organization, which will have as its objective to provide high assurance that activities involving special nuclear material are not inimical to the common defense and security and do not constitute an unreasonable risk to the public health and safety."

The U.S. Nuclear Regulatory Commission (NRC or the Commission) revised 10 CFR 73.55, in part to include the preceding language, through the issuance of a final rule on March 27, 2009 (74 FR 13926). The revised regulation stated that it was applicable to all Part 50 licensees.

By letter dated February 23, 2011, the DPC submitted a revised LACBWR Physical Security Plan (PSP) that included changes to comply with 10 CFR 73.55 and to implement the ISFSI requirements for the planned transfer of spent fuel to dry cask storage. Additionally, by letter dated February 23, 2011, the DPC submitted a request for exemptions from the requirements in the following sections contained in 10 CFR 73.55: 73.55(b)(6), 73.55(b)(7), 73.55(b)(8), 73.55(b)(9)(i)(A), 73.55(b)(9)(ii)(B), 73.55(b)(9)(ii)(C), 73.55(c)(1)(i), 73.55(c)(2), 73.55(c)(4), 73.55(c)(6), 73.55(d)(3)(i), 73.55(e)(1)(i), 73.55(e)(10), 73.55(g)(2)(iii), 73.55(g)(7)(ii), 73.55(g)(8)(iii), 73.55(i)(1), 73.55(i)(2), 73.55(i)(4)(i), 73.55(i)(4)(ii)(A), 73.55(k)(5)(i)&(ii), 73.55(k)(5)(iii), and 73.55(k)(6)(i), for the LACBWR ISFSI.

3.0 Discussion

Pursuant to 10 CFR 73.5, "Specific exemptions," the Commission may grant exemptions from the regulations in this part as it determines are authorized by law and will not endanger life or property or the common defense and security, and are otherwise in the public interest.
