

ACTION: Notice to Delete a System of Records.

SUMMARY: The Defense Intelligence Agency is deleting a system of records notice in its existing inventory of record systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended.

DATES: This proposed action will be effective on April 13, 2012 unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

* *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive, East Tower, 2nd Floor, Suite 02G09, Alexandria, VA 22350-3100.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Ms. Theresa Lowery at (202) 231-1193.

SUPPLEMENTARY INFORMATION: The Defense Intelligence Agency systems of records notices subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the individual listed in **FOR FURTHER INFORMATION CONTACT**. The proposed deletion is not within the purview of subsection (r) of the Privacy Act of 1974 (5 U.S.C. 552a), as amended, which requires the submission of a new or altered system report.

Dated: March 8, 2012.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DELETION:

LDIA 06-0002

SYSTEM NAME:

Department of Defense Intelligence Information Systems Access, Authorization, and Control Records (April 11, 2007, 72 FR 18209).

REASON:

Records have been incorporated into LDIA 07-0003, entitled Department of Defense Intelligence Information System (DoDIIS) Customer Relationship

Management System. The records will assume the same retention schedule as listed in LDIA 07-0003.

BILLING CODE 5001-06-P

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Installation of a Terminal Groin Structure at the Western End of South Beach, Bald Head Island, in Close Proximity to the Federal Wilmington Harbor Channel of the Cape Fear River (Brunswick County, NC)

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: The U.S. Army Corps of Engineers (USACE), Wilmington District, Wilmington Regulatory Field Office has received a request for Department of the Army authorization, pursuant to Section 404 of the Clean Water Act and Section 10 of the Rivers and Harbor Act, from the Village of Bald Head Island (VBHI) to develop and implement a shoreline protection plan that includes the installation of a terminal groin structure on the east side of the Wilmington Harbor Baldhead Shoal Entrance Channel (a federally-maintained navigation channel of the Cape Fear River) at the "Point" of Bald Head Island. The structure will be designed to be strategically incorporated into the federal beach disposal operations associated with the Wilmington Harbor Sand Management Plan.

DATES: A public scoping meeting for the DEIS will be held at the ILA Hall, located at 211 West 10th Street in Southport (NC) on March 22, 2012 at 6 p.m. Written comments will be received until April 9, 2012.

ADDRESSES: Copies of comments and questions regarding scoping of the DEIS may be submitted to: U.S. Army Corps of Engineers, Wilmington District, Regulatory Division. ATTN: File Number SAW-2012-00040, 69 Darlington Avenue, Wilmington, NC 28403.

FOR FURTHER INFORMATION CONTACT:

Questions about the proposed action and DEIS can be directed to Mr. David Timpy, Project Manager, Wilmington Regulatory Field Office, telephone: (910) 251-4634. Additional description of the

VBHI's proposal can be found at the following link, <http://www.saw.usace.army.mil/WETLANDS/Projects/index.html>, under the Village of Bald Head Island Terminal Groin Project.

SUPPLEMENTARY INFORMATION:

1. Project Description

The west end of South Beach has experienced both chronic mid-term (decadal) and accelerated short-term erosion losses (with direct impacts to beaches and dunes of this segment of shoreline). A nourishment project has been employed by the VBHI to mitigate the effects of these losses. In addition, several million cubic yards of sand from a Federal navigation project has been disposed on the beach since 1991. Despite this sand placement on the beach, a portion of South Beach continues to experience substantial erosion, potentially impacting public infrastructure and homes. It is the VBHI's desire to implement a long-term beach and dune stabilization strategy. The applicant contends that a necessary component to the success of this strategy is the installation of a terminal groin that would (1) reduce inlet-directed sand losses from beach fill construction projects; and (2) stabilize shoreline alignment along the westernmost segment of South Beach in such a manner that alongshore transport rates are reduced. The VBHI proposal calls for the construction of a single terminal groin designed to complement future placement of beach fill at South Beach. The structure will serve as a "template" for fill material placed eastward of the proposed terminal groin. In that regard, the groin will be designed as a "leaky" structure (i.e. semi-permeable) so as to provide for some level of sand transport to West Beach (located northward of the proposed groin).

2. Issues

There are several potential environmental and public interest issues that will be addressed in the DEIS. Additional issues may be identified during the scoping process. Issues initially identified as potentially significant include:

a. Potential impacts to marine biological resources (benthic organisms, passageway for fish and other marine life) and Essential Fish Habitat.

b. Potential impacts to threatened and endangered marine mammals, birds, fish, and plants.

c. Potential impacts to adjacent shoreline changes on West Beach of Bald Head Island and adjacent shorelines.

d. Potential impacts to Navigation, commercial and recreational.
 e. Potential impacts to the long-term management of the oceanfront shorelines.

f. Potential effects on regional sand sources and how it relates to sand management practices and North Carolina's Beach Inlet Management Practices.

g. Potential effects of shoreline protection.

h. Potential impacts on public health and safety.

i. Potential impacts to recreational and commercial fishing.

j. Potential impacts to cultural resources.

k. Cumulative impacts of past, present, and foreseeable future dredging and nourishment activities.

3. Alternatives

Several alternatives are being considered for the development of the protection plan. These alternatives will be further formulated and developed during the scoping process and an appropriate range of alternatives, including the no federal action alternative, will be considered in the DEIS.

4. Scoping Process

A public scoping meeting (see **DATES**) will be held to receive public comment and assess public concerns regarding the appropriate scope and preparation of the DEIS. Participation in the public meeting by federal, state, and local agencies and other interested organizations and persons is encouraged.

The USACE will consult with the U.S. Fish and Wildlife Service under the Endangered Species Act and the Fish and Wildlife Coordination Act; with the National Marine Fisheries Service under the Magnuson-Stevens Fishery Conservation and Management Act and the Endangered Species Act; and with the North Carolina State Historic Preservation Office under the National Historic Preservation Act. Additionally, the USACE will coordinate the DEIS with the North Carolina Division of Water Quality (NCDWQ) to assess the potential water quality impacts pursuant to Section 401 of the Clean Water Act, and with the North Carolina Division of Coastal Management (NCDCM) to determine the projects consistency with the Coastal Zone Management Act. The USACE will closely work with NCDCM and NCDWQ in the development of the DEIS to ensure the process complies with current State Environmental Policy Act (SEPA) requirements. It is the intention

of both the USACE and the State of North Carolina to consolidate the NEPA and SEPA processes thereby eliminating duplication.

6. Availability of the DEIS

The DEIS is expected to be published and circulated by the end of 2012. A public hearing will be held after the publication of the DEIS.

Dated: March 2, 2012.

Scott McLendon,

Assistant Chief, Regulatory Division.

BILLING CODE 3720-58-P

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Public Scoping Meeting and Preparation of Environmental Impact Statement for Baryonyx Corporation, Inc.'s Proposed Wind Farm, Offshore, Willacy and Cameron Counties, TX

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of Intent.

SUMMARY: The U.S. Army Corps of Engineers, Galveston District, has received a permit application for a Department of the Army (DA) Permit pursuant to Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403) and Section 404 of the Clean Water Act (33 U.S.C. 1344) from Baryonyx Corporation, Inc. (SWG-2011-00511) for the proposed approximately 300-turbine offshore wind farm located in the Gulf of Mexico state waters, offshore Willacy and Cameron Counties in state tracts: 1068, 1069, 1085, 1086, 1087, 1088, 1089, 1090, 1126, 1127, 1129, 1130 and 1131. The primary Federal involvement associated with the proposed action is the discharge or dredged or fill material into waters of the United States, and the construction of structures that may affect navigable waters. Federal authorizations for the proposed project would constitute a "major federal action." Based on the potential impacts, both individually and cumulatively, the Corps intends to prepare an Environmental Impact Statement (EIS) in compliance with the National Environmental Policy Act to render a final decision on the permit applications.

The Corps' decision will be to issue, issue with modification or deny DA permits for the proposed action. The EIS will assess the potential social, economic and environmental impacts of the construction and operation of the

offshore wind farm, associated facilities, and appurtenances and is intended to be sufficient in scope to address Federal, State and local requirements, environmental and socio-economic issues concerning the proposed action, and permit reviews.

DATES: The agency must receive comments on or before May 14, 2012.

ADDRESSES: You may submit comments by any of the following methods: *Mail:* Jayson M. Hudson, U.S. Army Corps of Engineers, Regulatory Branch, P.O. Box 1229, Galveston, TX 77553-1229; *Fax:* (409) 766-3931 or *Email:*

SWG2011511@usace.army.mil. Emailed comments, including attachments, should be provided in .doc, .docx, .pdf or .txt formats. Documents pertinent to the proposed project may be examined at <http://www.swg.usace.army.mil/reg/eis.asp>.

FOR FURTHER INFORMATION CONTACT: Mr. Jayson Hudson, (409) 766-3108.

SUPPLEMENTARY INFORMATION: The Galveston District intends to prepare an EIS on the proposed Baryonyx offshore wind farm which would include the proposed construction of approximately 300 offshore turbines in the Gulf of Mexico offshore Willacy and Cameron Counties, TX. Baryonyx Corporation, Inc. proposed this project and is the applicant for the DA permit SWG-2011-00511.

1. *Project Background:* The applicant proposes to construct an approximately 300-turbine wind farm in two areas referred to as the North Rio Grande Lease and Rio Grande Lease. The project is located in Gulf of Mexico state waters, offshore Willacy and Cameron Counties in state tracts: 1068, 1069, 1085, 1086, 1087, 1088, 1089, 1090, 1126, 1127, 1129, 1130 and 1131. The proposed project consists of the following:

a. *Wind Turbines and Foundations:* Each lease site will be comprised of 100-200 wind turbine generators in a grid pattern (turbine array). The final locations will be determined by consultation with appropriate state and federal agencies and consideration of constraints including: wind resource characteristics; safety and navigation; technical characteristics of the wind turbine generators; electrical collection system characteristics; geophysical site constraints; and environmental and ecological considerations. The specific turbine has not been selected so that Baryonyx may take advantage of the latest technologies in wind generation which may become commercially available at the time of procurement. Turbines will be installed onto individual platform foundations attached to the seabed. Foundation type
