

Year 2022 and thereafter, to improve question clarity, clarify required documentation, and support HRSA's analysis and understanding of program impact. Specifically, the Application includes the proposed changes listed below.

- Updated application language: Specifically, throughout the application, alternate terminology was utilized to provide greater clarity and specificity. These changes were based on grantee feedback and various forms of information received from the HRSA Helpline. These changes are not substantive in nature.

- Updated language and requested documents in section III of the application: Specifically, section III was edited to clarify the qualifications for eligible individuals and clarify program expectations where individuals have a history of disciplinary action or malpractice.

- Deleted former section IV: It has been determined that the information requested in this section, which related

to offsite events and particularized determinations, is not necessary to evaluate eligibility for deeming.

The FTCA Program has a web based application system, the Electronic Handbooks. These electronic application forms decrease the time and effort required to complete the older, paper-based OMB approved FTCA application forms. The application includes Acknowledgments of Deemed Status Requirements, Acknowledgment of Required Performance Conditions, and Information on the Volunteers Sponsored for Deeming.

Need and Proposed Use of the Information: Deeming sponsorship applications must address certain specified criteria required by law in order for deeming determinations to be issued. The application submissions provides HRSA with the information required to determine whether an individual meets the requirements for deemed PHS employment for purposes of providing liability protections under section 224(q) of the PHS Act.

Likely Respondents: Respondents include Health Center Program funds recipients seeking to sponsor their volunteer health professionals for deemed employment for purposes of FTCA coverage.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Application for Deemed Health Center Program Award Recipients to Sponsor VHPs for Deemed PHS Employment	1,156	3	3,468	2	6,936
Total	1,156	3,468	6,936

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.
