

that the State submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation was not considered a major rule.

Unfunded Mandates

This rule will not impose an unfunded mandate on State, local, or tribal governments or the private sector of \$100 million or more in any given year. This determination is based upon the fact that the State submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation did not impose an unfunded mandate.

List of Subjects in 30 CFR Part 917

Intergovernmental relations, Surface mining, Underground mining.

Dated: January 9, 2002.

Allen D. Klein,

Regional Director, Appalachian Regional Coordinating Center.

BILLING CODE 4310-05-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA 254-0318b; FRL-7132-2]

Revisions to the California State Implementation Plan, Yolo-Solano Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve revisions to the Yolo-Solano Air Quality Management District (YSAQMD) portion of the California State Implementation Plan (SIP). These revisions concern oxides of nitrogen (Nox) emissions from stationary internal combustion engines. We are proposing to approve the local rule to regulate these emission sources under the Clean Air Act as amended in 1990.

DATES: Any comments on this proposal must arrive by February 27, 2002.

ADDRESSES: Mail comments to Andy Steckel, Rulemaking Office Chief (AIR-4), U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105-3901.

You can inspect copies of the submitted SIP revisions and EPA's technical support document (TSD) at

our Region IX office during normal business hours. You may also see copies of the submitted SIP revisions at the following locations:

California Air Resources Board,
Stationary Source Division, Rule
Evaluation Section, 1001 "I" Street,
Sacramento, CA 95812
Yolo-Solano Air Quality Management
District, 1947 Galileo Court, Suite
103, Davis, CA 95616.

FOR FURTHER INFORMATION CONTACT: Charnjit Bhullar, Rulemaking Office (AIR-4), U.S. Environmental Protection Agency, Region IX, (415) 972-3960.

SUPPLEMENTARY INFORMATION: This proposal addresses the local rule: YSAQMD Rule 2.32. In the Rules and Regulations section of this **Federal Register**, we are approving this local rule in a direct final action without prior proposal because we believe these SIP revisions are not controversial. If we receive adverse comments, however, we will publish a timely withdrawal of the direct final rules and address the comments in subsequent action based on these proposed rules. We do not plan to open a second comment period, so anyone interested in commenting should do so at this time. If we do not receive adverse comments, no further activity is planned. For further information, please see the direct final action.

Dated: December 28, 2001.

Jack Broadbent,

Acting Regional Administrator, Region IX.

BILLING CODE 6560-50-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018-AH95

Endangered and Threatened Wildlife and Plants; Proposed Determination of Critical Habitat for the Newcomb's Snail

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose designation of critical habitat for the Newcomb's snail (*Erinna newcombi*) pursuant to the Endangered Species Act of 1973, as amended (Act). The proposed critical habitat consists of nine stream segments and associated tributaries, springs and seeps on the

island of Kauai, Hawaii, totaling approximately 26.29 kilometers (16.35 miles).

If this proposal is made final, section 7 of the Act requires Federal agencies to ensure that actions they fund, authorize, or carry out do not destroy or adversely modify critical habitat for the survival and recovery of the species.

Section 4 of the Act requires us to consider economic and other impacts of specifying any particular area as critical habitat. We solicit data and comments from the public on all aspects of this proposal, including data on economic and other impacts of the designation. We may revise or further refine critical habitat boundaries described in this proposal after taking into consideration the comments or any new information received during the comment period, and such information may lead to a final regulation that differs from this proposal.

DATES: We will consider comments from all interested parties received by March 29, 2002. Requests for public hearing must be received by March 14, 2002.

ADDRESSES: Submit comments and requests for public hearing to Pacific Islands Fish and Wildlife Office, U.S. Fish and Wildlife Service, 300 Ala Moana Boulevard, Room 3-122, Box 50088, Honolulu, Hawaii 96850.

FOR FURTHER INFORMATION CONTACT: Paul Henson, Field Supervisor, Pacific Islands Fish and Wildlife Office, at the above address (telephone: 808/541-3441; facsimile: 808/541-3470).

SUPPLEMENTARY INFORMATION:

Background

The Hawaiian archipelago consists of eight main islands and the numerous shoals and atolls of the northwestern Hawaiian Islands. The islands were formed sequentially by basaltic lava that emerged from the earth's crust located near the current southeastern coast of the island of Hawaii (Stearns 1985). Ongoing erosion has formed steep-walled valleys with well-developed soils and stream systems throughout the chain. Kauai, geologically the oldest and most northwesterly of the eight main islands, is characterized by deep valleys, high rainfall, abundant vegetation, and numerous streams and springs.

The island of Kauai is 1,430 square kilometers (km²) (552 square miles (mi²)) in size, the fourth largest of the main Hawaiian islands. Most of the land mass of Kauai was formed between 5.6 and 3.6 million years ago from one or more large shield volcanoes. More recent, secondary eruptions occurred over the eastern portion of the island as
