

identification of the Need to Change the existing land management plan, further develop the proposed action (Preliminary Draft Land Management Plan) and identify potential significant issues. Significant issues will, in turn, form the basis for developing alternatives to the proposed action. The Forest Service will host public forums during the scoping period. Engagement opportunities will be posted on the Lolo National Forest Plan Revision website: <https://www.fs.usda.gov/goto/lolo/planrevision>. Information will also be shared through electronic mailing lists, social media, and local media outlets.

It is important that reviewers provide comments at such times and in such a manner that they are useful to the Forest Service's preparation of the EIS. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. Commenting during scoping and any other designated opportunity to comment provided by the Responsible Official will also establish standing to object once the final EIS and Draft Record of Decision have been published. Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered; however, they will not establish standing for the objection process.

The decision to approve the revised land management plan for the Lolo National Forest will be subject to the objection process identified in 36 CFR part 219 Subpart B (219.50 to 219.62). According to 36 CFR 219.53(a), those who may file an objection are individuals and entities who have submitted substantive formal comments related to land management plan revision during the opportunities provided for public comment. The burden is on the objector to demonstrate compliance with requirements for objections (36 CFR 219.53).

Nature of Decision To Be Made

The Lolo National Forest is preparing an EIS to revise its land management plan. The EIS process is meant to inform the Forest Supervisor so they can decide which alternative best maintains and restores National Forest System terrestrial and aquatic resources while providing ecosystem services and multiple uses, as required by the National Forest Management Act and the Multiple Use Sustained Yield Act. The revised land management plan will describe the strategic intent of managing

the Forest for the next 10 to 15 years and will address the identified need for change to the existing land management plan.

The revised land management plan will supplement, not replace, overarching laws and regulations. The authorization of project level activities will be based on the guidance and direction contained in the revised land management plan but will occur through subsequent project-specific National Environmental Policy Act (NEPA) analysis and decision-making. No decisions will be made regarding the management of individual roads or trails such as those that might be associated with a Travel Management plan under 36 CFR part 212. No decision regarding oil and gas leasing availability will be made.

Dated: December 5, 2023.

Troy Heithecker,

Associate Deputy Chief, National Forest System.
