The applicant proposes to receive, import, and export marine mammal parts (unlimited samples from up to 700 individual cetaceans and 400 individual pinnipeds [excluding walrus]) to study and enhance the health and biology of both wild marine mammals and those in public display, research, and stranding facilities. Research topics include diseases of marine mammals, pathology, health diagnostics, endocrinology, effects of environmental contaminants, immunology, toxicology, stock structure, distribution, age determination, reproduction, sperm preservation, artificial insemination, feeding habits and nutrition. Specimens and parts will come from the following U. S. or foreign sources: Animals in captivity (samples taken during routine

husbandry procedures or under separate authorization); animals in foreign countries stranded alive or dead or that died during rehabilitation; animals killed during legal subsistence harvests; animals killed incidental to legal commercial fishing operations; or samples from other authorized persons or collections. It is expected that the majority of samples would be exchanged between designated Alliance of Marine Mammal Parks and Aquariums members (from captive animals) and their collaborators. The proposed action will not result in additional takes of individual animals. The applicant has requested a 5-year permit.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.
