ACTION: Withdrawal of petition for rulemaking.

SUMMARY: The Nuclear Regulatory Commission (NRC) is notifying the public of the withdrawal of a petition for rulemaking (PRM-35-13) submitted by the National Registry of Radiation Protection Technologists (NRRPT). The petitioner requested that the NRC amend its regulations to accept NRRPT registration in lieu of the requirement for 200 hours of classroom training specified in 10 CFR 35.900(b)(1), and to accept the NRRPT registration as a substitute for 9 of the 12 months experience required in 10 CFR 35.900(b)(2) as a radiation safety technologist at a medical institution under the supervision of the Radiation Safety Officer (RSO). Since the receipt of the petition, the NRC has revised 10 CFR part 35, essentially in its entirety. The final rule was published in the **Federal Register** on April 24, 2002 (67 FR 20251-20397). On August 7, 2002, the petitioner formally withdrew its petition.

[Docket No. 2001-SW-40-AD]

RIN 2120-AA64

Airworthiness Directives; MD Helicopters, Inc. Model 369D, 369E, 369F, and 369FF Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to revise an existing airworthiness directive (AD) for the specified MD Helicopters, Inc. (MDHI) helicopters. That AD currently requires identifying the part number (P/N) of the bolts that attach the tail rotor gearbox to the tailboom and replacing any bolt of inadequate grip length with an airworthy bolt. That AD also requires adding an additional washer if more than four threads protrude from the nutplate. This action would contain the same requirements as the existing AD but would reduce the applicability to only certain tailboom serial numbers and parts modified in accordance with either Supplemental Type Certificate (STC) SH5055NM or SH4801NM. The action would also correct a typographical error and clarify that a slippage mark needs to be reapplied to each bolt regardless of the outcome of the required torque test. This proposal is prompted by the need to reduce the applicability and to correct and clarify other portions of the existing AD. The actions specified by the proposed AD are intended to prevent loss of a tail rotor gearbox due to bolts of inadequate grip length and subsequent loss of control of the helicopter.
