BILLING CODE 4510-24-P

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review: Comment Request

June 16, 2008.

The Department of Labor (DOL) hereby announces the submission of the following public information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. chapter 35). A copy of this ICR, with applicable supporting documentation, including among other things a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained from the *RegInfo.gov* Web site at <http://www.reginfo.gov/public/do/PRAMain> or by contacting Darrin King on 202-693-4129 (this is not a toll-free number) / e-mail: king.darrin@dol.gov.

Interested parties are encouraged to send comments to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the Mine Safety and Health Administration (MSHA), Office of Management and Budget, 725 17th Street, NW., Room 10235, Washington, DC 20503, Telephone: 202-395-4816 / Fax: 202-395-6974 (these are not toll-free numbers), E-mail: OIRA_submission@omb.eop.gov within 30 days from the date of this publication in the **Federal Register**. In order to ensure the appropriate consideration, comments should reference the applicable OMB Control Number (see below).

The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including

whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: Mine Safety and Health Administration.

Type of Review: Extension without change of currently approved collection.

Title of Collection: Hazard Communication—30 CFR Part 47.

OMB Control Number: 1219-0133.

Form Number: None.

Estimated Number of Respondents: 22,381.

Estimated Total Annual Burden

Hours: 177,668.

Estimated Total Annual Cost Burden: \$13,199.

Affected Public: Business or other for-profits (Mines).

Description: MSHA's Hazard Communication regulations at 30 CFR Part 47 require mine operators to use labels or other forms of warning necessary to inform miners of all hazards to which they are exposed, relevant symptoms and emergency treatment, and proper conditions of safe use of or exposure to hazardous chemicals. For additional information, see related notice published on April 8, 2008, at 73 FR 19104.

Darrin A. King,

Acting Departmental Clearance Officer.

BILLING CODE 4510-43-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of petitions for modification of existing mandatory safety standards.

SUMMARY: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and 30 CFR Part 44 govern the application, processing, and disposition of petitions

for modification. This notice is a summary of petitions for modification filed by the parties listed below to modify the application of existing mandatory safety standards published in Title 30 of the Code of Federal Regulations.

DATES: All comments on the petitions must be received by the Office of Standards, Regulations, and Variances on or before July 21, 2008.

ADDRESSES: You may submit your comments, identified by "docket number" on the subject line, by any of the following methods:

1. *Electronic mail:* Standards-Petitions@dol.gov.

2. *Facsimile:* 1-202-693-9441.

3. *Regular Mail:* MSHA, Office of Standards, Regulations, and Variances, 1100 Wilson Boulevard, Room 2349, Arlington, Virginia 22209, Attention: Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances.

4. *Hand-Delivery or Courier:* MSHA, Office of Standards, Regulations, and Variances, 1100 Wilson Boulevard, Room 2349, Arlington, Virginia 22209, Attention: Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances.

We will consider only comments postmarked by the U.S. Postal Service or proof of delivery from another delivery service such as UPS or Federal Express on or before the deadline for comments. Individuals who submit comments by hand-delivery are required to check in at the receptionist desk on the 21st floor.

Individuals may inspect copies of the petitions and comments during normal business hours at the address listed above.

FOR FURTHER INFORMATION CONTACT:

Lawrence D. Reynolds, Office of Standards, Regulations, and Variances at 202-693-9449 (Voice), reynolds.lawrence@dol.gov (E-mail), or 202-693-9441 (Telefax), or contact Barbara Barron at 202-693-9447 (Voice), barron.barbara@dol.gov (E-mail), or 202-693-9441 (Telefax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary determines that: (1) An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of

protection afforded the miners of such mine by such standard; or (2) that the application of such standard to such mine will result in a diminution of safety to the miners in such mine. In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modifications.

II. Petitions for Modification

Docket Number: M–2008–025–C.

Petitioner: ICG Beckley, LLC, P.O. Box 49, Eccles, West Virginia 25836.

Mine: Beckley Pocahontas Mine, MSHA I.D. No. 46–05252, located in Raleigh County, West Virginia.

Regulation Affected: 30 CFR 75.1101–1(b) (Deluge-type water spray systems).

Modification Request: The petitioner requests a modification of the existing standard to permit blow-off dust covers to be eliminated for nozzles on deluge-type water spray systems. The petitioner states that: (1) Functional tests as required under 30 CFR 75.1101–1 will be done weekly instead of annually; (2) functional tests are currently being done weekly and although more than adequate pressure and flow rates are maintained for the deluge system, in some tests the dust covers do not come off all sprays; (3) by doing the functional tests weekly, all sprays can be inspected and maintained on a weekly basis; and (4) the dust covers provide protection for sprays which are tested yearly and by testing weekly, the covers are not necessary. The petitioner asserts that the proposed alternative method will provide no less than the same measure of protection than would be provided under the existing standard.

Docket Number: M–2008–026–C.

Petitioner: Hardway Coal Company, Inc., 44 Keystroke Lane, Schuylkill Haven, Pennsylvania 17972.

Mine: Serill Mine, MSHA I.D. No. 36–07730, located in Schuylkill County, Pennsylvania.

Regulation Affected: 30 CFR 77.1200(c) & (k) (Mine map).

Modification Request: The petitioner requests a modification of the existing standard to permit the use of cross-sections in lieu of contour lines at regular intervals through the area to be mined and to limit the required mapping of mine workings below to those present within 100 feet of the vein(s) being mined. The petitioner states that: (1) Due to the steep pitch encountered in mining anthracite coal veins, contours provide no useful information and their presence would make portions of the map illegible; (2) use of cross-sections in lieu of contour lines has been practiced since the late 1800's thereby providing critical

information relative to the spacing between veins and proximity to other mine workings which fluctuate considerably; (3) the vast majority of current surface anthracite mining involves either the mining of remnant pillars from previous mining/mine operators or the mining of veins of lower quality in proximity to inaccessible and frequently flooded abandoned mine workings which may or may not be mapped; and (4) the mine workings below are usually inactive and abandoned, and therefore, are not subject to changes during the life of the mine, but active mines will be mapped. The petitioner asserts that the proposed alternative method will in no way provide less than the same measure of protection than that afforded the miners under the existing standard.

Docket Number: M–2008–027–C.

Petitioner: Black Diamond Mining, Inc., P.O. Box 139, Elysburg, Pennsylvania 17824.

Mine: Sioux Bank Operation, MSHA I.D. No. 36–08822, located in Northumberland County, Pennsylvania.

Regulation Affected: 30 CFR 77.1200(c) & (k) (Mine map).

Modification Request: The petitioner requests a modification of the existing standard to permit the use of cross-sections in lieu of contour lines at regular intervals through the area to be mined and to limit the required mapping of mine workings below to those present within 100 feet of the vein(s) being mined. The petitioner states that: (1) Due to the steep pitch encountered in mining anthracite coal veins, contours provide no useful information and their presence would make portions of the map illegible; (2) use of cross-sections in lieu of contour lines has been practiced since the late 1800's thereby providing critical information relative to the spacing between veins and proximity to other mine workings which fluctuate considerably; (3) the vast majority of current surface anthracite mining involves either the mining of remnant pillars from previous mining/mine operators or the mining of veins of lower quality in proximity to inaccessible and frequently flooded abandoned mine workings which may or may not be mapped; and (4) the mine workings below are usually inactive and abandoned, and therefore, are not subject to changes during the life of the mine, but active mines will be mapped. The petitioner asserts that the proposed alternative method will in no way provide less than the same measure of protection than that afforded the miners under the existing standard.

Docket Number: M–2008–028–C.

Petitioner: Premium Fine Coal, Inc., P.O. Box 2043, Hazleton, Pennsylvania 18201.

Mine: Schuylkill Twp. Strip Operation, MSHA I.D. No. 36–08681, located in Schuylkill County, Pennsylvania.

Regulation Affected: 30 CFR 77.1200(c) & (k) (Mine map).

Modification Request: The petitioner requests a modification of the existing standard to permit the use of cross-sections in lieu of contour lines at regular intervals through the area to be mined and to limit the required mapping of mine workings below to those present within 100 feet of the vein(s) being mined. The petitioner states that: (1) Due to the steep pitch encountered in mining anthracite coal veins, contours provide no useful information and their presence would make portions of the map illegible; (2) use of cross-sections in lieu of contour lines has been practiced since the late 1800's thereby providing critical information relative to the spacing between veins and proximity to other mine workings which fluctuate considerably; (3) the vast majority of current surface anthracite mining involves either the mining of remnant pillars from previous mining/mine operators or the mining of veins of lower quality in proximity to inaccessible and frequently flooded abandoned mine workings which may or may not be mapped; and (4) the mine workings below are usually inactive and abandoned, and therefore, are not subject to changes during the life of the mine, but active mines will be mapped. The petitioner asserts that the proposed alternative method will in no way provide less than the same measure of protection than that afforded the miners under the existing standard.

Docket Number: M–2008–029–C.

Petitioner: Rossi Excavating Company, 9 West 15th Street, Hazleton, Pennsylvania 18201.

Mine: Coleraine Operation, MSHA I.D. No. 36–09176, located in Carbon County, Pennsylvania.

Regulation Affected: 30 CFR 77.1200(c) & (k) (Mine map).

Modification Request: The petitioner requests a modification of the existing standard to permit the use of cross-sections in lieu of contour lines at regular intervals through the area to be mined and to limit the required mapping of mine workings below to those present within 100 feet of the vein(s) being mined. The petitioner states that: (1) Due to the steep pitch encountered in mining anthracite coal

veins, contours provide no useful information and their presence would make portions of the map illegible; (2) use of cross-sections in lieu of contour lines has been practiced since the late 1800's thereby providing critical information relative to the spacing between veins and proximity to other mine workings which fluctuate considerably; (3) the vast majority of current surface anthracite mining involves either the mining of remnant pillars from previous mining/mine operators or the mining of veins of lower quality in proximity to inaccessible and frequently flooded abandoned mine workings which may or may not be mapped; and (4) the mine workings below are usually inactive and abandoned, and therefore, are not subject to changes during the life of the mine, but active mines will be mapped. The petitioner asserts that the proposed alternative method will in no way provide less than the same measure of protection than that afforded the miners under the existing standard.

Docket Number: M-2008-030-C.

Petitioner: Park Mine Coal Company, 294 Pine Creek Drive, Orwigsburg, Pennsylvania 17961.

Mine: Park Mine, MSHA I.D. No. 36-09304, located in Schuylkill County, Pennsylvania.

Regulation Affected: 30 CFR 77.1200(c) & (k) (Mine map).

Modification Request: The petitioner requests a modification of the existing standard to permit the use of cross-sections in lieu of contour lines at regular intervals through the area to be mined and to limit the required mapping of mine workings below to those present within 100 feet of the vein(s) being mined. The petitioner states that: (1) Due to the steep pitch encountered in mining anthracite coal veins, contours provide no useful information and their presence would make portions of the map illegible; (2) use of cross-sections in lieu of contour lines has been practiced since the late 1800's thereby providing critical information relative to the spacing between veins and proximity to other mine workings which fluctuate considerably; (3) the vast majority of current surface anthracite mining involves either the mining of remnant pillars from previous mining/mine operators or the mining of veins of lower quality in proximity to inaccessible and frequently flooded abandoned mine workings which may or may not be mapped; and (4) the mine workings below are usually inactive and abandoned, and therefore, are not subject to changes during the life of the

mine, but active mines will be mapped. The petitioner asserts that the proposed alternative method will in no way provide less than the same measure of protection than that afforded the miners under the existing standard.

Jack Powasnik,

Deputy Director, Office of Standards, Regulations, and Variances.

BILLING CODE 7535-01-M

NUCLEAR REGULATORY COMMISSION

Withdrawal of Regulatory Guide

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Withdrawal of Regulatory Guide 3.42.

FOR FURTHER INFORMATION CONTACT:

Stephen C. O'Connor, U.S. Nuclear Regulatory Commission, Washington,

DC 20555-0001, telephone 301-415-2169, or e-mail SCO@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is withdrawing Regulatory Guide 3.42, "Emergency Planning for Fuel Cycle Facilities and Plants Licensed Under 10 CFR Parts 50 and 70," which was last revised in September 1979. Regulatory Guide 3.42 provides guidance in developing emergency plans for applicants for licenses of fuel cycle facilities under Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50, "Domestic Licensing of Production and Utilization Facilities," as well as for applicants for licenses of special nuclear material under 10 CFR Part 70, "Domestic Licensing of Special Nuclear Material." The NRC is withdrawing Regulatory Guide 3.42 because no fuel cycle facilities are currently licensed under both 10 CFR Part 50 and 10 CFR Part 70. In addition, no fuel cycle facilities have an active license under 10 CFR Part 50. For fuel cycle and materials facilities licensed under 10 CFR Part 70, Regulatory Guide 3.67, "Standard Format and Content for Emergency Plans for Fuel Cycle and Materials Facilities," issued January 1992, provides adequate guidance for developing emergency plans.

II. Further Information

The withdrawal of Regulatory Guide 3.42 does not, in and of itself, alter any prior or existing licensing commitments based on its use. The guidance provided in this regulatory guide no longer provides useful information. Regulatory guides may be withdrawn when their guidance is superseded by congressional action, the methods or techniques described in the regulatory guide no longer describe a preferred approach, or the regulatory guide does not provide useful information.

Regulatory guides are available for inspection or downloading through the NRC's public Web site under "Regulatory Guides" in the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/doc-collections>. Regulatory guides are also available for inspection at the NRC's Public Document Room (PDR), Room O-1F21, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852-2738. The PDR mailing address is U.S. NRC PDR, Washington, DC 20555-0001. The PDR staff can be reached by telephone at 301-415-4737 or 800-397-4209, by fax at 301-415-3548, or by e-mail to pdr@nrc.gov.
