

and (3) a summary of recommendations made by the Council to the FEMA Administrator.

The TMAC must also develop recommendations on how to ensure that flood insurance rate maps incorporate the best available climate science to assess flood risks and ensure that FEMA uses the best available methodology to consider the impact of the rise in sea level and future development on flood risk. The TMAC must collect these recommendations and present them to the FEMA Administrator in a future conditions risk assessment and modeling report.

Further, in accordance with the *Homeowner Flood Insurance Affordability Act of 2014*, the TMAC must develop a review report related to flood mapping in support of the National Flood Insurance Program (NFIP).

Agenda: On August 4, 2015, the TMAC members will present and deliberate on draft narrative and recommendations concerning (1) the flood hazard mapping process and product, and (2) future conditions methods and considerations that will be incorporated into both the 2015 Annual Report and the Future Conditions Report. A brief public comment period will take place prior to the end of the meeting.

On August 5, 2015, the TMAC members will continue to deliberate on draft narratives and recommendations concerning (1) the flood hazard mapping process and product, and (2) future conditions methods and considerations that will be incorporated in the two reports. In addition, the TMAC members will identify and coordinate next steps of the TMAC report development. A brief public comment period will take place during the meeting. The full agenda and related briefing materials will be posted for review by July 27, 2015 at <http://www.fema.gov/TMAC>.

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Receipt of application; request for comment.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service) announce receipt from the Nevada Department of Wildlife (NDOW) of an application for an enhancement of survival permit (permit) under the Endangered Species Act of 1973, as amended (ESA). The requested permit would authorize take of the relict leopard frog (RLF) resulting from certain land use and conservation activities, should the species be listed as endangered or threatened in the future. The permit application includes a proposed programmatic candidate conservation agreement with assurances (CCAA) between NDOW and the Service. The requested term of the proposed CCAA and permit is 30 years. In accordance with the requirements of the National Environmental Policy Act (NEPA), we have prepared a draft low-effect screening form supporting our determination that the proposed action qualifies as a categorical exclusion under NEPA. We are accepting comments on the permit application, proposed CCAA, and draft NEPA compliance documentation.

Background Information

Enhancement of survival permits issued for CCAAs encourage non-Federal landowners to implement conservation measures for species that are, or are likely to become, candidates for Federal listing as endangered or threatened by assuring landowners they will not be subjected to increased property use restrictions if the covered species becomes listed in the future. Application requirements and issuance criteria for enhancement of survival permits issued for CCAAs are in the Code of Federal Regulations (CFR) at 50 CFR 17.22(d) and 17.32(d). The policy
