

materials for medical research, diagnosis, and therapy purposes and on August 17, 1962 to operate a research reactor in Building 40 at the site. On March 9, 2004, WRAMC requested that NRC release the facility for unrestricted use. WRAMC has conducted surveys of the facility and determined that the facility meets the license termination criteria in Subpart E of 10 CFR part 20. The NRC staff has prepared an EA in support of the proposed license amendment.

### III. Finding of No Significant Impact

The staff has prepared the EA (summarized above) in support of the proposed license amendment to release Building 40 in its entirety of the WRAMC facility at 6900 Georgia Avenue, NW., Washington, DC for unrestricted use. The NRC staff has evaluated WRAMC's request and the results of the surveys, performed independent measurements to confirm the results, and has concluded that the completed action complies with the criteria in Subpart E of 10 CFR part 20. The staff has found that the environmental impacts from the proposed action are bounded by the impacts evaluated by the "Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Facilities" (NUREG-1496). On the basis of the EA, the NRC has concluded that the environmental impacts from the proposed action are expected to be insignificant and has determined not to prepare an environmental impact statement for the proposed action.

### IV. Further Information

The EA and the documents related to this proposed action, including the application for the license amendment and supporting documentation, are available for inspection at NRC's Public Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html> (ADAMS Accession No. ML041380084). These documents are also available for inspection and copying for a fee at the Region I Office, 475 Allendale Road, King of Prussia, Pennsylvania, 19406.
