No other assurances of confidentiality are provided to respondents.

Needs and Uses: The Commission is now requesting a revision (program change) and an adjustment of the burden estimates for this information collection. The reporting requirements for accreditation bodies is being added and the number of testing facilities filing a test site description is being increased. The latter increase is necessary to reflect the significant number of laboratories filing test site descriptions. This increase has been observed in the recent past, and is in large part due to Mutual Recognition Agreements (MRAs) signed by various foreign economic entities that allow for the testing of equipment in these MRA partner economies, by testing facilities filing site descriptions under 47 CFR 2.948 of the Commission's rules, prior to submittal of equipment for authorization. A change in the Commission's burden estimates is therefore being requested.

The Commission will submit this revised information collection to the Office of Management and Budget (OMB) during this comment period to obtain the full three year clearance from them. The Commission is reporting a 60 hour program change increase and a 12,000 hour increase adjustment.

Federal Communications Commission.
