SUPPLEMENTARY INFORMATION: The Commission is responding to comments on its request for a three-year extension of the information collected under FERC-919 (OMB Control No. 1902-0234) "Market Based Rates for Wholesale Sales of Electric Energy, Capacity and Ancillary Services by Public Utilities." Order No. 697¹ was issued by the Commission on June 21, 2007 to modify Subpart H to 18 Code of Federal Regulations (CFR) part 35, governing market-based authorization. In Order No. 697, the Commission revised and codified its standards for obtaining and retaining market-based rates for public utilities. Order No. 697 also made minor adjustments to the change in status filing requirements adopted in Order No. 652.² It added a requirement to include appendices of generation and transmission assets in the form provided in Appendix B of Order No. 697 when reporting a change in status regarding a change that impacts the pertinent assets held by a seller or its affiliates with market-based rate authorization.

The market power analyses required by Order No. 697 help to inform the Commission as to whether an entity seeking market-based rate authority lacks market power, and whether rates charged by that entity will be just and reasonable. The updated market power analyses allow the Commission to monitor changes in a seller's market presence or potential abuses of market power. The use of the Order No. 697 screens and reviews for market power for all companies seeking authority for market-based rates and those who have been charging market based rates results in a consistent authorization and review process. It provides regulatory certainty while ensuring the Commission meets
