#### SUPPLEMENTARY INFORMATION:

##### Proposed Project

##### *Development and Evaluation of AHRQ’s Quality Indicators Improvement Toolkit*

An important part of AHRQ’s mission  
is to disseminate information and tools  
that can support improvement in quality  
and safety in the U.S. health care  
community. See 42 U.S.C. 299(b)(1)(F);  
299a(a)(1) and (2). This proposed  
information collection supports that  
part of AHRQ’s mission by developing  
and evaluating a toolkit that will enable

hospitals to effectively use AHRQ’s  
Quality Indicators (QIs).

AHRQ has developed sets of QIs that  
can be used by the Agency and others  
to document quality and safety  
conditions at U.S. hospitals. Two sets of  
QIs will be used in this proposed  
toolkit: the Inpatient Quality Indicators  
(IQIs) and the Patient Safety Indicators  
(PSIs). The IQIs contain measures of  
volume, mortality, and utilization for  
common medical conditions and major  
surgical procedures. The PSIs are a set  
of measures to screen for potentially  
preventable adverse events that patients  
may experience during hospitalization.  
These QIs have been previously  
developed and evaluated by AHRQ, and  
are in use at a number of hospitals  
throughout the country. The QIs and  
supportive documentation on how to  
work with them are posted on AHRQ’s  
Web site at [http://  
www.qualityindicators.ahrq.gov](http://www.qualityindicators.ahrq.gov). Many  
of the QIs have been endorsed by the  
National Quality Forum through its  
consensus review process.

Values for each QI can be estimated  
for a given hospital by applying  
computations in SAS programs  
developed by AHRQ to the hospital’s  
pre-existing inpatient encounter data.  
To identify potential areas for  
improving the quality and safety of the  
care that a hospital provides, the  
hospital can use these data to examine  
its current performance on each QI  
measure, changes in its performance  
over time, and how its performance  
compares to that of other hospitals.  
However, despite the availability of the  
QIs as tools to help hospitals assess  
their performance, many U.S. hospitals
