The East Reservoir project area consists of five major drainages: Fivemile Creek, Warland Creek, Cripple Horse Creek, Canyon Creek and Dunn Creek.

Purpose and Need for Action

The purpose and need for this project is to: (1) Re-establish, restore and retain landscapes that are more resistant and resilient to disturbance (insect and disease infestations, fire) and uncertain environmental conditions (climate change) by enhancing species diversity and managing density; (2) reduce hazardous fuels adjacent to private property and across the landscape while re-introducing fire to the ecosystem; (3) restore, maintain or improve wildlife habitat; (4) improve recreation settings, opportunities and experiences; (5) provide amenities, jobs and products to the communities and maintain an adequate, balanced transportation system.

Proposed Action

To meet this purpose and need this project proposes:

(1) Vegetation treatments, including commercial timber harvest and associated fuel treatments, commercial thinning, precommercial thinning and prescribed burning without associated timber harvest. Vegetation treatments total approximately 13,000 acres of treated area.

(2) Road management includes new road construction, road storage and adding existing, undetermined roads to the National Forest Service road system. Approximately 2.04 miles of new road construction is proposed. Approximately 40 miles of road storage is proposed. There are 2.81 miles of roads in the project boundary that exist, but their status is undetermined. Those roads will be added to the NFS road system.

(3) Access change on approximately 35 miles of trail, from motorized to non-motorized, to benefit wildlife security.

(4) Fuels reduction and wildlife habitat enhancement is proposed for approximately 10,000 acres.

(5) Design features and mitigations to maintain and protect resource values.

Possible Alternatives

The Forest Service will consider a range of alternatives. One of these will be the "no action" alternative in which none of the proposed activities will be implemented. Additional alternatives will examine varying levels and locations for the proposed activities to achieve the proposal's purposes, as well as to respond to the issues and other resource values.

Responsible Official

Forest Supervisor of the Kootenai National Forest, 31374 U.S. Highway 2 West, Libby, MT 59923. As the Responsible Official, I will decide if the proposed project will be implemented. I will document the decision and reasons for the decision in the Record of Decision. I have delegated the responsibility for preparing the DEIS and FEIS to Malcolm R. Edwards, District Ranger, Libby Ranger District.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. The submission of timely and specific comments can affect a reviewer's ability to participate in subsequent administrative appeal or judicial review.

Paul Bradford,

Forest Supervisor, Kootenai National Forest.
