

Generation Fuel Core Reference Report" (Proprietary), dated August 2007, and WCAP-12610-P-A and CENPD-404-P-A, "Optimized ZIRLO™" (Proprietary), dated July 2006, have demonstrated that predicted chemical, mechanical, and material performance characteristics of the Optimized ZIRLO™ alloy cladding are bounded by those approved for zircaloy under anticipated operational occurrences (AOOs) and postulated accidents. The LFAs shall be placed in non-limiting core regions as required by PVNGS, Unit 3 Technical Specification 4.2.1, "Fuel Assemblies." Also, APS and Westinghouse utilize NRC approved methods for the reload design process for the PVNGS reload cores containing Optimized ZIRLO™ fuel rod cladding. Therefore, the environmental impact, due to the unlikely event of an LFA clad failure, would be minimal and would be bounded by the environmental impacts associated with previous accident analyses.

The details of the NRC staff's safety evaluation will be provided in the exemption that will be issued as part of the letter to the licensee approving the exemption to the regulation.

The proposed action will not significantly increase the probability or consequences of accidents. No changes are being made in the types of effluents that may be released offsite. There is no significant increase in the amount of any effluent released offsite. There is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

Based on the nature of the exemption, the proposed action does not result in changes to land use or water use, or result in changes to the quality or quantity of non-radiological effluents. No changes to the National Pollution Discharge Elimination System permit are needed. No effects on the aquatic or terrestrial habitat in the vicinity of the plant, or to threatened, endangered, or protected species under the Endangered Species Act, or impacts to essential fish habitat covered by the Magnuson-Stevens Act are expected. There are no impacts to the air or ambient air quality. There are no impacts to historic and cultural resources. There would be no noticeable effect on socioeconomic conditions in the region. Therefore, no changes or different types of non-radiological environmental impacts are expected as a result of the proposed action. Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action:

As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources:

The action does not involve the use of any different resources than those previously considered in the Final Environmental Statement for the Palo Verde Nuclear Generating Station, NUREG-0841, dated February 1982.

Agencies and Persons Consulted:

In accordance with its stated policy, on July 8, 2010, the NRC staff consulted with the Arizona State official, Aubrey Godwin of the Arizona Radiation Regulatory Authority regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated November 2, 2009, as supplemented by letter dated May 12, 2010. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1-800-397-4209 or 301-415-4737, or send an e-mail to pdr.resource@nrc.gov.

Dated at Rockville, Maryland, this 17th day of August 2010.

NUCLEAR REGULATORY COMMISSION

Development of U.S. Nuclear Regulatory Commission Safety Culture Policy Statement: Public Meeting

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of public meeting.

SUMMARY: The NRC plans to hold a public meeting on September 28, 2010, in its Las Vegas, Nevada hearing facility to solicit comments on the revision of its draft safety culture policy statement, including the revised definition and traits. The revision has been developed as a result of the NRC staff's evaluation of the public comments submitted in response to the draft policy statement (74 FR 57525, November 6, 2009; ML093030375), the results of the NRC's February 2010 workshop (February workshop) on safety culture, and additional comments that stakeholders and other interested parties have provided to the staff at the various outreach activities that have occurred since February. The draft policy statement focuses on the unique aspects of nuclear safety and security and highlights the Commission's expectations that the policy applies to individuals and organizations performing or overseeing NRC-regulated activities.

As part of the NRC staff's outreach activities which have focused on engaging a broad range of stakeholders including the Agreement States, the NRC held a 3-day Safety Culture Workshop in February 2010 at NRC headquarters in which participants were asked to reach alignment on (1) a common definition of safety culture and (2) high level descriptions or traits of areas important to safety culture. The February workshop also provided an additional venue for interested parties to provide comments on the draft policy statement that had been published in the **Federal Register**. Workshop panelists successfully aligned on a common definition of safety culture and developed a list of traits that they believe exist in a positive safety culture. Following the February workshop, the NRC staff participated in various industry forums in order to obtain

additional input from stakeholders and other interested parties to confirm that the draft definition and traits developed at the February workshop reflect a broad consensus view.

In preparation for the February workshop, the NRC staff noted that some stakeholders and interested parties who reside in the Western half of the US were unable to attend the workshop or participate remotely. Thus, the NRC hearing facility in Las Vegas, Nevada, with its excellent broadcast capabilities was chosen as the site for the upcoming meeting. Additionally, the meeting will be simultaneously broadcast to a location at NRC headquarters in Rockville, Md., and webstreamed so that individuals may participate remotely from their own personal computers (PCs). Please check the following NRC Web sites for any updates to the workshop schedules and/or information regarding this event: <http://www.nrc.gov/public-involve/public-meetings/index.cfm> and/or <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

The goal of the meeting is to provide an opportunity for stakeholders and other interested parties to offer their thoughts on the revised draft policy statement including the revised definition and traits. The revised draft policy statement has benefitted from public comments, the results of the February workshop, and additional comments that stakeholders and other interested parties have provided to the staff at the various outreach activities and will be used to focus much of the discussion at the September meeting. It will be published for a 30-day public comment period prior to the meeting on both the NRC's Safety Culture website at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html> and in the **Federal Register**.

DATES: The meeting is planned for September 28, 2010. Additional information will be available on the NRC Public Meeting Schedule Web site at <http://www.nrc.gov/public-involve/public-meetings/index.cfm> at least ten days prior to the meeting.

Locations: The public meeting will be held at the NRC's hearing facility in Las Vegas, Nevada, and will be simultaneously broadcast to a location at NRC headquarters at 11555 Rockville Pike, Rockville, MD 20852. Additionally, the meeting will be webstreamed so that individuals may participate remotely from their own PCs. Regarding the NRC headquarters' location, because parking is extremely limited, the most convenient

transportation to this location is via Metro's Red Line to the White Flint Station, which is directly across Marinelli Rd. from NRC headquarters. Please allow time at both locations to register with building security upon entering the buildings. The public meeting notice will provide specific details.

Document Accessibility: The documents referenced in this notice are publicly available. **NRC's Public Document Room (PDR):** The public may examine and have copied for a fee, publicly available documents at the NRC's PDR, Public File Area O-1 F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852-2738.

NRC's Agencywide Documents Access and Management System (ADAMS): Publicly available documents created or received at the NRC after November 1, 1999, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this site, the public can gain entry into ADAMS, which provides text and image files of NRC's public documents. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the PDR Reference staff at 1-800-397-4209, 301-415-4737 or by e-mail to pdr.resource@nrc.gov.

FOR FURTHER INFORMATION CONTACT: Jose Ibarra, telephone (301) 415-2581, or by email to Jose.Ibarra@nrc.gov, or Catherine Thompson, telephone (301) 415-3409, or by email to Catherine.Thompson@nrc.gov. Both of these individuals can also be contacted by mail at the U.S. Nuclear Regulatory Commission, Office of Enforcement, Concerns Resolution Branch, Mail Stop O-4 A15A, Washington, DC 20555-0001. Prior to the meeting, attendees are requested to register with one of the contacts listed in the meeting notice, so that sufficient accommodations can be made for their participation. Please let the contact know if special services are necessary, such as services for the hearing impaired, etc.

SUPPLEMENTARY INFORMATION:

1. Purpose of the Public Meeting

The NRC is working towards increasing the attention that is given to safety culture as part of its efforts to ensure the safe and secure possession and use of radioactive material within the NRC's jurisdiction. Additionally, the NRC has been working with the Agreement States to facilitate their consideration and support of this effort in their oversight programs for their materials licensees. The goal of this

meeting is to provide an opportunity for stakeholders and other interested parties to offer their thoughts on the proposed revisions, including the revised definition and traits. The revised draft policy statement, definition and traits have benefitted from public comments, the results of the February workshop, and additional comments that have been provided to the staff at the various outreach activities.

2. Topics of Discussion

The NRC staff is planning to cover the following topics: (1) What is Safety Culture; (2) The NRC's Safety Culture Initiative; (3) The February Workshop; (4) Staff's Review of the Public Comments Received on the November 2009 **Federal Register** Notice; (5) Revisions to the Draft Policy Statement Including the Definition and Traits; (6) Update on INPO's Validation Study; and (7) Questions Regarding Next Steps.

3. Draft Agenda

The meeting is currently planned to begin at 8:30 a.m. and conclude at 4:15 p.m. The agenda will include introductory remarks briefly addressing the draft safety culture policy statement, the revised draft safety culture policy statement which will be published prior to the meeting including how the definition and traits have been revised, and the activities the NRC has engaged in to arrive at this point as well as what the next steps will be. This will be followed by sessions that address the topics provided in section 2 of this notice, in more depth.

Dated at Rockville, Maryland this 17th day of August, 2010.

For the Nuclear Regulatory Commission.

Roy P. Zimmerman,

Director, Office of Enforcement.
