SUPPLEMENTARY INFORMATION:

A. Purpose

When the Government awards a cost-reimbursement construction contract, the contractor must submit to the contracting officer and keep current a chart showing the general executive and administrative organization, the personnel to be employed in connection with the work under the contract, and their respective duties. The chart is used in the administration of the contract and as an aid in determining cost. The chart is used by contract administration personnel to assure the work is being properly accomplished at reasonable prices.

SUPPLEMENTARY INFORMATION:

A. Purpose

Under Federal contracts requiring that equipment (e.g., pumps, fans, generators, chillers, etc.) be installed in a project, the Government must determine that the equipment meets the contract requirements. Therefore, the contractor must submit sufficient data on the particular equipment to allow the Government to analyze the item.

The Government uses the submitted data to determine whether or not the equipment meets the contract requirements in the categories of performance, construction, and durability. This data is placed in the contract file and used during the inspection of the equipment when it arrives on the project and when it is made operable.

SUPPLEMENTARY INFORMATION:

A. Purpose

Federal Acquisition Regulation (FAR) 19.301 and the FAR clause at 52.219-28, Post-Award Small Business Program Rerepresentation implement the Small Business Administration's (SBA's) regulation at 13 CFR 121.404(g), requiring that a concern that initially represented itself as small at the time of its initial offer must recertify its status as a small business under the following circumstances:

- Within thirty days of an approved contract novation;
- Within thirty days in the case of a merger or acquisition, where contract novation is not required; or
- Within 120 days prior to the end of the fifth year of a contract, and no more than 120 days prior to the exercise of any option thereafter.

The implementation of SBA's regulation in FAR 19.301 and the FAR clause at 52.219-28 require that contractors rerepresent size status by updating their representations at the prime contract level in the Representations and Certifications section of the System for Award Management (SAM) and notifying the contracting officer that it has made the required update.

The purpose of implementing small business rerepresentations in the FAR is to ensure that small business size status is accurately represented and reported over the life of long-term contracts. The FAR also provides for provisions designed to ensure more accurate reporting of size status for contracts that are novated, merged or acquired by another business. This information is used by the SBA, Congress, Federal agencies and the general public for various reasons such as determining if agencies are meeting statutory goals, set-aside determinations, and market research.

B. Annual Reporting Burden

Based on information from Federal Procurement Data System (FPDS) regarding rerepresentation modifications, a downward adjustment is being made to the number of respondents. As a result, a downward adjustment is being made to the estimated annual reporting burden since the notice regarding an extension to this clearance published in the **Federal Register** at 77 FR 30265, on May 22, 2012.

Respondents: 1,700.

Responses Per Respondent: 1.

Total Number of Responses: 1,700.

Hours Per Response: 0.5.

Total Burden Hours: 850.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.
