Title: Great Lakes Accountability System.

ICR Numbers: EPA ICR No. 2379.01, OMB Control No. 2005-NEW.

ICR status: This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9 and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: In 2010, EPA, in concert with its Federal partners, will begin implementation of a new Great Lakes Restoration Initiative (GLRI) that was included in the Department of the Interior, Environment, and Related Agencies Appropriations Act, 2010 (Pub. L. 111-88). The GLRI will invest funds in programs and projects strategically chosen to target the most significant environmental problems in the Great Lakes ecosystem.

The legislation calls for increased accountability for the GLRI and directs EPA to implement a process to track, measure, and report on progress. As part of this process, Federal and non-Federal entities receiving GLRI funds will be required to submit detailed information on GLRI projects as part of their funding agreement. Recipients will be required to provide information on the nature of the activity, responsible organization, organizational point of contact, resource levels, geographic location, major milestones and progress toward GLRI goals. The information is necessary to provide an accurate depiction of activities, progress, and results. Information will be updated on a quarterly basis.

A Web-based Great Lakes Accountability System (GLAS) will be the primary mechanism for collecting information on GLRI activities. GLAS will be available at <http://restore.glnpo.net:8080/glas/login.htm>. The Web-site will contain a user-friendly data entry interface for recipients to enter and submit project information directly into the GLAS. The data entry interface consists of a series of screens containing pull-down menus and text boxes, where users can enter project specific information. The GLAS will provide the necessary information for reports to the President and Congress and will be accessible to the public via Internet.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 33 hours per project for State, local and Tribal governments, and 41.1 hours per project for non-governmental organizations. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Great Lakes Restoration Initiative Funding Recipients.

Estimated Number of Respondents: 594 (463 State, local and Tribal governments, 131 non-government organizations).

Frequency of Response: Quarterly.

Estimated Total Annual Hour Burden: 20,663 hours.

Estimated Total Annual Costs: \$1,212,164. This includes an estimated annual labor cost of \$1,212,164.00 and no capital investment or maintenance and operational costs.

Dated: May 3, 2010.

Title: Emissions Guidelines for Commercial and Industrial Solid Waste Incineration Units (Renewal)

ICR Numbers: EPA ICR Number 1927.05, OMB Control Number 2060-0451.

ICR Status: This ICR is scheduled to expire on June 30, 2010. Under OMB regulations, the Agency may continue to

conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Emission Guidelines for Commercial and Industrial Solid Waste Incineration (CISWI) Units were promulgated on December 1, 2000. The guidelines (standards) apply to solid waste incinerators in 40 CFR part 60, subpart DDDD. These standards fulfill the requirements of sections 111 and 129 of the Clean Air Act (CAA). This subpart affects the administrator of an air quality program in a state, or United States protectorate with one or more existing CISWI units that commenced construction either on, or before, November 30, 1999.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 232 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Commercial and industrial solid waste incineration units.

Estimated Number of Respondents: 97.

Frequency of Response: Initially, occasionally, semiannually and annually.

Estimated Total Annual Hour Burden: 31,619.

Estimated Total Annual Cost: \$2,904,577, which includes \$2,884,110 in labor costs, no capital/startup costs, and \$20,467 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the cost to the respondents in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the respondents is very low, negative or non-existent. Therefore, the cost figures in the previous ICR reflect the current burden to the respondents and are reiterated in this ICR. However, there is a decrease of one hour in the total labor hours to the respondent in this ICR due to rounding.

In accordance with the Paperwork Reduction Act, actions related to case development activities have been removed from the Agency cost figures. Therefore, the cost to the Agency as reported in this ICR has been reduced from \$87,648.00 to \$46,463.00

Dated: May 4, 2010.
