DEPARTMENT OF COMMERCE**Bureau of the Census**

[Docket Number 151008932–5932–01]

Streamlining Summary Level 070 Tables in the 5-Year American Community Survey

AGENCY: Bureau of the Census, Commerce.

ACTION: Notice of Final Program.

SUMMARY: The Census Bureau hereby announces that it will streamline the production and release of American Community Survey (ACS) Summary Level 070 tables (state/county/county subdivision/place remainder (or part)) to the 15 tables necessary for the delineation of metropolitan, micropolitan, and related statistical areas as defined by the Office of Management and Budget (OMB). The ACS collects detailed demographic, social, economic, and housing data from about 3.5 million addresses in the United States and 36,000 in Puerto Rico each year. Annual data products are released in the form of 1-Year and 5-Year estimates with 5-Year estimates being produced for over 578,000 geographies by 87 different summary levels. Most summary levels and their corresponding geographies are then produced for approximately 1,000 detailed tables. As a cost-saving measure and to improve the usability of the estimates, the Census Bureau has decided to streamline the production and release of Summary Level 070 tables to the 15 tables necessary for delineation. Based on data user analytics, customer feedback, and responses from an earlier **Federal Register** Notice (June 5, 2015; 80 FR 32084) soliciting comments on the streamlining of the summary level, we believe that the streamlining of this summary level will not have a significant impact to our data users. Therefore, beginning in December 2015, the Census Bureau will be tabulating and releasing only those 15 tables for Summary Level 070 that are necessary for the delineation of metropolitan, micropolitan, and related statistical
