

anticipated to continue decreasing due to the significant decline of CFC-12 vehicles on road. The third reason the burden hours have decreased is that there are less approved technician certification programs in business than in the previous ICR. However, EPA anticipates a slow increase of one organization approval per year as new alternative refrigerants become available and new businesses become interested in certifying technicians for MVAC servicing for consideration.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
