DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP14-104-000]

Texas Eastern Transmission, LP; Notice of Intent To Prepare an Environmental Assessment for the Proposed Uniontown to Gas City Project and Request for Comments on Environmental Issues

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Uniontown to Gas City Project (Project) involving construction and operation of facilities by Texas Eastern Transmission, LP (Texas Eastern) in Pennsylvania, Ohio and Indiana. The Commission will use this EA in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies on the Project. Your input will help the Commission staff determine what issues they need to evaluate in the EA. Please note that the scoping period will close on May 29, 2014.

You may submit comments in written form or verbally. Further details on how to submit written comments are in the Public Participation section of this notice.

This notice is being sent to the Commission's current environmental mailing list for this Project. State and local government representatives should notify their constituents of this proposed Project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the Commission approves the Project, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings where compensation would be determined in accordance with state law.

Texas Eastern provided landowners with a fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need

To Know?" This fact sheet addresses a number of typically-asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is also available for viewing on the FERC Web site (www.ferc.gov).

Summary of the Proposed Project

The purpose of the Project is to make new firm pipeline capacity available to transport production of five shippers that have executed precedent agreements with Texas Eastern. It would allow additional natural gas from the Appalachian production area to be transported to markets in the Midwest. This would be accomplished by modifying 23 existing aboveground facilities along Texas Eastern's system. These facilities include:

- In Greene County, Pennsylvania, modifications at the Waynesburg Compressor Station would include new sample lines at the 70009 meter and regulator (M&R) station and 70037 M&R station, a new gas chromatograph/electronic gas measurement (GC/EGM) building, removal of a deanalyzer building, and a new GC sample line at the Waynesburg Suction; new GC/EGM buildings at the 70020 and 73152 M&R station, and gas turbine modifications at the existing Holbrook Compressor Station;
- in Monroe County, Ohio, a new GC and Remote Terminal Units (RTU) at the 70983 and 70471 M&R Stations, and a new launcher/receiver and filter separator at the Berne Compressor Station;
- in Noble County, Ohio, a new launcher/receiver at the Summerfield Compressor Station, and new receiver on Somerset Line 65;
- in Perry County, Ohio, new launcher/receiver at the Coserset Compressor Station;
- in Fairfield County, Ohio, a new GC building at the 73715 and 70077 M&R Stations;
- in Pickaway County, Ohio, a new crossover and receiver at the Five Points Line 1, and gas turbine modifications at the Five Points Compressor Station;
- in Fayette County, Ohio, new receiver at the Lebanon Discharge Line 1 and new GC at the 70081 M&R Station;
- in Clinton County, Ohio, a new GC at the 73105 M&R Station;
- in Warren County, Ohio, gas turbine modifications at the Lebanon Compressor Station, a new GC building at 70041 M&R Station, reversal modifications at the 72945 M&R Station, a new GC/RTU building at 72908 M&R Station, and a new GC at 71353 M&R Station;
