SUPPLEMENTARY INFORMATION:**I. Background**

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107-296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS) and its components and offices have relied on preexisting Privacy Act

systems of records notices for the collection and maintenance of records that concern asset management with regards to any employee or contractor who has been assigned DHS property.

As part of its efforts to streamline and consolidate its records systems, DHS is establishing a consolidated system of records under the Privacy Act (5 U.S.C. 552a) for the DHS asset management records. This will ensure that all components of DHS follow the same privacy rules for collecting and handling asset management records. The collection and maintenance of asset management information assists DHS in meeting its obligation to manage Departmental assets assigned to employees, such as computers, telephones, or other assets.

In accordance with the Privacy Act of 1974, DHS is giving notice that it proposes to consolidate four legacy record systems: Justice/INS-004 The Asset Management Information System (AMIS) (67 FR 64136 October 17, 2002), FEMA/ADM-2 Office Services File System (55 FR 37182 September 7, 1990), Treasury/CS.044 Certificates of Clearance (66 FR 52984 October 18, 2001), and Treasury/CS.201 Property File Non-Expendable (66 FR 52984 October 18, 2001) into one DHS-wide system of records. DHS also proposes to partially consolidate one legacy record system: Treasury/USSS.001 Administrative Information System (66 FR 45362 August 28, 2001) into this DHS-wide system of records. This system will allow DHS collect and maintain records of all Department-owned or controlled property that has been issued to current and former DHS employees and contractors. Categories of individuals, categories of records, and the routine uses of these legacy system of records notices have been consolidated and updated to better reflect the Department's asset management record systems. This consolidated system, titled Asset Management, will be included in DHS's inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the

individual. In the Privacy Act, an individual is defined to encompass United States citizens and legal permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses to which of their records, and to assist individuals to more easily find such files within the agency. Below is the description of the Asset Management System of Records.

BILLING CODE 4410-10-P

**DEPARTMENT OF HOMELAND
SECURITY****Federal Emergency Management
Agency****Availability of Flood Hazard Maps and
Data**

AGENCY: Federal Emergency
Management Agency, DHS.

ACTION: Notice.

SUMMARY: The Federal Emergency Management Agency (FEMA) is completing the update and conversion to digital of the National Flood Insurance Program flood hazard map inventory. As part of the Flood Map Modernization Program, FEMA will discontinue the public distribution of paper Flood Insurance Rate Maps, Flood Insurance Study reports, and related flood hazard map products.

FEMA will provide communities where the flood hazard information is updated with an updated paper map to satisfy local regulatory requirements for a paper map product.

For all other requests, FEMA will distribute digital Flood Insurance Rate Maps, Flood Insurance Study reports, and related flood hazard map products in place of the paper versions. Over the past several years, FEMA has transitioned from paper maps to digital map images and digital flood hazard data as the primary flood hazard information products. These products will still be available through the FEMA Map Service Center. This change will reduce duplication of effort and reduce the cost for updating flood hazard maps.

DATES: This change is effective as of October 1, 2009.

ADDRESSES: Information about FEMA Flood Hazard Maps and Data is available on the Map Service Center Web site <http://msc.fema.gov>.

FOR FURTHER INFORMATION CONTACT: Paul Rooney, Data and Dissemination Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (paul.rooney@dhs.gov).

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) is responsible for identifying

high risk flood areas to support the National Flood Insurance Program (NFIP). These areas have historically been identified on paper Flood Insurance Rate Maps (FIRMs). Over the past several years, FEMA has introduced new digital products including digital map images (the full size FIRM Scans and letter size FIRMettes) and digital geospatial flood hazard data (the Digital Flood Insurance Rate Map (DFIRM) Database product and National Flood Hazard Layer (NFHL)). These digital products now make up the vast majority of the flood hazard information distributed by FEMA and are equivalent to the paper maps for any official activities under the NFIP.

FEMA will continue to provide local governments a paper copy of their flood hazard map and flood insurance study report when the map is updated by FEMA. FEMA will discontinue all other distribution of paper maps and study reports beginning with map update projects where the letter of final determination is issued on or after October 1, 2009. The letter of final determination is issued six months before new flood maps become effective for NFIP regulatory purposes.

FEMA will continue to provide digital flood hazard data products for Internet download, on CD-ROM, and via Web Mapping Service. Federal, State, and local government customers that have been receiving paper products will now receive digital flood hazard maps and data, and continue to be exempt from fees (specified in 42 U.S.C. 4101).

This change will allow FEMA to realize significant cost savings in the map update process by eliminating the need to generate large format film negatives to support offset printing. It will also save the cost of printing and distributing the paper maps to fee exempt customers. This change simplifies the products available depicting flood hazard for a location.

The FEMA Map Service Center provides complete information about the digital flood hazard data products, free tools, and easy-to-follow instructions for using them at <http://msc.fema.gov>.
