

III. What action is the agency taking?

This notice announces receipt by EPA of a request from a registrant to cancel certain methyl parathion product

registrations. The affected products and the registrant making the request are identified in Tables 1 and 2 of this unit.

Unless a request is withdrawn by the registrant or if the Agency determines

that there are substantive comments that warrant further review of this request, EPA intends to issue an order canceling the affected registrations.

IV. What is the agency's authority for taking this action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**.

Section 6(f)(1)(B) of FIFRA requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation or use termination. In addition, FIFRA section 6(f)(1)(C) requires that EPA provide a 180-day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless:

1. The registrants request a waiver of the comment period, or
2. The EPA Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

The methyl parathion registrant has requested that EPA waive the 180-day comment period. Accordingly, EPA will provide a 30-day comment period on the proposed requests.

V. Procedures for Withdrawal of Requests

Registrants who choose to withdraw a request for product cancellation or use deletion should submit the withdrawal

in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**.

VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products that are currently in the United States and that were packaged, labeled, and released for shipment prior to the effective date of the action. If the request for voluntary cancellation is granted, the Agency intends to publish the cancellation order in the **Federal Register**.

As specified in the MOA, registrants are prohibited from selling and distributing end-use products as of December 31, 2012. Persons other than the registrants are permitted to sell or distribute end-use products prior to August 31, 2013. All sales and distributions of end-use products shall be prohibited as of August 31, 2013, except for exports consistent with section 17 of FIFRA or for proper disposal. Additionally, all use of existing stocks of the end-use products shall be prohibited as of December 31, 2013.

There is no change in the Commission's reporting requirements. There is no change in the Commission's burden estimates.

The Commission sought emergency clearance for this information collection on June 1, 2010. Emergency OMB approvals are only granted for six months. The Commission received OMB approval for the emergency request on June 17, 2010. The Commission is now renewing the OMB approval for this information collection.

FCC 10-79, PS Docket No. 06-229, the Commission grants, with conditions, 21 waiver petitions filed by public safety entities (Petitioners) seeking early deployment of statewide or local public safety broadband networks in the 700 MHz spectrum. This waiver serves the public interest by allowing state and local jurisdictions to begin broadband deployment and speed services to the public safety community. This will also allow the Petitioners to take advantage of available or potential funding, either through grants or planned budgetary expenditures, as well as to take advantage of economies of scale and other cost saving measures for deployments that are already planned. In addition, Petitioners could benefit from the announced plans of some commercial carriers to begin construction of LTE-based networks this year and early next year, which would result in significant cost-savings.

One of the conditions for such waiver is submission of interoperability plans to the Commission's Emergency Response Interoperability Center (ERIC). The Commission recently decided to establish ERIC to promote appropriate technical requirements that will ensure interoperability for these early deployments from their inception, as well as for any future deployed networks. Given the rapidly evolving nature of 3GPP deployments and standards, submission of the Petitioners' interoperability plans will help ensure interoperability and roaming among these early deployments. See the June 30, 2010 notice that was published at 75

FR 37800 for more details on the various requirements for state, local or tribal government.

This information will be used by FCC staff to facilitate deployment of state and local public safety broadband networks as an initial step towards development of a nationwide, interoperable public safety broadband network. Accurate recordkeeping of this data is vital in developing the regulatory framework for this network. Since such a network is vital for public safety and homeland security, its proper operation must be assured.

Federal Communications Commission.
