

the marine mammal moves outside these designated zones or the animal is not detected within 15 minutes of the last sighting; (2) if a marine mammal is detected within or approaching 200 m prior to chipping, this activity shall be immediately delayed or suspended until the marine mammal moves outside these designated zones or the animal is not detected within 15 minutes of the last sighting; (3) in-water impact pile driving shall not occur during the period from two hours before low tide until two hours after low tide; (4) in-water piles will be driven with a vibratory hammer to the maximum extent possible (i.e., until a desired depth is achieved or to refusal) prior to using an impact hammer; (5) in-water pile driving or chipping shall not occur when conditions restrict clear, visible detection of all waters within harassment zones; (6) A "soft start" technique shall be used at the beginning of each day's in-water pile driving activities or if pile driving has ceased for more than one hour to allow any marine mammal that may be in the immediate area to leave before pile driving reaches full energy; (7) if a group of more than 5 beluga whales or group with a calf is sighted within the Level B harassment isopleths, in-water pile driving shall be suspended; and (8) for operated in-water heavy machinery work other than pile driving or chipping (i.e., dredging, dump scowles, linetug boats used to move barges, barge mounted hydraulic excavators, or clamshell equipment used to place or remove material), if a marine mammal comes within 50 m, those operations will cease and vessels will reduce to the slowest speed practicable while still maintaining control of the vessel and safe working conditions.

NMFS-approved marine mammal observers (MMOs) will be stationed at the port during all in-water pile driving and chipping and blasting associated with dock demolition, if it occurs. These observers will be responsible for documenting take, marine mammal behavior, and, if necessary, notifying the resident engineer when shut down is necessary. In addition, the POA and MARAD shall employ a scientific marine mammal monitoring team separate from the on-site MMOs to characterize beluga whale abundance, frequency, movements, behavior, group dynamics, and habitat use around the POA and observe, analyze, and document potential changes in behavior in response to in-water construction work. This monitoring team is not required to be present during all in-water pile driving operations but will be

on-site 4 days per week, weather permitting. The on-site MMOs and this marine mammal monitoring team shall remain in contact to alert each other to marine mammal presence when both teams are working.

The POA and MARAD shall submit monthly reports summarizing all in-water construction activities and marine mammal sightings. In addition, an annual report shall be due sixty days before expiration of the LOA. This report shall summarize monthly reports and any apparent long or short term impacts the MTRP may be having on marine mammals. This LOA will be renewed annually based on review of the annual monitoring report.

Authorization

The POA and MARAD have complied with the requirements of the 2009 LOA, and NMFS has determined that marine mammal take during the 2009 construction season is within the amount authorized. Accordingly, NMFS has issued a LOA to POA and MARAD authorizing take by harassment of marine mammals incidental to the marine terminal redevelopment project at the POA. Issuance of the 2010–2011 LOA is based on NMFS' review of the annual report submitted by the POA and MARAD, and determination that the observed impacts were within the scope of the analysis and authorization contained in the final rule and previously issued LOA. Specifically, NMFS found that the total taking of marine mammals, in consideration of the required mitigation, monitoring, and reporting measures, will have no more than a negligible impact on the affected species or stocks and will not have an unmitigable adverse impact on their availability for taking for subsistence uses.
