Title: NO_x Budget Trading Program to Reduce the Regional Transport of Ozone (Renewal).

ICR numbers: EPA ICR No. 1857.05, OMB Control No. 2060-0445.

ICR Status: This ICR is scheduled to expire on September 30, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it

displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The NO_x Budget Trading Program is a market-based cap and trade program created to reduce emissions of nitrogen oxides (NO_x) from power plants and other large combustion sources in the eastern United States. NO_x is a prime ingredient in the formation of ground-level ozone (smog), a pervasive air pollution problem in many areas of the eastern United States. The NO_x Budget Trading Program was designed to reduce NO_x emissions during the warm summer months, referred to as the ozone season, when ground-level ozone concentrations are highest. In 2009 the program was replaced by the Clean Air Interstate Rule Ozone Season Trading Program (CAIROS). Although the trading program was replaced after the 2008 compliance season, this information collection is being renewed for two reasons. First, some industrial sources in certain States are still required to monitor and report emissions data to EPA under these rules, so we will account for their burden. Second, the Agency may at some future time, reinstitute the NO_x Budget Trading Program. For example, this might happen if both the Clean Air Interstate Rule (CAIR) and CAIR replacement rules were vacated by the Court. All data received by EPA will be treated as public information.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 136 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information;

search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Electric utilities, industrial sources, and other persons.

Estimated Number of Respondents: 122.

Frequency of Response: Yearly, quarterly, occasionally.

Estimated Total Annual Hour Burden: 57,586.

Estimated Total Annual Cost: \$7,466,951, which includes \$3,777,000 annualized capital and O&M costs.

Changes in the Estimates: There is a decrease of 414,148 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. Previous iterations of this ICR included a larger number of affected sources and burdens associated with program implementation that are now covered under several different ICR's including the Clean Air Interstate Rule (CAIR) (OMB Control Number 2060-0570) and the Air Emissions Reporting Rule (AERR) (OMB Control Number 2060-0580).

Dated: September 17, 2010.

B. What Should I Consider as I Prepare My Comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through www.regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that

includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for preparing your comments.** When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. **Follow directions.** The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- vi. Provide specific examples to illustrate your concerns and suggest alternatives.
- vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- viii. Make sure to submit your comments by the comment period deadline identified.

3. **Environmental justice.** EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low-income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticides discussed in this document, compared to the general population.

II. What Action is the Agency Taking?

EPA is announcing its receipt of several pesticide petitions filed under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, proposing the establishment or modification of regulations in 40 CFR part 174 or part 180 for residues of pesticide chemicals in or on various food commodities. EPA has determined

that the pesticide petitions described in this notice contain the data or information prescribed in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the pesticide petitions. Additional data may be needed before EPA can make a final determination on these pesticide petitions.

Pursuant to 40 CFR 180.7(f), a summary of each of the petitions that are the subject of this notice, prepared by the petitioner, is included in a docket EPA has created for each rulemaking. The docket for each of the petitions is available on-line at <http://www.regulations.gov>.

As specified in FFDCA section 408(d)(3), (21 U.S.C. 346a(d)(3)), EPA is publishing notice of the petition so that the public has an opportunity to comment on this request for the establishment or modification of regulations for residues of pesticides in or on food commodities. Further information on the petition may be obtained through the petition summary referenced in this unit.

New Tolerances

M.L., Calle 18 N° 20501, Colonia Impulso, C.P. 31183, Chihuahua, Chih., Mexico, proposes to establish tolerance in 40 CFR part 180 for residues of the fungicide oxytetracycline, in or on cucurbits, crop group 9; and fruiting vegetables, crop group 8 at 0.03 parts per million (ppm). An analytical method was developed and used to quantitate residues of oxytetracycline by using liquid chromatography mass spectrometry/mass spectrometry (LC/MS/MS) detection. The limits of quantitation (LOQs), in all matrices, were 0.028 ppm for oxytetracycline (as base). The limit of detection (LOD), in all matrices, was defined as 0.0093 ppm for oxytetracycline, as base (1/3 or LOQ). This method is available for enforcement purposes with a LOD that allows monitoring of food with residues at or above the levels set in these tolerances. New Tolerance Exemptions

1. *PP 0E7727*. (EPA-HQ-OPP-2010-0703). Interregional Research Project Number 4 (IR-4) Project Headquarters, Rutgers, The State University of New Jersey, 500 College Road East, Suite 201 W, Princeton, NJ 08450, on behalf of Koppert Biological Systems, Inc., 28465 Beverly Road, Romulus, MI 48174, proposes to establish an exemption from the requirement of a tolerance for residues of lactoperoxidase (CAS No. 9003-99-0) under 40CFR 180.920 in or on all raw agricultural commodities when used pre-harvest as a pesticide inert ingredient in pesticide formulations of the active ingredients potassium iodide and potassium thiocyanate. Since it is proposed that lactoperoxidase be exempt from the requirement for a tolerance, no analytical method is necessary. Contact: Deirdre Sunderland, (703) 603-0851, e-mail address: sunderland.deirdre@epa.gov.

2. *PP 0E7753*. (EPA-HQ-OPP-2010-0733). The Law Offices of Walter G. Talarek, P.C., 1008 Riva Ridge Drive, Great Falls, VA 22066-1620 as the U. S. agent on behalf of Innospec Limited, Innospec Manufacturing Park, Oil Sites Road, Ellesmere Port, Cheshire CH65 4EY, United Kingdom, proposes to establish an exemption from the requirement of a tolerance for residues

of [S,S]-ethylenediamine disuccinic acid tri-sodium salt (hereafter referred to as EDDS) (CAS No. 178949–82–1) under 40 CFR 180.910 when used in accordance with good agricultural practices as a pesticide inert ingredient in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest. An analytical method has not been proposed because EDDS residues harmful to plants and animals is highly unlikely to occur when it is applied as part of the proposed pesticide formulation and according to that formulation's label directions for use.
