License or Registration Status
Effective Date
Expiration Date
AMC Type (State or multi-State)
Disciplinary Action

States listing AMCs on the AMC Registry enter the above information for each AMC for the initial entry only. After the initial entry, the information is retained on the AMC Registry, and will only need to be amended if necessary by the State. Currently 51 States have elected to register and supervise AMCs with 39 States currently entering data in the AMC Registry.

Proposed Project

Examining Safety and Health Among Aviation Industry Workers in Alaska: A Survey—New—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The mission of the National Institute for Occupational Safety and Health (NIOSH) is to promote safety and health at work for all people through research and prevention. The Occupational Safety and Health Act, 91 (section 20[a] [1]), authorizes NIOSH to conduct research to advance the health and safety of workers.

The Alaska Department of Labor and Workforce Development received over 320,000 reports of occupational injury or illness which cost more than \$3 billion in workers' compensation benefits from 2000–2013. Maintenance technicians and ramp/baggage/cargo/dock agents made up the largest number of claims from the aviation industry. Among these workers, the most frequently observed injury event was overexertion/bodily reaction, which most often led to sprains, strains, and tears.

NIOSH is proposing to update findings from a NIOSH-funded survey conducted in Alaska during 2001–2002 on attitudes and practices of pilots and aviation operators. This project is part of a larger National Occupational Research Agenda project “Improving Safety in the Commercial Aviation Industry in Alaska” which includes a survey of aviation workers in Alaska using
