**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

The Department of Health and Human Services (HHS) may disclose information from this system of records to the Department of Justice, or to a court or other tribunal, when (a) HHS, or any component thereof; or (b) any HHS employee in his or her official capacity; or (c) any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or (d) the United States or any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components, is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, court or other tribunal is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

Disclosure may be made to contractors and staff to monitor library material, services, circulation control; to provide user documentation; and to process or refine the records. Recipients are required to maintain Privacy Act safeguards with respect to those records.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:****STORAGE:**

Records are stored on computer tape and disk, paper and file cards.

**RETRIEVABILITY:**

Records are retrieved by name, user code and/or identification number.

**SAFEGUARDS:**

1. *Authorized Users:* Employees who maintain records in this system are instructed to grant regular access only to Library staff members who need to verify that Library identification cards have been issued to those Library users requesting services such as reference and interlibrary loans. Other one-time and special access by other employees is granted on a need-to-know basis as

specifically authorized by the system manager. The contractor maintains a list of personnel having authority to access records to perform their duties.

2. *Physical Safeguards:* The offices housing the cabinets and file drawers for storage of records are locked during all library off-duty hours. During all duty hours offices are attended by employees who maintain the files. The contractor has secured records storage areas which are not left unattended during the working hours and file cabinets which are locked after hours.

3. *Procedural Safeguards:* Access to the file is strictly controlled by employees who maintain the files. Records may be removed from files only at the request of the system manager or other authorized employees. Access to computerized records is controlled by the use of security codes known only to authorized users. Contractor personnel receive instruction concerning the significance of safeguards under the Privacy Act.

These practices are in compliance with the standards of Chapter 45-13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45-13, and the HHS Automated Information Systems Security Program Handbook.

**SAFEGUARDS:**

A variety of safeguards is implemented for the various sets of records included under this system according to the sensitivity of the data they contain.

1. *Authorized Users:* NIH administrative and personnel staff screened by FIC staff to access information on a need-to-know basis. Only FIC staff are authorized to add, change, or delete data. These practices are in compliance with the standards of Chapter 45–13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45–13, and the HHS Automated Information Systems Security Program Handbook.

**RETENTION AND DISPOSAL:**

Records are retained and disposed of under the authority of the NIH Records Control Schedule contained in NIH Manual Chapter 1743, Appendix 1—"Keeping and Destroying Records" (HHS Records Management Manual, Appendix B–361), item 2300–320, which allows records to be destroyed after a maximum period of six years after the close of a case. Subject individuals and other Federal agencies.

**SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:**

None.

**09–25–0156**

**SYSTEM NAME:**

Records of Participants in Programs and Respondents in Surveys Used to Evaluate Programs of the Public Health Service, HHS/PHS/NIH/OD.

**SECURITY CLASSIFICATION:**

None.

**SYSTEM LOCATION:**

This system of records is an umbrella system comprising separate sets of records located either in the organizations responsible for conducting evaluations or at the sites of programs or activities under evaluation. Locations include Public Health Service (PHS) facilities, or facilities of contractors of the PHS. Write to the appropriate System manager below for a list of current locations.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Individuals covered by this system are those who provide information or opinions that are useful in evaluating programs or activities of the PHS other persons who have participated in or benefitted from PHS programs or activities; or other persons included in evaluation studies for purposes of comparison. Such individuals may include (1) participants in research studies; (2) applicants for and recipients of grants, fellowships, traineeships or other awards; (3) employees, experts

and consultants; (4) members of advisory committees; (5) other researchers, health care professionals, or individuals who have or are at risk of developing diseases or conditions studied by PHS; (6) persons who provide feedback about the value or usefulness of information they receive about PHS programs, activities or research results; (7) persons who have received Doctorate level degrees from U.S. institutions; (8) persons who have worked or studied at U.S. institutions that receive(d) institutional support from PHS.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

This umbrella system of records covers a varying number of separate sets of records used in different evaluation studies. The categories of records in each set depend on the type of program being evaluated and the specific purpose of the evaluation. In general, the records contain two types of information: (1) Information identifying subject individuals, and (2) information which enables PHS to evaluate its programs and services.

1. Identifying information usually consists of a name and address, but it might also include a patient identification number, grant number, social security number, or other identifying number as appropriate to the particular group included in an evaluation study.

2. Information used for evaluation varies according to the program evaluated. Categories of evaluative information include personal data and medical data on participants in clinical and research programs; personal data, publications, professional achievements and career history of researchers; and opinions and other information received directly from individuals in evaluation surveys and studies of PHS programs.

The system does not include any master list, index or other central means of identifying all individuals whose records are included in the various sets of records covered by the system.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

Authority for this system comes from the authorities regarding the establishment of the National Institutes of Health, its general authority to conduct and fund research and to provide training assistance, and its general authority to maintain records in connection with these and its other functions (42 U.S.C. 203, 241, 2891–1 and 44 U.S.C. 3101), and Section 301 and 493 of the Public Health Service Act.

**PURPOSE(S):**

This system supports evaluation of the policies, programs, organization, methods, materials, activities or services used by PHS in fulfilling its legislated mandate for (1) conduct and support of biomedical research into the causes, prevention and cure of diseases; (2) support for training of research investigators; (3) communication of biomedical information.

This system is not used to make any determination affecting the rights, benefits or privileges of any individual.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

1. Disclosure may be made to HHS contractors and collaborating researchers, organizations, and State and local officials for the purpose of conducting evaluation studies or collecting, aggregating, processing or analyzing records used in evaluation studies. The recipients are required to protect the confidentiality of such records.

2. Disclosure may be made to organizations deemed qualified by the Secretary to carry out quality assessments, medical audits or utilization review.

3. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

4. The Department may disclose information from this system of records to the Department of Justice, to court or other tribunal, or to another party before such tribunal, when (a) HHS, or any component thereof; or (b) any HHS employee in his or her official capacity; or (c) any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or (d) the United States or any agency thereof where HHS or any of its components, is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the tribunal, or the other party is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:****STORAGE:**

Data may be stored in file folders, bound notebooks, or computer-accessible media (e.g., magnetic tapes, disks, cartridges, CD-ROMs, etc.).

**RETRIEVABILITY:**

Information is retrieved by name and/or participant identification number within each evaluation study. There is no central collection of records in this system, and no central means of identifying individuals whose records are included in the separate sets of records that are maintained for particular evaluation studies.

**SAFEGUARDS:**

A variety of safeguards are implemented for the various sets of records in this system according to the sensitivity of the data each set contains. Information already in the public domain, such as titles and dates of publications, is not restricted. However, sensitive information, such as personal or medical history or individually identified opinions, is protected according to its level of sensitivity. Records derived from other systems of records will be safeguarded at a level at least as stringent as that required in the original systems. Minimal safeguards for the protection of information which is not available to the general public include the following:

1. *Authorized Users:* Regular access to information in a given set of records is limited to PHS or to contractor employees who are conducting, reviewing or contributing to a specific evaluation study. Other access is granted only on a case-by-case basis, consistent with the restrictions required by the Privacy Act (e.g., when disclosure is required by the Freedom of Information Act), as authorized by the system manager or designated responsible official.

2. *Physical Safeguards:* Records are stored in closed or locked containers, in areas which are not accessible to unauthorized users, and in facilities which are locked when not in use. Records collected in each evaluation project are maintained separately from those of other projects. Sensitive records are not left exposed to unauthorized persons at any time. Sensitive data in machine-readable form may be encrypted.

3. *Procedural Safeguards:* Access to records is controlled by responsible employees and is granted only to authorized individuals whose identities are properly verified. Data stored in

mainframe computers is accessed only through the use of keywords known only to authorized personnel. When personal computers are used, magnetic media (e.g. diskettes, CD-ROMs, etc.) are protected as under Physical Safeguards. When data is stored within a personal computer (i.e., on a "hard disk"), the machine itself is treated as though it were a record, or records, under Physical Safeguards. Contracts for operation of this system of records require protection of the records in accordance with these safeguards; PHS project and contracting officers monitor contractor compliance.

These practices are in compliance with the standards of Chapter 45-13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45-13, and the HHS Automated Information Systems Security Program Handbook.

**RETENTION AND DISPOSAL:**

Records are retained and disposed of under the authority of the NIH Records Control Schedule contained in NIH Manual Chapter 1743, Appendix 1—"Keeping and Destroying Records" (HHS Records Management Manual, Appendix B-361), item 1100-C-2. Refer to the NIH Manual Chapter for specific disposition instructions.

An individual who requests notification of or access to a medical record shall, at the time the request is made, designate in writing, a responsible representative, who may be a physician, other health professional, or other responsible individual, who will be willing to review the record and inform the subject individual of its contents at the representative's discretion.

A parent or guardian who requests notification of, or access to, a child's or incompetent person's medical record shall designate a family physician or other health professional (other than a family member) to whom the record, if any, will be sent. The parent or guardian must verify relationship to the child or incompetent person as well as his or her own identity.

#### **RECORD ACCESS PROCEDURE:**

Same as Notification Procedures. Requesters should also reasonably specify the record contents being sought. Individuals may also request listings of accountable disclosures that have been made of their records, if any.

2. Disclosure may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office

made at the written request of the individual.

3. Disclosure may be made to the HHS contractor for the purpose of collating, analyzing, aggregating or otherwise refining or processing records in this system for developing, modifying and/or manipulating ADP software. The contractor shall be required to maintain Privacy Act safeguards with respect to such records.

4. A record may be disclosed for a research purpose, when the Department: (A) Has determined that the use or disclosure does not violate legal or policy limitations under which the record was provided, collected, or obtained; (B) Has determined that the research purpose (1) cannot be reasonably accomplished unless the record is provided in individually identifiable form, and (2) warrants the risk to the privacy of the individual that additional exposure of the record might bring; (C) Has required the recipient to (1) establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, (2) remove or destroy the information that identifies the individual at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient has presented adequate justification of a research or health nature for retaining such information, and (3) make no further use or disclosure of the record except (a) in emergency circumstances affecting the health or safety of any individual, (b) for use in another research project, under these same conditions, and with written authorization of the Department, (c) for disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or (d) when required by law; (D) Has secured a written statement attesting to the recipients understanding of, and willingness to abide by these provisions.

Records may be disclosed to student volunteers, individuals working under a personal services contract, and other individuals performing functions for PHS who do not technically have the status of agency employees, if they need the records in the performance of their agency functions.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Electronic medium; selected hard copy backup.

**RETRIEVABILITY:**

Information will be retrieved by patient identification number such as social security number and CMS beneficiary ID. Individual patient data provided only as noted above. Statistical data provided as noted above and to the general public as part of periodic published reports.

**SAFEGUARDS:**

A variety of safeguards are implemented for the various sets of records in this system according to the sensitivity of the records:

1. *Authorized Users:* Regular access is limited to National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), CMS and contract personnel who have a need for the data in performance of their duties as determined by the system manager.

2. *Physical Safeguards:* Records are stored in areas where access is restricted to areas where data are maintained and processed; data tapes and hard copy data are stored in locked files in secured areas; terminal access controlled by user ID and keywords; off-site data backups in two locations—a remote area of the same building and a separate building; and fire protection secured by Halon fire extinguisher system and fire alarm system present in the computer room.

3. *Procedural Safeguards:* Contractors who maintain records in this system are instructed to make no further disclosure of the records except as authorized by the system manager and permitted by the Privacy Act.

Privacy Act requirements are specifically included in contracts and in agreements with grantees or collaborators participating in research activities supported by this system. HHS project directors, contract officers, and project officers oversee compliance with these requirements.

These practices are in compliance with the standards of Chapter 45–13 of the HHS General Administration Manual, “Safeguarding Records Contained in Systems of Records,” supplementary Chapter PHS hf: 45–13, and the HHS Automated Information Systems Security Program Handbook.

**RETENTION AND DISPOSAL:**

6. A record may be disclosed for a research purpose, when the Department: (A) Has determined that the use or disclosure does not violate legal or policy limitations under which the record was provided, collected, or obtained; (B) has determined that the research purpose (1) cannot be reasonably accomplished unless the record is provided in individually identifiable form, and (2) warrants the risk to the privacy of the individual that additional exposure of the record might bring; (C) has required the recipient to (1) establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, (2) remove or destroy the information that identifies the individual at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient has presented adequate justification of a research or health nature for retaining such information, and (3) make no further use or disclosure of the record except (a) in emergency circumstances affecting the health or safety of any individual, (b) for use in another research project, under these same conditions, and with written authorization of the Department, (c) for disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit,

or (d) when required by law; (D) has secured a written statement attesting to the recipient's understanding of, and willingness to abide by these provisions.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:****STORAGE:**

Records are maintained in file cabinets or in computer databases maintained by the RSB and OSHB. Records may be stored in file folders, binders, magnetic tapes, magnetic disks, optical disks and/or other types of data storage devices.

**RETRIEVABILITY:**

Records are retrieved by name, social security number, office address, or unique RSB or OSHB assigned identification number.

**SAFEGUARDS:**

1. *Authorized Users:* Employees who maintain this system are instructed to grant regular access only to RSB/OSHB staff, authorized contractor personnel, U.S. Nuclear Regulatory Commission Inspectors, Radiation Safety Committee Members, Biosafety Committee members, and other appropriate NIH administrative and management personnel with a need to know. Access to information is thus limited to those with a need to know.

2. *Physical Safeguards:* Rooms where records are stored are locked when not in use. During regular business hours, rooms are unlocked but are controlled by on-site personnel. Individually identifiable records are kept in locked file cabinets or rooms under the direct control of the Project Director.

3. *Procedural Safeguards:* Names and other identifying particulars are deleted when data from original records are encoded for analysis. Data stored in computers is accessed through the use of keywords known only to authorized users. All users of personal information in connection with the performance of their jobs (see Authorized Users, above) will protect information from public view and from unauthorized personnel entering an unsupervised office. The computer terminals are in secured areas and keywords needed to access data files will be changed frequently.

4. *Additional RSB Technical Safeguards:* Computerized records are accessible only through a series of code or keyword commands available from and under direct control of the Project Director or his/her delegated representatives. The computer records are secured by a multiple level security system which is capable of controlling access to the individual data field level.

Persons having access to the computer database can be restricted to a confined application which only permits a narrow "view" of the data. Data on computer files is accessed by keyword known only to authorized users who are NIH or contractor employees involved in work for the program.

These practices are in compliance with the standards of Chapter 45-13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45-13, and the HHS Automated Information Systems Security Program Handbook.

**STORAGE:**

The records will be stored in file folders, computer tapes and computer disks.

**RETRIEVABILITY:**

Records are retrieved by name of the inventor, EIR number, or keywords relating to the nature of the invention, Case/Serial Number, Licensing Number, internal reference numbers, contractor, agency, Institute, and/or Center.

**SAFEGUARDS:**

1. Authorized Users: Data on computer files is accessed by password known only to authorized users who are NIH or contractor employees involved in patenting and licensing of PHS inventions. Access to information is thus limited to those with a need to know.

2. Physical Safeguards: Records are stored in a dedicated file room or in locking file cabinets in file folders. During evening and weekend hours the offices are locked and the building is closed.

3. Procedural and Technical Safeguards: Data stored in computers will be accessed through the use of passwords known only to the authorized users. A password is required to access the database. All users of personal information in

connection with the performance of their jobs (see Authorized Users, above) protect information, including confidential business information submitted by potential licensees, from public view and from unauthorized personnel entering an unsupervised office.

These practices are in compliance with the standards of Chapter 45-13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45-13, and the HHS Automated Information Systems Security Program Handbook.

**RETENTION AND DISPOSAL:**

Records are retained and disposed of under the authority of the NIH Records Control Schedule contained in NIH Manual Chapter 1743, Appendix 1—"Keeping and Destroying Records" (HHS Records Management Manual, Appendix B-361), item 1100-L, which allows records to be kept for a maximum of thirty years. **ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

1. A record may be disclosed for a research purpose, when the Department: (A) Has determined that the use or disclosure does not violate legal or policy limitations under which the record was provided, collected, or obtained; *e.g.*, disclosure of alcohol or drug abuse patient records will be made only in accordance with the restrictions of confidentiality statutes and regulations 42 U.S.C. 241, 42 U.S.C. 290dd-2, 42 CFR part 2, and where applicable, no disclosures will be made inconsistent with an authorization of confidentiality under 42 U.S.C. 241 and 42 CFR part 2a; (B) has determined that the research purpose (1) cannot be reasonably accomplished unless the record is provided in individually identifiable form, and (2) warrants the risk to the privacy of the individual that additional exposure of the record might bring; (C) has required the recipient to (1) establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, (2) remove or destroy the information that identifies the individual at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient has presented adequate justification of a research or health nature for retaining such information,

and (3) make no further use or disclosure of the record except (a) in emergency circumstances affecting the health or safety of any individual, (b) for use in another research project, under these same conditions, and with written authorization of the Department, (c) for disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or (d) when required by law; and (D) has secured a written statement attesting to the recipient's understanding of, and willingness to abide by, these provisions.

2. Disclosure may be made to a Member of Congress or to a Congressional staff member in response to an inquiry of the Congressional office made at the written request of the constituent about whom the record is maintained.

3. The Department of Health and Human Services (HHS) may disclose information from this system of records to the Department of Justice when: (a) The agency or any component thereof; or (b) any employee of the agency in his or her official capacity where the Department of Justice has agreed to represent the employee; or (c) the United States Government, is a party to litigation or has an interest in such litigation, and by careful review, the agency determines that the records are both relevant and necessary to the litigation and the use of such records by the Department of Justice is, therefore, deemed by the agency to be for a purpose that is compatible with the purpose for which the agency collected the records.

4. Disclosure may be made to agency contractors, grantees, experts, consultants, collaborating researchers, or volunteers who have been engaged by the agency to assist in the performance of a service related to this system of records and who need to have access to the records in order to perform the activity. Recipients shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).

5. Information from this system may be disclosed to Federal agencies, State agencies (including the Motor Vehicle Administration and State vital statistics offices, private agencies, and other third parties (such as current or prior employers, acquaintances, relatives), when necessary to obtain information on morbidity and mortality experiences and to locate individuals for follow-up studies. Social security numbers, date of

birth and other identifiers may be disclosed: (1) To the National Center for Health Statistics to ascertain vital status through the National Death Index; (2) to the Health Care Financing Agency to ascertain morbidities; and (3) to the Social Security Administration to ascertain disabilities and/or location of participants. Social security numbers may also be given to other Federal agencies, and State and local agencies when necessary to locating individuals for participation in follow-up studies.

6. Medical information may be disclosed in identifiable form to tumor registries for maintenance of health statistics, *e.g.*, for use in research studies.

7. PHS may inform the sexual and/or needle-sharing partner(s) of a subject individual who is infected with the human immunodeficiency virus (HIV) of their exposure to HIV, under the following circumstances: (1) The information has been obtained in the course of clinical activities at PHS facilities carried out by PHS personnel or contractors; (2) The PHS employee or contractor has made reasonable efforts to counsel and encourage the subject individual to provide the information to the individual's sexual or needle-sharing partner(s); (3) The PHS employee or contractor determines that the subject individual is unlikely to provide the information to the sexual or needle-sharing partner(s) or that the provision of such information cannot reasonably be verified; and (4) The notification of the partner(s) is made, whenever possible, by the subject individual's physician or by a professional counselor and shall follow standard counseling practices.

PHS may disclose information to State or local public health departments, to assist in the notification of the subject individual's sexual and/or needle-sharing partner(s), or in the verification that the subject individual has notified such sexual or needle-sharing partner(s).

8. Certain diseases and conditions, including infectious diseases, may be reported to appropriate representatives of State or Federal Government as required by State or Federal law.

9. Disclosure may be made to authorized organizations which provide health services to subject individuals or provide third-party reimbursement or fiscal intermediary functions, for the purpose of planning for or providing such services, billing or collecting third-party reimbursements.

10. The Secretary may disclose information to organizations deemed qualified to carry out quality assessment, medical audits or utilization reviews.

11. Disclosure may be made for the purpose of reporting child, elder or spousal abuse or neglect or any other type of abuse or neglect as required by State or Federal law.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records may be stored on index cards, file folders, computer tapes and disks (including optical disks), photography media, microfiche, microfilm, and audio and video tapes. For certain studies, factual data with study code numbers are stored on computer tape or disk, while the key to personal identifiers is stored separately, without factual data, in paper/computer files.

**RETRIEVABILITY:**

During data collection stages and follow-up, retrieval is by personal identifier (e.g., name, social security number, medical record or study identification number, etc.). During the data analysis stage, data are normally retrieved by the variables of interest (e.g., diagnosis, age, occupation).

**SAFEGUARDS:**

1. *Authorized Users:* Access to identifiers and to link files is strictly limited to the authorized personnel whose duties require such access. Procedures for determining authorized access to identified data are established as appropriate for each location. Personnel, including contractor personnel, who may be so authorized include those directly involved in data collection and in the design of research studies, e.g., interviewers and interviewer supervisors; project managers; and statisticians involved in designing sampling plans. Other one-time and special access by other employees is granted on a need-to-know basis as specifically authorized by the system manager. Researchers authorized to conduct research on biologic specimens will typically access the system through the use of encrypted identifiers sufficient to link individuals with records in such a manner that does not compromise confidentiality of the individual.

2. *Physical Safeguards:* Records are either stored in locked rooms during off-duty hours, locked file cabinets, and/or secured computer facilities. For certain studies, personal identifiers and link files are separated and stored in locked files. Computer data access is limited through the use of key words known only to authorized personnel.

3. *Procedural Safeguards:* Collection and maintenance of data is consistent

with legislation and regulations in the protection of human subjects, informed consent, confidentiality, and confidentiality specific to drug and alcohol abuse patients where these apply. When anonymous data is provided to research scientists for analysis, study numbers which can be matched to personal identifiers will be eliminated, scrambled, or replaced by the agency or contractor with random numbers which cannot be matched. Contractors who maintain records in this system are instructed to make no further disclosure of the records. Privacy Act requirements are specifically included in contracts for survey and research activities related to this system. The OHS project directors, contract officers, and project officers oversee compliance with these requirements. Personnel having access are trained in Privacy Act requirements. Depending upon the sensitivity of the information in the record, additional safeguard measures may be employed.

4. *Implementation Guidelines:* These practices are in compliance with the standards of Chapter 45-13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45-13, and the HHS Automated Information Systems Security Program Handbook.

**RETENTION AND DISPOSAL:**

Records are retained and disposed of under the authority of the NIH Records Control Schedule contained in NIH Manual Chapter 1743, Appendix 1—"Keeping and Destroying Records" (HHS Records Management Manual, Appendix B-361), item 3000-G-3, which allows records to be kept as long as they are useful in scientific research. Collaborative Perinatal Project records are retained in accordance with item 3000-G-4, which does not allow records to be destroyed. Refer to the NIH Manual Chapter for specific conditions on disposal or retention instructions.

**SYSTEM MANAGER(S) AND ADDRESS:**

See Appendix I for a listing of current System Managers. This system is for use by all NIH Institutes and Centers.

**NOTIFICATION PROCEDURE:**

To determine if a record exists, write to the appropriate IC Privacy Act Coordinator listed below. In cases where the requester knows specifically which System Manager to contact, he or she may contact the System Manager directly (See Appendix I). Notification requests should include: individual's name; current address; date of birth; date, place and nature of participation

in specific research study; name of individual or organization administering the research study (if known); name or description of the research study (if known); address at the time of participation; and in specific cases, a notarized statement (some highly sensitive systems require two witnesses attesting to the individual's identity). A requester must verify his or her identity by providing either a notarization of the request or by submitting a written certification that the is who he or she claims to be and understands that the knowing and willful request for acquisition of a record pertaining to an individual under false pretenses is a criminal offense under the Act, subject to a five thousand dollar fine.

Individuals will be granted direct access to their medical records unless the System Manager determines that such access is likely to have an adverse effect (i.e., could cause harm) on the individual. In such cases when the System Manager has determined that the nature of the record information requires medical interpretation, the subject of the record shall be requested to designate, in writing, a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion. The representative may be a physician, other health professional, or other responsible individual. In this case, the medical/dental record will be sent to the designated representative. Individuals will be informed in writing if the record is sent to the representative. This same procedure will apply in cases where a parent or guardian requests notification of, or access to, a child's or incompetent person's medical record. The parent or guardian must also verify (provide adequate documentation) their relationship to the child or incompetent person as well as his or her own identity to prove their relationship.

If the requester does not know which Institute or Center Privacy Act Coordinator to contact for notification purposes, he or she may contact directly the NIH Privacy Act Officer at the following address: NIH Privacy Act Officer, Office of Management Assessment, 6011 Executive Blvd., Room 601L, Rockville, MD 20852.

### CATEGORIES OF RECORDS IN THE SYSTEM:

Administrative records, such as treatment admission and release dates, name and address, and other demographic data; medical records, such as, but not limited to, medical history information, drug abuse/use data as well as treatment information, any laboratory tests, etc.

### AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

### PURPOSE(S):

The records were collected originally to monitor the individual's progress while being treated at either of two PHS hospitals and to ensure continuity of that care. These systems are now inactive. The records are used to respond to requests from subject individuals (or his/her designated representative) to (1) establish eligibility for certain Federal benefits for the

individual or his/her dependent(s), and (2) provide information to subsequent health care providers at the request of the individual regarding medical treatment received to ensure continuity of care.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

None.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records at National Institute on Drug Abuse (NIDA) are on microfilm and contain only part of the admission and discharge information. The microfilm is stored in a file cabinet in a locked room. Records sent to Federal Records Center are stored in GSA-approved storage containers.

**RETRIEVABILITY:**

The administrative records and microfilm are filed by patient name. The medical records are filed either by patient name or by patient's hospital number with a cross-reference list at NIDA matching number to name.

**SAFEGUARDS:**

1. *Authorized Users:* Only the System Manager and designated staff.
2. *Physical Safeguards:* The microfilm is in a room which has limited access, or stored at a security coded warehouse. The room is located in a building with a 24-hour security patrol/television surveillance system. Sign in and out procedures are used at all times. The warehouse has security access; records can only be retrieved by the System Manager or designated staff using a confidential code number. The warehouse is patrolled on a 24-hour basis with television surveillance.
3. *Procedural Safeguards:* Only the System Manager and his/her staff have access to the microfilm information and have been trained in accordance with the Privacy Act.
4. *Implementation Guidelines:* These practices are in compliance with the standards of Chapter 45-13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45-13, and the HHS Automated Information Systems Security Program Handbook.

**RETENTION AND DISPOSAL:**

All administrative and medical records have been retired to a Federal Records Center. The records collected under the Narcotic Addict Rehabilitation Act of 1966 will be

destroyed when they are 25 years old, which will be in 2001 because the last patient was released from treatment in 1976. The PHS beneficiaries' records will be destroyed at the same time. The records will be shredded in 2003 upon written request from the system manager.

**SYSTEM MANAGER(S) AND ADDRESS:**

Medical Records Officer, Intramural Research Program, National Institute on Drug Abuse (NIDA), Johns Hopkins Bayview Medical Center, Box 5180, Baltimore, MD 21224.

**NOTIFICATION PROCEDURE:**

To determine if a record exists, write to the System Manager at the address above. An individual may learn if a record exists about himself or herself upon written request with a notarized signature. The request should include, if known: Patient hospital record number, full name or any alias used, patient's address during treatment, birth date, veteran status (if applicable) and approximate dates in treatment, and social security number.

An individual who requests notification of a medical record shall, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the individual of its content at the representative's discretion.

**RECORD ACCESS PROCEDURE:**

Same as Notification Procedures. Requesters should also reasonably specify the record contents being sought. An individual may also request an accounting of disclosures of his/her record, if any.

**CONTESTING RECORD PROCEDURE:**

Contact the official at the address specified under Notification Procedures above, and reasonably identify the record, specify the information being contested, and state the corrective action sought, with supporting information to show how the record is inaccurate, incomplete, untimely, or irrelevant.

2. To enable Federal drug abuse researchers to evaluate and monitor the subjects' health during participation in a research project. The areas of research include, but are not limited to, biomedical, clinical, behavioral, pharmacological, psychiatric, psycho social, epidemiological, etiological,

statistical, treatment and prevention of narcotic addiction and drug abuse.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

1. The National Institute on Drug Abuse (NIDA) uses a contractor to recruit volunteers and to screen these individuals for their acceptability to participate in specific research projects, and limits the contractor's access to the records to these procedures. NIDA also uses a contractor to perform routine medical laboratory tests on blood and urine samples. These routine tests verify that the subject is in good health. Both contractors disclose records from this system only to NIDA and are required to maintain Privacy Act safeguards with respect to such records.

2. (a) PHS may inform the sexual and/or needle-sharing partner(s) of a subject individual who is infected with the human immunodeficiency virus (HIV) of their exposure to HIV, under the following circumstances: (1) The information has been obtained in the course of clinical activities at PHS facilities carried out by PHS personnel or contractors; (2) The PHS employee or contractor has made reasonable efforts to counsel and encourage the subject individual to provide the information to the individual's sexual or needle-sharing partner(s); (3) The PHS employee or contractor determines that the subject individual is unlikely to provide the information to the sexual or needle-sharing partner(s) or that the provision of such information cannot reasonably be verified; and (4) The notification of the partner(s) is made, whenever possible, by the subject individual's physician or by a professional counselor and shall follow standard counseling practices.

(b) PHS may disclose information to State or local public health departments, to assist in the notification of the subject individual's sexual and/or needle-sharing partner(s), or in the verification that the subject individual has, notified such sexual or needle-sharing partner(s).

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Data may be stored in file folders or on an internal EISnet, CDS, computer disk, magnetic tape, or microfilm.

**RETRIEVABILITY:**

Administrative and medical records are indexed and retrieved by the subject's name and identification code number. Research records are indexed and retrieved by the subject's name and identification code number.

**SAFEGUARDS:**

1. *Authorized Users:* Only authorized NIDA Intramural Research Program staff are allowed access to these files.

2. *Physical Safeguards:* Files and file rooms are locked after business hours. Building has electronic controlled entry at all times with a 24-hour guard/television surveillance system. The computer terminals are in a further secured area.

3. *Procedural Safeguards:* All users of personal information in connection with the performance of their jobs protect information from unauthorized personnel. Access codes to the research records are available only to the Principal Investigator and his/her research team. Access to the records is strictly limited to those staff members trained in accordance with the Privacy Act. The contractor staff members are required to secure the information in accordance with the Privacy Act. Project Officer and contracting officials will monitor contractor compliance.

4. *Access to the Clinical Data Warehouse (EISnet):* The NIDA IRP computerized medical and research record is strictly limited. All staff must be authorized to use the system and be granted an access code (user name and password) by the system sponsor (NIDA, IRP Chief of Biomedical Informatics). Passwords are required to be changed every six months. Access is limited by job classification and is on a need to know basis only. Data entered is time and date stamped by the staff member's name. Data is not altered once entered. While logged into the system, the name of the staff member is displayed on the screen. An activity log of each use is kept. Data is backed up on a daily basis.

In addition, because much of the data collected in these research projects are sensitive and confidential, special safeguards have been established. Certificates of confidentiality have been issued under Protection of Identity—Research Subjects Regulations (42 CFR part 2a) to those projects initiated since February 1980. This authorization enables persons engaged in research on mental health, including research on the use and effect of psychoactive drugs, to protect the privacy of research subjects by withholding their names or other identifying characteristics from all persons not connected with the conduct

of the research. Persons so authorized may not be compelled in any Federal, State, or local civil, criminal, administrative, legislative, or other proceeding to identify such individuals. In addition, these records are subject to 42 CFR part 2, the Confidentiality of Alcohol and Drug Abuse Patient Records Regulations (42 CFR 2.56), which state: "Where the content of patient records has been disclosed pursuant to these regulations for the purpose of conducting scientific research \* \* \* information contained therein which would directly or indirectly identify any patient may not be disclosed by the recipient thereof either voluntarily or in response to any legal process whether Federal or State."

**RETENTION AND DISPOSAL:**

The term "pharmacokinetics" refers to the manner in which the human body processes a drug. "Pharmacodynamics" refers to the manner in which the drug affects the human body.

The clinical investigator used data of a medical nature that is contained in the system to make determinations regarding drug dosages and/or radiochemical exposures appropriate to the individual human subject-participants, in order to preserve and protect the health of each. The system also provides baseline data for studying the drug effects.

The Food and Drug Administration (FDA) also may use the records in routine inspections FDA conducts in accordance with its responsibilities to develop standards on the composition, quality, safety, and efficacy of drugs administered to humans, and to monitor experimental usage of drugs.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

1. We may disclose to a congressional office the record of an individual in response to a verified inquiry from the congressional office made at the written request of the individual.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

1. Within the restrictions set forth in HHS regulations concerning the confidentiality of drug abuse patient records (42 CFR 2.56), we may disclose a record for a research purpose, when the Department: (a) Has determined that the use or disclosure does not violate legal or policy limitations under which the record was provided, collected, or obtained; (b) has determined that the research purpose (1) cannot be reasonably accomplished unless the record is provided in individually identifiable form, and (2) warrants the risk to the privacy of the individual that additional exposure of the record might bring; (c) has required the recipient to (1) establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, (2) remove or destroy the information that identifies the individual at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient has presented adequate justification of a research or health nature for retaining such information, and (3) make no further use or disclosure of the record except: (A) In emergency circumstances affecting the health or safety of any individual, (B) for use in another research project, under these same conditions, and with written authorization of the Department, (C) for disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or (D) when required by law; (d) has secured a written statement attesting to the recipient's understanding of, and willingness to, abide by these provisions.

2. The Research Triangle Institute, an NIH contractor, uses the records in this system to accomplish the research purpose for which the records are collected. In the event of followup studies or continuation studies because the contract has been terminated for

convenience by the Government, we may disclose records in this system to a subsequent NIH contractor. We would require the new contractor to maintain Privacy Act safeguards with respect to such records.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Interview forms, magnetic tapes, and disks.

**RETRIEVABILITY:**

Records are indexed and retrieved by unique alpha numerical identifier. In order to relate the data collected to specific individuals, one must use the link file discussed under Safeguards.

**SAFEGUARDS:**

1. *Authorized Users:* Contractor personnel, the agency project officer, and agency employees whose duties require the use of the information in the system.

2. *Physical Safeguards:* The data management task leader, the project leader, or the project director provide technical supervision of all data collection and processing activities. Individually identified forms are stored in a secure, vault-like room provided for this purpose. Authorized personnel have access to the room by one locked door with controlled entry, i.e., only on the written authority of the professional staff member in charge. Computerized records are kept in a vault area with limited accession.

3. *Procedural Safeguards:* Because some of the data collected in this study, such as data on drug use, are sensitive and confidential, special safeguards have been established. A Certificate of Confidentiality has been issued under 42 CFR part 2a. This authorization enables persons engaged in research on mental health, including research on the use and effect of psychoactive drugs, to protect the privacy of research subjects by withholding the names or other identifying characteristics from all persons not connected with the conduct of the research. Persons so authorized may not be compelled in any Federal, State, or local civil, criminal, administrative, legislative, or other proceedings to identify such individuals. In addition, these records are subject to 42 CFR part 2, the Confidentiality of Alcohol and Drug Abuse Patient Records Regulations (42 CFR 2.56), which state: "Where the content of patient records has been disclosed pursuant to (these regulations) for the purpose of conducting scientific research \* \* \*. information contained

therein which would directly or indirectly identify any patient may not be disclosed by the recipient thereof either voluntarily or in response to any legal process whether Federal or State."

Another safeguard is that the forms containing subject identification information for client followup and data matching purposes do not include any reference to the purpose of the study.

Identification and location information is kept separate from any information that would suggest that the respondent has been in a drug treatment program.

Information on completed forms is entered immediately on the computer. Completed forms and computerized data are released only to authorized persons. Only aggregate data are provided and used in the preparation of necessary and appropriate reports.

A link file system is used. This system has three components: (1) Personal information, (2) data base information, and (3) the link file, which contains identifying number pairs which can be used to match data with individuals. The advantage of this system is that the data base can be used directly for report generation, etc., without the use of decrypting subroutines or access to the personal information or matching link files.

In addition, the computer center being utilized has developed an extensive security system to protect computer account codes and data. This system is described in a publication that is available from the System manager upon request.

We do not anticipate any disclosure of individually identifiable information to other persons or organizations within the Department of Health and Human Services. Nor does the contractor provide individually identification information to the Department of Justice, with which NIDA has a cooperative agreement for this study.

4. *Implementation Guidelines:* These practices are in compliance with the standards of Chapter 45-13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45-13, and the HHS Automated Information Systems Security Program Handbook. In addition, project staff complies with the contractor's (Research Triangle Institute) standard procedures for safeguarding data.

The contractor provides only aggregate information to NIDA.

#### **RETENTION AND DISPOSAL:**

The contractor destroys interview forms by shredding or burning

immediately after contractor staff have completed and verified direct entry on magnetic tape or disk storage. The contractor will destroy individual identification and location data by shredding or burning, under the explicit written authorization of the System manager, which is anticipated to be no longer than five years after the termination of the study unless the information is needed for research purposes. We will retain aggregate data tapes for research purposes. These tapes will not have any individually identifiable information. In accordance with the NIH Records Control Schedule, these tapes will be retained for five years after completion of the project (approximately 2002). At that time, the tapes will be retired to the Federal Records Center and destroyed when they are ten years old or when they are no longer needed for research purposes.

#### **SYSTEM MANAGER(S) AND ADDRESS:**

Drug Abuse Treatment Outcome Study (DATOS), Project Officer, Services Research Branch, Division of Epidemiology, Services, and Prevention Research, National Institute on Drug Abuse (NIDA), Neuroscience Center, Room 4222, 6001 Executive Boulevard, Bethesda, MD 20892.

#### **NOTIFICATION PROCEDURE:**

To determine if a record exists, write to the System Manager at the address above. An individual may learn if a record exists about himself/herself upon written request, with notarized signature. The request should include, if known, name of the researcher, location of the research site, approximate date of data collection, any alias used, and subject identification number.

An individual who requests notification of a medical record shall, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion.

A parent or legal guardian who requests notification of an adolescent's record shall designate a family physician or other health professional (other than a family member) of the Division of Clinical Research staff to whom the record, if any, will be sent. The parent or legal guardian must verify in writing the relationship to the adolescent as well as his/her own identity.

#### **RECORD ACCESS PROCEDURE:**

Same as Notification Procedures. Requesters should also reasonably specify the record contents being

sought. An individual may also request an accounting of disclosures of his/her record, if any.

Persons other than subject individuals, who request individually identifiable data from a record must provide written consent from the subject individual permitting the requested disclosure. The only exception (if not in conflict with confidentiality regulations) would be for disclosure to persons or organizations permitted by the Privacy Act, section 3(b), to obtain personally identifiable data.

#### **CONTESTING RECORD PROCEDURE:**

Contact the official at the address specified under Notification Procedures above and reasonably identify the record, specify the information being contested, the corrective action sought, with supporting information to show how the record is inaccurate, incomplete, untimely, or irrelevant.

#### **RECORD SOURCE CATEGORIES:**

Research subjects, and staff in participating drug abuse treatment programs, written clinical evaluations, counselors, psychiatrists, psychotherapists, family members, research assistants, hospitals.

#### **SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:**

None.

#### **09-25-0209**

#### **SYSTEM NAME:**

#### **CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Voluntary clients of Federally funded and other drug abuse treatment

programs who have requested to receive investigational new or marketed drugs, such as but not limited to, naltrexone, levo-alpha acetylmethadol (LAAM), buprenorphine, disulfiram, selegiline, bupropion, and GBR-12909 as part of their treatment. Data collection will continue through calendar year 2010.

#### **CATEGORIES OF RECORDS IN THE SYSTEM:**

Demographic data, treatment outcome data, treatment process data, client locator information, and personal identifiers (name and assigned numerical identifier).

#### **AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

Public Health Service Act, Sections 301, 464p, and 405 (42 U.S.C. 241, and 284).

#### **PURPOSE(S):**

1. To maintain information on the safety and effectiveness of drugs for treatment of drug dependence with or without abuse potential in various treatment environments and modalities and changes in the behavior and characteristics of drug abusers who received these substances as part of their treatment regimen.

2. To provide data required by the Food and Drug Administration (FDA) to support research on drug dependence, Investigational New Drug Applications (INDs) and potential New Drug Applications (NDAs) for various drugs, and to treat drug dependence with or without abuse potential. A new drug application is a notice to FDA that a pharmaceutical company believes they have enough data to demonstrate the safety and efficacy of a substance to satisfy FDA for marketing the substance. FDA may also use the records in routine inspections that FDA conducts in accordance with its responsibilities to develop standards on the composition, quality, safety and efficacy of drugs administered to humans, and to monitor experimental usage of drugs.

3. To conduct research on the pharmacology, toxicology, and behavioral characteristics of drugs of abuse alone or in combination with proposed treatment drugs.

#### **ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

NIH contractor(s) and/or interagency collaborators (*i.e.* Department of Veteran's Affairs) use the records in the system to accomplish the research and development purposes for which the records were collected. In the event of a followup study or continuation study, the responsible project officer may disclose records in this system to a subsequent NIH contractor(s). Any new

contractor(s) is and would be required to maintain Privacy Act safeguards with respect to such records and to comply with the confidentiality restrictions of 42 CFR part 2.

#### **POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

##### **STORAGE:**

Interview and assessment forms, video tapes, magnetic tapes, disks and microfiche in boxes in closed cabinets in a locked room with limited accessibility.

##### **RETRIEVABILITY:**

The records are indexed and retrieved by subject-participant's name code (*i.e.*, initials—not name) and unique numerical identifier. In order to relate the data collected to specific individuals, however, one must use the link file discussed under safeguards.

##### **SAFEGUARDS:**

1. *Authorized Users:* For all of the studies, the System Manager or Federal Project Officer and only authorized contract staff have access to the records (computerized and hard copy files) in the system. The contractor provides only aggregate data in reports to NIDA, FDA, or the public. Only the NIDA personnel mentioned previously and selected authorized contract staff, have access to the stored records. A certificate of confidentiality is issued to researchers conducting these studies under 42 CFR, part 2, Protection of Identity—Research Subjects. This authorization enables persons engaged in research on mental health, including research on the use and effect of psychoactive drugs, to protect the privacy of research subjects by withholding the names or other identifying characteristics from all persons not connected with the conduct of the research. Persons so authorized may not be compelled in any Federal, State or local civil, criminal, administrative, legislative, or other proceedings to identify such individuals. These regulations do not prohibit voluntary disclosure by the researcher. However, the records of these studies also are subject to 42 CFR part 2, the Confidentiality of Alcohol and Drug Abuse Patient Records Regulations (42 CFR part 56), which state: Where the content of patient records has been disclosed. Pursuant to (these regulations) for the purpose of conducting scientific research \* \* \* information contained therein which would directly or indirectly identify any patient may not be disclosed by the recipient thereof either voluntarily or in

response to any legal process whether Federal or State.” The contractor's institutional review board reviewed and approved the safeguards described above in accordance with 45 CFR part 46 on the Protection of Human Subjects.

2. *Physical Safeguards:* For the study records, the contractor(s) stored individually identified forms in a locked room with controlled entry, *i.e.*, only on written authority of the professional staff member in charge of data handling and processing). The contractor staff enters the collected information onto computer systems or disks as soon after contact with the subject-participant as possible, and stores the computerized records in a secured area with access limited as above.

For the study records, NIDA stores any individually identified forms in a lockable cabinet in a secure room. Only authorized NIDA personnel (*i.e.*, select members of the Division of Treatment Research and Development professional staff and their support staff have access to the room with controlled entry. The room is in a building which has a 24-hour guard/television surveillance system and has controlled entry (picture identification sign in and out procedures) before and after normal working hours.

Another safeguard for these studies is that the forms containing subject identification information do not include any reference to the purpose of the study. The identification information is separate from any information that would suggest that the respondent is or has been in a drug abuse treatment program. In addition, the computer centers being utilized for data analyses have developed an extensive security system to protect computer account codes and data.

3. *Procedural Safeguards:* Access to the computerized records of the studies is protected by a computerized password routine which is changed periodically. In addition, the project staff complies with the contractor's standard procedures for safeguarding data. The link file system that identifies individuals with personal data has three components: (1) Identification information, (2) data base information, and (3) the link file, which contains identifying number pairs which match data with individuals. The advantage of this system is that one may use the baseline data directly for report generation, etc., without using the subroutines or accessing the personal information or link files.

4. *Implementation Guidelines:* These practices are in compliance with the standards of Chapter 45-13 of the HHS

General Administration Manual, sbull 111 "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45-13, and the HHS Automated Information Systems Security Program Handbook.

#### RETENTION AND DISPOSAL:

NIDA will destroy identifiable information by shredding or burning when it is no longer needed for analysis or research purposes; then the tapes, and/or other electronic media, will be erased. NIDA will destroy individual identification and match-up information from other studies by shredding or burning five years after FDA completes the review and approves the new drug applications or when they are no longer needed for research purposes.

NIDA will retain the aggregate data tapes, and/or other electronic media, and/or paper records from studies for research purposes. These tapes will not have any individually identifiable information. In accordance with the FDA regulations governing new drug applications, the aggregate tapes will be retained for at least two years after FDA approves the new drug applications or the IND is withdrawn. At that time, the tapes will be retired to the Federal Records Center and destroyed when they are five years old or when they are no longer needed for research purposes.

#### SYSTEM MANAGER(S) AND ADDRESS:

Chief, Regulatory Affairs Branch, Division of Treatment Research and Development, National Institute on Drug Abuse (NIDA), Neuroscience Center, Room 4123, 6001 Executive Boulevard, Bethesda, MD 20892.

#### NOTIFICATION PROCEDURE:

An individual may determine if a record exists about himself/herself upon written request, with notarized signature if request is made by mail, or with suitable identification if request is made in person, to the appropriate system manager at the address above. The following information should be included, if known: subject-participant's full name and a letter of request with notarized signature of the subject-participant of the record, any alias used, subject-participant's identification number, name of the researcher, name of clinic or research center, name of substance, and approximate date of study participation.

An individual who requests notification of a medical record must, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion.

#### RECORD ACCESS PROCEDURE:

Same as Notification Procedures. Requesters should also reasonably specify the record contents being sought. An individual may also request an accounting of disclosures of his/her record, if any.

#### CONTESTING RECORD PROCEDURE:

Contact the official at the address specified under Notification Procedures above and reasonably identify the record, specify the information being contested, the corrective action sought, with supporting information to show how the record is inaccurate, incomplete, untimely, or irrelevant.

#### RECORD SOURCE CATEGORIES:

Research subject-participants, staff in the participating drug abuse treatment programs, written clinical evaluations, private physicians, counselors, psychiatrists, psychotherapists, family members, research assistants, and hospital records.

#### SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

09-25-0210

#### SYSTEM NAME:

Shipment Records of Drugs of Abuse to Authorized Researchers, HHS/NIH/NIDA.

#### SECURITY CLASSIFICATION:

None.

#### SYSTEM LOCATION:

Chemistry and Physiological Systems Research Branch (CPSRB), Division of Neuroscience and Behavioral Research, National Institute on Drug Abuse (NIDA), Neuroscience Center, Room 4282, 6001 Executive Boulevard, Bethesda, MD 20892-9555.

Research Triangle Institute, Research Triangle Park, NC 27709.

#### CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individual researchers and organizations who are registered with the Drug Enforcement Administration (DEA), Department of Justice (DOJ), some since 1966, and who have voluntarily submitted documentation to the National Institute on Drug Abuse (NIDA) in order to obtain, through the NIDA Drug Supply Program (DSP), drugs of abuse for use in a research project.

#### CATEGORIES OF RECORDS IN THE SYSTEM:

While the records in this system are research project-related, they support the eligibility of individual researchers to receive drugs of abuse. Types of

information contained in the records are: researcher's name, curricula vitae, research protocol, DEA and (if applicable) Nuclear Regulatory Commission registration numbers (when a radio labeled compound is requested and shipped), business address (location of research project) and telephone number, summary of research project(s), requests for substance(s), name and amount of each compound requested and shipped, dates material is shipped and received, shipment numbers, and order form numbers.

#### AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Health Service Act, sections 301, and 405 (42 U.S.C. 241 and 284); Controlled Substances Act of 1970 (21 U.S.C. 801 *et seq.*); Atomic Energy Act of 1954, as amended, section 81 (42 U.S.C. 2111); and Energy Reorganization Act of 1974, section 201 (42 U.S.C. 5841).

#### PURPOSE(S):

To facilitate operation of DSP which is a centralized research support service through which the United States Government supplies to the national and international scientific community for research purposes, most Schedule I and many Schedule II-V controlled and noncontrolled substances as specified in the Controlled Substances Act (CSA) of 1970 (21 U.S.C. 801 *et seq.*). Controlled substances are chemicals and other substances, and their immediate precursors, that the Attorney General has determined to have such potential for abuse as to warrant regulation under the CSA. Some of these substances are radio labeled materials. Radio labeled materials are substances to which a small amount of radioactivity is added for use in various studies, such as drug metabolism and mechanisms of drug actions.

This system of records was established to facilitate DSP by enabling NIDA:

1. To verify that requests for drugs of abuse, some of which are radio labeled, are from authorized individuals/organizations for use in a research project;
2. To verify that the amounts of the materials requested by researchers for animal, in vivo, and in vitro research are justified and available;
3. To supply controlled substances in amounts approved by the Food and Drug Administration (FDA) to researchers conducting research with human subjects;
4. To ship these materials securely in accordance with CSA and the Atomic Energy Act; and

5. To maintain records of these transactions.

FDA also may use the records in routine inspections in accordance with FDA's responsibilities to develop standards on the composition, safety, and efficacy of drugs administered to humans, and to monitor experimental usage of drugs.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

1. We may disclose the record of an individual to a congressional office in response to a verified inquiry from the congressional office made at the written request of the individual.

2. We may disclose information to DEA, DOJ, to enable DEA to carry out its responsibilities as described in the Controlled Substances Act of 1970.

3. An NIH contractor routinely uses the records in this system to ship controlled substances to authorized recipients. Such contractor is required to maintain Privacy Act safeguards with respect to these records.

4. An NIH contractor may have access to the records in this system in the performance of its software modification/correction tasks specified in its contract. Such contractor is required to maintain Privacy Act safeguards with respect to these records.

5. The Department of Health and Human Services (HHS) may disclose information from this system of records to the Department of Justice, or to a court or other tribunal, when (a) HHS, or any component thereof; or (b) any HHS employee in his or her official capacity; or (c) any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or (d) the United States or any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components, is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the court or other tribunal is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

NIDA maintains "hard copy" records in file folders and automated records on computer disk.

**RETRIEVABILITY:**

Authorized NIDA and contractor personnel index and retrieve the computerized records by a researcher code number assigned by a computer program at the time a new record is established. Authorized NIDA personnel index and retrieve "hard copy" records by researcher's name. NIDA maintains a computerized, alphabetical cross-reference list that matches names and numbers.

**SAFEGUARDS:**

1. *Authorized Users:* The Chief, CPSR Branch and his or her support staff, program assistant and clerk-typist, and the contracts' project directors and their support staffs have access to the records.

2. *Physical Safeguards:* The "hard copy" records and main computer are physically located at the Neuroscience Center, Bethesda, Maryland. The computerized records are kept in a room with limited admittance. The room is locked after working hours. The "hard copy" records are stored in locked file cabinets in a room with very limited admittance. This room is also locked after working hours. The Neuroscience Center has a 24-hour guard patrol service.

3. *Procedural Safeguards:* The terminals are housed in a secured work area with limited admittance. Contract personnel use a password identification system to obtain access; NIDA changes the passwords periodically.

4. *Implementation Guidelines:* These practices are in compliance with the standards of Chapter 45-13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45-13, and the HHS Automated Information Systems Security Program Handbook.

**RETENTION AND DISPOSAL:**

NIDA maintains an individual's record for five years after the researcher's last request for, or shipment of, a drug of abuse. We consider the record inactive after that, and erase it from the computer disk by a delete routine. The delete routine automatically deletes the computerized cross-reference as well. We destroy the "hard copy" record by shredding. The system is checked once a year for inactive records.

**SYSTEM MANAGER(S) AND ADDRESS:**

Program Director, Drug Supply Program, Chemistry and Physiological Systems Research Branch, Division of Neuroscience and Behavioral Research, National Institute on Drug Abuse (NIDA), Neuroscience Center, Room

4282, 6001 Executive Boulevard, Bethesda, MD 20892-9555.

**NOTIFICATION PROCEDURE:**

To determine if a record exists, write to the System Manager at the address above. An individual may learn if a record exists about himself or herself upon written request. The request should include the researcher's name and business address at the time of last shipment. The request must be signed in ink by the individual researcher. Verifiable proof of identity is required.

**RECORD ACCESS PROCEDURE:**

Same as Notification Procedures. Requesters should also reasonably specify the record contents being sought. An individual may also request an accounting of disclosures of his/her record, if any.

**CONTESTING RECORD PROCEDURE:**

Contact the official at the address specified under Notification Procedures above and reasonably identify the record, specify the information being contested, the corrective action sought, with supporting information to show how the record is inaccurate, incomplete, untimely, or irrelevant.

**RECORD SOURCE CATEGORIES:**

Initial source is the individual researcher. Some of the DEA registration information provided by a researcher is verified through a DEA computer check. FDA provides information concerning type and amount of controlled substance(s) to be shipped to an individual researcher for research projects involving human subjects.

**SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:**

None.

**09-25-0211**

**SYSTEM NAME:**

Intramural Research Program Records of In- and Out-Patients with Various Types of Alcohol Abuse and Dependence, Relatives of Patients with Alcoholism, and Healthy Volunteers, HHS/NIH/NIAAA.

**SYSTEM LOCATION:**

A list of specific project sites is available from the System Manager.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

In- and out-patients with alcohol abuse and dependence, alcohol-induced organic brain syndromes; their relatives; and healthy volunteers.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Research data of wide variety including biochemical measures, psychophysiological and psychological tests, questionnaires, clinical and behavioral observations and interviews, physical examinations, and correspondence.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

Public Health Service Act, as amended, sections 301 (42 U.S.C. 241) and 510 (42 U.S.C. 290bb). These sections authorize the conduct of general health research and research into alcoholism and alcohol abuse.

**PURPOSE(S):**

These records are used for diagnosis and treatment of patients with alcohol abuse and dependence and related conditions; behavioral research relating to the causes, diagnoses, and treatment of addictions; and basic research on behavioral and biological processes.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

Records in this system are covered by section 527 of the Public Health Service Act (42 U.S.C. 290ee-3) and 42 CFR, chapter I, subchapter A, part 2, on confidentiality of alcohol and drug abuse patient records. In accordance with these regulations, the records are confidential and may only be disclosed with the written consent of the patient with specific restrictions, and without the patient's consent in the following instances: (1) To medical personnel to the extent necessary to meet a bona fide emergency; (2) to qualified personnel for the purpose of conducting scientific research; or (3) if authorized by an appropriate order of a court of competent jurisdiction granted after application showing good cause therefore, after certain considerations, and with appropriate safeguards. Routine uses of information in this system are limited to the following:

1. A record may be disclosed for a research purpose, when the Department: (a) Has determined that the use or disclosure does not violate legal or policy limitations under which the record was provided, collected, or obtained; (b) Has determined that the research purpose: (1) Cannot be reasonably accomplished unless the record is provided in individually identifiable form, and (2) warrants the risk to the privacy of the individual that additional exposure of the record might bring; (c) has required the recipient to— (1) establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure

of the record, and (2) remove or destroy the information that identifies the individual at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient has presented adequate justification of a research or health nature for retaining such information, and (3) make no further use or disclosure of the record except—(A) in emergency circumstances affecting the health or safety of any individual, (B) for use in another research project, under these same conditions, and with written authorization of the Department, (C) for disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or (D) when required by law; (d) has secured a written statement attesting to the recipient's understanding of, and willingness to abide by these provisions.

2. Disclosure may be made to a congressional office from the record of an individual in response to a verified inquiry from the congressional office at the written request of that individual, in accordance with 42 CFR, chapter I, subchapter A, part 2. Records may be disclosed to student volunteers, individuals working under a personal services contract, and other individuals performing functions for PHS who do not technically have the status of agency employees, if they need the records in the performance of their agency functions.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:****STORAGE:**

Records may be stored in file folders, on index cards, computer tapes and disks, microfiche, microfilm and audio and video tapes. Normally the factual data, with study code numbers, are stored on computer tape or disk, while the key to personal identifiers is stored separately, without factual data, in paper files.

**RETRIEVABILITY:**

During data collection stages and followup, retrieval by personal identifier (e.g., name or medical record number) is necessary. During the data analysis stage, data are normally retrieved by variables of interest, e.g., age, diagnosis, etc.

**SAFEGUARDS:**

Measures to prevent unauthorized disclosures are implemented as

appropriate for the particular records maintained in each project. Depending on the sensitivity of the project, additional safeguards may be added.

1. *Authorized Users:* Only NIAAA medical and research staff have access to these records, as authorized by the system manager.

2. *Physical Safeguards:* Records are stored in locked rooms, locked file cabinets, and/or secured computer facilities. Personal identifiers and link codes are separated as much as possible and stored in locked files.

3. *Procedural Safeguards:* Collection and maintenance of data are consistent with legislation and regulations for protection of human subjects, informed consent, confidentiality, and confidentiality specific to drug and alcohol abuse patients. Computer data access is limited through the use of key words, a series of account numbers, and passwords which are changed frequently and known only to authorized personnel.

4. *Implementation Guidelines:* These practices are in compliance with the standards of Chapter 45–13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45–13, and the HHS Automated Information Systems Security Program Handbook.

**RETENTION AND DISPOSAL:**

Records are held for five years after completion of the project, retired to a Federal Records Center, and subsequently disposed of after ten years.

**SYSTEM MANAGER(S) AND ADDRESS:**

Clinical Director, Laboratory of Clinical Studies, Division of Intramural Clinical and Biological Research, National Institute on Drug Abuse (NIDA), Building 10, Room 3B–19, 10 Center Drive, Bethesda, MD 20892.

**NOTIFICATION PROCEDURE:**

To determine if a record exists, write to the System Manager at the address above. Provide notarized signature as proof of identity. The request should include as much of the following information as possible: (a) Full name; (b) nature of illness (if any); (c) title of study; (d) name of researcher conducting study. An individual who requests notification of or access to a medical/dental record shall, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion.

A parent or guardian who requests notification of child's/incompetent

person's record shall at the time the request is made designate a family physician or other health professional (other than a family member) to whom the record, if any, will be sent. #### **ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

1. Disclosure may be made to a Member of Congress or to a Congressional staff member in response to an inquiry of the Congressional office made at the written request of the constituent about whom the record is maintained, if the disclosure does not compromise the investigative activities of the Office of Management Assessment.

2. The Department of Health and Human Services (HHS) may disclose information from this system of records

to the Department of Justice when: (a) The agency or any component thereof; or (b) any employee of the agency in his or her official capacity where the Department of Justice has agreed to represent the employee; or (c) the United States Government, is a party to litigation or has an interest in such litigation, and by careful review, the agency determines that the records are both relevant and necessary to the litigation and the use of such records by the Department of Justice is therefore deemed by the agency to be for a purpose that is compatible with the purpose for which the agency collected the records.

3. Disclosure may be made to a court or adjudicative body in a proceeding when: (a) The agency or any component thereof; or (b) any employee of the agency in his or her official capacity; or (c) any employee of the agency in his or her individual capacity where the agency has agreed to represent the employee; or (d) the United States Government, is a party to the proceeding or has an interest in such proceeding, and by careful review, the agency determines that the records are both relevant and necessary to the proceeding and the use of such records is therefore deemed by the agency to be for a purpose that is compatible with the purpose for which the agency collected the records.

4. When a record on its face, or in conjunction with other records, indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto, disclosure may be made to the appropriate agency, whether Federal, foreign, State, local, or tribal, or other public authority responsible for enforcing, investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto, if the information disclosed is relevant to any enforcement, regulatory, investigative or prosecutorial responsibility of the receiving entity.

5. Disclosure may be made to a Federal, State, local, foreign, or tribal or other public authority of any portion of this system of records that contains information relevant to the retention of an employee, the retention of a security clearance, the letting of a contract, or the issuance or retention of a license, grant, or other benefit. The other agency or licensing organization may then make a request supported by the written consent of the individual for the entire record if it so chooses. No disclosure

will be made unless the information has been determined to be sufficiently reliable to support a referral to another office within the agency or to another Federal agency for criminal, civil, administrative, personnel, or regulatory action.

6. Disclosure may be made to Federal, State, local or foreign agency maintaining, civil, criminal, or other relevant enforcement records, or other pertinent records, or to another public authority or professional organization, if necessary to obtain information relevant to an investigation concerning the retention of an employee or other personnel action, the issuance or retention of a security clearance, the letting of a contract, or the issuance or retention of a grant, or other benefit.

7. Where Federal agencies having the power to subpoena other Federal agencies' records, such as the Internal Revenue Service or the Civil Rights Commission, issue a subpoena to the Department for records in this system of records, the Department is authorized to make such records available.

8. Disclosure may be made to agency contractors, experts, or consultants who have been engaged by the agency to assist in the performance of a service related to this system of records and who need to have access to the records in order to perform the activity. Recipients shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).

9. Disclosure may be made in the course of employee discipline or competence determination proceedings.

10. Disclosure may be made to representatives of an awardee of an NIH grant, contract, or cooperative agreement that is the subject of an investigation by Office of Management Assessment, NIH.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records are stored on paper forms in file folders, file cards, magnetic tapes, magnetic disks, optical disks and/or other types of data storage devices.

**RETRIEVABILITY:**

Records are retrieved by a unique classification number; name of the victim, accused, or complainant, date of birth, social security number; and by the nature of the incident and/or time of occurrence.

**SAFEGUARDS:**

1. *Authorized Users:* Data on computer files is accessed by keyword

known only to authorized users who are Office of Management Assessment employees or contractor staff who have a need for the data in the performance of their duties as determined by the system manager.

2. *Physical Safeguards:* Access to the restricted office area containing the rooms where records are stored is controlled through the use of door locks. Only authorized users have the keys to these locks. During regular business hours, rooms in this restricted area are unlocked but entry is controlled by on-site personnel. Rooms where records are stored are locked when not in use. Individually identifiable records are kept in locked file cabinets or in locked rooms under the direct control of the system manager or his/her delegated representatives.

3. *Procedural and Technical Safeguards:* Computer records are accessible only through a series of code or keyword commands available from and under direct control of the system manager or his/her delegated representatives. These records are secured by a multiple-level security system which is capable of controlling access to the individual data field level. Persons having access to the computer database can be restricted to a confined application which permits only a narrow "view" of the data. All authorized users of personal information in connection with the performance of their jobs (see Authorized Users, above) protect information from public view and from unauthorized personnel entering an unsupervised area/office. These practices are in compliance with the standards of Chapter 45-13 of the HHS General Administration Manual, supplementary Chapter PHS hf: 45-13, the Department's Automated Information Systems Security Program Handbook, and the National Institute of Standards and Technology Federal Information Processing Standards (FIPS Pub. 41 and FIPS Pub. 31).

**RETENTION AND DISPOSAL:**

Records are retained and disposed of under the authority of the NIH Records Control Schedule contained in Manual Chapter 1743, Appendix 1—"Keeping and Destroying Records" (HHS Records Management Manual, Appendix B-361): item 1700-A-4, which allows records to be kept permanently when involving extensive litigation; five years for minor infractions or improprieties when final recommendation is that no action be taken, or 20 years for all other. Refer to the NIH Manual Chapter for specific retention and disposition instructions.

**SYSTEM MANAGER(S) AND ADDRESS:**

Director, Office of Management Assessment, Office of Administration, Office of Management, Office of the Director (OD), 6011 Executive Boulevard, Room 601, MSC 7669, Bethesda, Maryland 20892-7669.

**NOTIFICATION PROCEDURE:**

This system is exempt from the notification requirements. However, consideration will be given to requests addressed to the system manager listed above. The requestor must verify his or her identity by providing either a notarization of the request or a written certification that the requestor is who he or she claims to be and understands that the knowing and willful request for acquisition of a record pertaining to an individual under false pretenses is a criminal offense under the Act, subject to a five thousand dollar fine. The request should include: (a) Full name, (b) address, and, (c) year of records in question.

**RECORD ACCESS PROCEDURE:**

This system is exempt from the access requirements. However, consideration will be given to requests addressed to the System Manager listed above. The requestor must verify his or her identity by providing either a notarization of the request or a written certification that the requestor is who he or she claims to be and understands that the knowing and willful request for acquisition of a record pertaining to an individual under false pretenses is a criminal offense under the Act, subject to a five thousand dollar fine. The request should include: (a) full name, (b) address, and, (c) year of records in question. Requesters should also reasonably specify the record contents being sought. Although the system is exempt, individuals may, upon request, receive records from this system and an accounting of disclosure of their records, if the system manager determines that disclosure would not compromise the investigative activities of the Office of Management Assessment, NIH.

**CONTESTING RECORD PROCEDURE:**

Exempt. However, consideration will be given requests addressed to the System Manager. Requests for corrections should reasonably identify the record and specify the information being contested, and state the corrective action sought with supporting information. The right to contest records is limited to information which is incomplete, irrelevant, incorrect, or untimely (obsolete).

**RECORD SOURCE CATEGORIES:**

Departmental and other Federal, State, and local government records; subjects of investigations, complaints, witnesses; documents and other material furnished by non-government sources; and personal observations by the investigator.

**SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:**

This system has been exempted pursuant to 5 U.S.C. 552a(k)(2) of the Privacy Act from the access, notification, correction, and amendment provisions of the Privacy Act (5 U.S.C. 552a(c)(3), (d)(1)–(4), (e)(1), (e)(4)(G) and (H) and (f)), because it consists of investigatory material compiled for law enforcement purposes. Individual access to these files could impair investigations and alert subjects of investigations that their activities are being scrutinized, thereby allowing them time to take measures to prevent detection of illegal action or to escape prosecution. Disclosure of investigative techniques/procedures and the existence and identity of confidential sources of information could jeopardize investigative activities. However, any individual who has been denied any right, privilege, or benefit for which he/she would otherwise be entitled or be eligible, as a result of the maintenance of such material, will be given access to the material, except to the extent that the disclosure of the material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of such source would be held in confidence. The system is also exempted from (k)(5) of the Privacy Act in order to allow the agency to exempt from individual access, investigatory materials compiled for the purpose of determining suitability, eligibility, or qualification for federal employment or financial assistance if release of the material would disclose the identity of a confidential source who furnished information to the Government under an express promise that the identity of the source would be held in confidence.

**09–25–0216****SYSTEM NAME:**

Administration: NIH Electronic Directory, HHS/NIH.

**SECURITY CLASSIFICATION:**

None.

**SYSTEM LOCATION:**

Records are maintained in databases located within the NIH computer facilities and the files of NIH functional

offices required to identify individuals in order to manage the federal resources and authorities assigned to them. A current list of sites, including the address of any Federal Records Center where records from this system may be stored, is available by writing the system manager listed under Notification Procedure below.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Users of NIH resources and services including but not limited to: current and past NIH employees, contractors, tenants of NIH facilities, participants in the NIH visiting programs, registered users of NIH computer facilities, grantees, reviewers, council members, collaborators, vendors, and parking permit holders. This system does not cover patients and visitors to the NIH Clinical Center.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

This system is a source system that provides identification data to a variety of directory services at NIH that share comparable information and assign or relate dedicated federal resources to individuals. This system provides for a central directory that allows NIH to manage NIH corporate business processes and electronic commerce. The types of personal information in this directory are necessary to ensure the accurate identification of individuals doing business in or with the National Institutes of Health. The types of personal information included in this directory are: Name, alias names, date of birth, place of birth, social security number, gender, home address, home phone number, home FAX number, personal pager number, personal mobile phone number, personal email address, emergency contacts, photograph, digitized written signature, digitized biometrics, and NIH-assigned unique identifier. Public data refers to non-sensitive information readily available to the general public (e.g., name, building, room number, and work phone). Non-public data refers to sensitive/confidential information or data for which access is limited to appropriate staff with a valid need-to-know in the performance of their official job duties, or as outlined in the routine uses for disclosure (e.g., social security number, gender, home address, date of birth, place of birth).

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

5 U.S.C. 301 and 302, 44 U.S.C. 3101 and 3102, Executive Order 9397.

**PURPOSE(S):**

The purpose is to establish a consolidated and centrally coordinated

electronic directory to support e-government of administrative business processes; allow effective controls over the creation, maintenance and use of records in the conduct of current business; provide for effective management of costs, operation and interconnectivity of NIH information systems; provide the required structure for network security; and provide an accurate source of directory information at the NIH. Data collected is used to build an NIH centralized source identification directory and provides for directory security system authentication and authorization and supports NIH corporate business processes and electronic commerce. This system of records enables NIH to reliably identify individuals and those federal resources assigned to them. A NIH unique identifier (UID) will be assigned to each individual to permit identification of a single person with their descriptive information and resources throughout their career.

This system allows for the creation of accurate records for individuals in the NIH directory and ensures that duplicate data files are compared, corrected and combined for accuracy, thus eliminating redundancy. It is the central point of coordination for other automated systems that manage or track resources, particularly information security systems.

**INTERNAL USE AND ACCESS TO PERSONAL INFORMATION**

Internal use and access to the personal information in this system will be limited to those with a valid need-to-know in the performance of their official duties. Typical internal uses of the system, including categories of users, uses of the data collected and the need for such use are as follows:

1. Trans-NIH Human Resource Personnel, Administrative Officers, and administrative technicians, will access all public and non-public records for employees and/or NIH affiliates within their scope of responsibility to access/track staffing information such as personal/work contact information, physical location, and/or any other information to facilitate current NIH administrative business processes.

2. Information Resources Management staff and Space and Facility Management personnel will have access to view public data (building location and work phone information) to coordinate access for, and the allocation of, telecommunication resources and building space/access.

3. Supervisors, Administrative Officers and Administrative

Technicians will have access to emergency contact information to enable them to contact someone in the event of an emergency.

4. NIH central services staff, NIH police, and NIH management will access both public and non-public data to coordinate/track employee data required for other NIH business processes such as card key access, ID badges, parking permits, library resources, census information gathered for reporting requirements, employee development, training, campus security, and other administrative processes.

5. NIH Security Officers, or other incident response personnel will have access to public/non-public data where NIH deems it necessary for official investigations or security incidents involving suspected intrusion, illegal activity, or unauthorized/unethical misuse of the system of records or data therein.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

1. Disclosure may be made to a congressional office from the records of an individual in response to an inquiry from the congressional office made at the request of that individual.

2. Disclosure may be made to representatives of the General Services Administration or the National Archives and Records Administration who are conducting records management inspections under the authority of 44 U.S.C. 2904 and 2906.

3. Disclosure may be made to agency contractors, experts, consultants, or volunteers who have been engaged by the agency to assist in the performance of a service related to this system of records and who need to have access to the records in order to perform the activity. Recipients are required to maintain Privacy Act safeguards with respect to these records.

4. Disclosure may be made to respond to a Federal agency's request made in connection with the hiring or retention of an employee, the letting of a contract or issuance of a security clearance, grant, license, or other benefit by the requesting agency, but only to the extent that the information disclosed is relevant and necessary to the requesting agency's decision on the matter.

5. Disclosure may be made to the Department of Justice, or to a court or other adjudicative body, from this system of records when (a) HHS, or any component thereof; or (b) any HHS officer or employee in his or her official capacity; or (c) any HHS officer or employee in his or her individual capacity where the Department of

Justice (or HHS, where it is authorized to do so) has agreed to represent the officer or employee; or (d) the United States or any agency thereof where HHS determines that the proceeding is likely to affect HHS or any of its components, is a party to the proceeding or has any interest in the proceeding, and HHS determines that the records are relevant and necessary to the proceeding and would help in the effective representation of the governmental party.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records are maintained on electronic media such as computer tape and disk and/or hard-copy. Automated records are stored in controlled computer areas. Both manual and computerized records will be maintained in accordance with the standards of Chapter 45-13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records", supplementary Chapter PHS hf: 45-13, and the Department's Automated Information System Security Program Handbook.

**RETRIEVABILITY:**

Records are indexed and retrieved by: name, unique identifier, alias names, and social security number.

**SAFEGUARDS:**

1. *Authorized Users:* Non-public data on computer files is accessed by keyword known only to authorized users who are NIH employees or contractor staff who have a legitimate operational responsibility to access the data in the performance of their duties as determined by the System Manager. Staff are only granted access to those directories or fields for which they have operational responsibilities. User activity is recorded. Occurrences of non-routine user or operator activity are recorded. Public data is controlled by user-defined view via a web-based look-up table. View of public data is accessible and controlled via the NIH network.

2. *Physical Safeguards:* Physical access to the computer systems where records are stored is controlled through the use of door locks and alarms.

3. *Procedural and Technical Safeguards:* Access to the non-public data will be controlled through: password protection, user authentication, and system administration procedures for user access. User name and password authentication procedures are in place to protect non-public data from public

view, and to prevent unauthorized personnel from accessing data. Logical access controls, based on job function, are in place to authorize and/or restrict the user activity and view of the data. Persons having access to data are restricted to a field-by-field confined user interface that permits a controlled, or narrow "view" of the data. Sensitive data transferred between NIH source databases is secured through encryption or similar manner. Digital certificates and automated user audit trail capabilities have been incorporated to ensure data integrity and to detect evidence of data tampering.

These practices are in compliance with standards of Chapter 45-13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records", supplementary Chapter PHS hf: 45-13, and the Department's Automated Information Systems Security Program Handbook.

**RETENTION AND DISPOSAL:**

Records may be retired to a Federal Records Center and subsequently disposed of in accordance with the NIH Records Control Schedule. The Records Control Schedule and disposal standard for these records may be obtained by writing to the System Manager at the address below.
