SUPPLEMENTARY INFORMATION:**Background**

On February 2, 2004, the Department published the notice of initiation of the second sunset review of the antidumping duty order on sorbitol from France pursuant to section 751(c) of the Act.¹ The Department received the Notice of Intent to Participate on behalf of SPI Polyols, Inc. ("SPI"), Archer Daniels Midland Company ("ADM"), and Roquette America ("RA"), the domestic interested parties, within the deadline specified in section 351.218(d)(1)(I) of the *Department's Regulations* ("Sunset Regulations"). ADM and SPI claimed interested party status under section 771(9)(C) of the Act, as domestic producers of sorbitol. RA claimed interested party status as a domestic producer and as an importer of the subject merchandise. We received a complete substantive responses from all domestic interested parties within the 30-day deadline specified in the *Sunset Regulations* under section 351.218(d)(3)(i).

We received a substantive response from one respondent interested party, Amylum France SAS ("Amylum"), in this proceeding. Amylum's response accounted for less than 50 percent of the exports of sorbitol from France to the United States.² As a result, pursuant to section 751(c)(5)(A) of the Act and 19 CFR 351.218(e)(2)(i), the Department conducted an expedited (120-day) sunset review of this finding.

Scope of Review

The products covered in this order are shipments of crystalline sorbitol ("sorbitol"), a polyol produced by the hydrogenation of sugars (glucose), used in the production of sugarless gum, candy, groceries, and pharmaceuticals. The above-described sorbitol is classified under HTS subheading 2905.44.00. The HTS subheadings are provided for convenience and for customs purposes. The written description remains dispositive.

Analysis of Comments Received

All issues raised in this case are addressed in the "Issues and Decision Memorandum" ("Decision Memo") from Ronald K. Lorentzen, Acting Director, Office of Policy, Import Administration, to James J. Jochum, Assistant Secretary for Import Administration, dated June 15, 2004, which is hereby adopted by this notice. The issues discussed in the Decision Memo include the likelihood of continuation or recurrence of dumping and the magnitude of the margin likely to prevail if the finding were to be revoked. Parties can find a complete discussion of all issues raised in this review and the corresponding recommendations in this public memorandum, which is on file in room B-099 of the main Commerce Building.

In addition, a complete version of the Decision Memo can be accessed directly on the Web at <http://ia.ita.doc.gov/frn>, under the heading "June 2004." The paper copy and electronic version of the Decision Memo are identical in content.

Final Results of Review

We determine that revocation of the antidumping duty finding on sorbitol from France would be likely to lead to continuation or recurrence of dumping at the following weighted-average percentage margins:

Manufacturers/Exporters/Producers	Weighted-Average Margin Percent
Roquette Freres	2.9
All Others	2.9

This notice also serves as the only reminder to parties subject to administrative protective orders ("APO") of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305 of the Department's regulations. Timely notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing the results and notice in accordance with sections 751(c), 752, and 777(i)(1) of the Act.

Dated: June 22, 2004.

James J. Jochum,
Assistant Secretary for Import Administration.

NCWM Specifications and Tolerances Committee

General Code

Item 310-1: This issue addresses the acceptable methods of marking the manufacturer's name, device model number, serial numbers, and other required markings on electronic instruments. The acceptable methods under consideration are permanent markings on the exterior of the device or displaying the information on the display screen of the monitor for a measuring instrument.

Scales Code

Item 320-1: This issue addresses the conditions under which manual weight entries will be permitted when using commercial scales.

Item 320-3: Clarify that the words "Section Capacity" may be abbreviated when marked on scales for which the marking of the section capacity is required. Acceptable abbreviations for "section capacity" are specified.

Item 320-4: Add a statement that weight carts that have mass values accurate within one-third of the tolerance to be applied to the scale under test may be used in the test of the scale.

Item 320-5: The proposal is to clarify that the discrimination test conducted on scales that automatically indicate the applied loads may be tested near zero and near the maximum test load.

Item 320-6: Clarify the requirement that the minimum number of scale divisions for a Class III hopper scale used to weigh grain is 2000 scale divisions.

Belt-Conveyor Scales Code

Item 321-1: Modify the range of indicated flow rates for a belt conveyor scale to be from 20% to 100% rather than from 35% to 98% to align the requirement with International Organization of Legal Metrology (OIML) Recommendation 50 for belt-conveyor scales.

Item 321-2: Modify the test requirements for belt-conveyor scales to require that they be tested over the range of flow rates at which it may be used, rather than at only one flow rate near its used capacity.

Item 321-3: Modify the statement of how zero stability of a belt-conveyor scale is expressed and establish a tolerance for the stability of zero on a belt-conveyor scale.

Item 321-4: Clarify the limits for the required uniformity of the weight (*i.e.*,
