SUPPLEMENTARY INFORMATION:**Notice of Inquiry**

1. In this notice of inquiry (NOI), the Commission invites comments on its intended utilization of the Producer Price Index for Finished Goods (PPI)¹ plus 1.3 percent (PPI+1.3) as the index for determining annual changes to the oil pipeline rate ceiling during the next five years beginning July 1, 2011.² The index of PPI+1.3 was previously adopted by the Commission for the five-year period starting July 1, 2006.³ The Commission proposes to continue to apply the index of PPI+1.3 to an oil pipeline's existing rate ceiling level to determine the rate ceiling level for the next year.⁴

I. Background

2. In Order No. 561, the Commission established an index methodology to regulate changes to oil pipeline rates and adopted an index of PPI minus one percent (PPI–1) as the most appropriate index to track oil pipeline industry cost changes from one year to the next. The Commission also undertook to review every five years the continued effectiveness of its index for tracking changes to oil pipeline industry costs.

3. After its initial five-year review, the Commission adopted PPI, without the (–1) percent adjustment, as the appropriate index for tracking oil pipeline industry costs for the five-year period beginning July 2001.⁵ In its second five-year review of the oil pricing index, the Commission adopted an index of PPI+1.3 for the five-year period commencing July 1, 2006.⁶

¹ The PPI represents the Producer Price Index for Finished Goods, also written PPI–FG. The PPI–FG is determined and issued by the Bureau of Labor Statistics, U.S. Department of Labor. Pursuant to 18 C.F.R. section 342.3(d)(2) (2009), “The index will be calculated by dividing the PPI–FG for the calendar year immediately preceding the index year by the previous calendar year’s PPI–FG.” Multiplying the rate ceiling on June 30 of the index year by the resulting number gives the rate ceiling for the year beginning the next day, July 1.

² The five-year review process was established in Order No. 561. See *Revisions to Oil Pipeline Regulations Pursuant to the Energy Policy Act of 1992*, FERC Stats. & Regs. [Regs. Preambles, 1991–1996] ¶ 30,985 (1993); *order on reh’g*, Order No. 561–A, FERC Stats. & Regs. [Regs. Preambles, 1991–1996] ¶ 31,000 (1994), *affirmed*, *Association of Oil Pipelines v. FERC*, 83 F.3d 1424 (D.C. Cir. 1996).

³ *Order Establishing Index for Oil Price Change Ceiling Levels*, 114 FERC ¶ 61,293 (2006).

⁴ The Commission publishes the final annual change in the PPI–FG, expressed as a percent, after the final PPI–FG becomes available from the Bureau of Labor Statistics, U.S. Department of Labor in May of each calendar year. Pipelines are required to calculate the new ceiling level applicable to their indexed rates based on this annual change.

⁵ *Five-Year Review of Oil Pipeline Pricing Index*, 102 FERC ¶ 61,195 (2003), *affirmed*, *Flying J Inc., et al., v. FERC*, 363 F.3d 495 (DC Cir. 2004).

⁶ *Order Establishing Index for Oil Price Change Ceiling Levels*, 114 FERC ¶ 61,293.

II. Proposal and Comments

4. The Commission proposes to continue to utilize PPI+1.3 for the next five-year period as the index to track changes to the costs of the oil pipeline industry and to apply to rate ceiling levels for oil pipeline rate changes. The Commission invites interested persons to submit comments on the continued use of PPI+1.3 and to propose, justify, and fully support, any alternative indexing proposals.

III. Comment Procedures
