The purpose of the technical conference is to examine whether the Commission should reconsider or modify the reactive power provisions of Order No. 661-A and examine what evidence could be developed under Order No. 661 to support a request to apply reactive power requirements more broadly than to individual wind generators during the interconnection study process.

9 a.m.–9:15 a.m. Greeting and Opening Remarks.

9:15 a.m.–12:15 p.m. Discussion of Reactive Power in Interconnection Studies.

This panel will discuss:

- Methods used to determine the reactive power requirements for a transmission system, and
- How system impact and system planning studies take into account changes in technologies connected to the system.
- What evidence could be developed to support a request to apply reactive power requirements more broadly than to individual wind generators during the interconnection study process.

Panelists:
