

intermediates, including Theo-Dur®, K-Dur®, Uni-Dur®, Normodayne/ Labetalol®, Eulexin®, Claritin®, and Rebetalol®, Foreign-sourced materials will account for some 40–50 percent of finished product value, and include items from the following general categories: chemically pure sugars, empty capsules for pharmaceutical use, protein concentrates, natural magnesium phosphates and carbonates, gypsum, anhydrite and plasters, petroleum jelly, paraffin and waxes, sulfuric acid, other inorganic acids or compounds of nonmetals, ammonia, zinc oxide, titanium oxides, fluorides, chlorates, sulfates, salts of oxometallic acids, radioactive chemical elements, compounds of rare earth metals, acyclic hydrocarbons, derivatives of phenols or peroxides, acetals and hemiacetals, phosphoric esters and their salts, diazo-compounds, glands for therapeutic uses, wadding, gauze and bandages, pharmaceutical glaze, hair preparations, lubricating preparations, albumins, prepared glues and adhesives, catalytic preparations, diagnostic or laboratory reagents, prepared binders, acrylic polymers, self-adhesive plates and sheets, other articles of vulcanized rubber, plastic cases, cartons, boxes, printed books, brochures and similar printed matter, carboys, bottles, and flasks, stoppers, caps, and lids, aluminum foil, tin plates and sheets, taps, cocks and valves, and medical instruments and appliances.

Zone procedures would exempt Schering-Plough from Customs duty payments on foreign materials used in production for export. Some 30–35 percent of the plant's shipments are exported. On domestic sales, the company would be able to choose the duty rates that apply to the finished products and intermediates (primarily duty-free) rather than the duty rates that would otherwise apply to the foreign-sourced materials noted above (duty-free to 20.0 percent). At the outset, zone savings would primarily involve choosing the finished product duty rate on a cholesterol absorption inhibitor, (HTSUS 3004.90.9060–duty-free), rather than the rate for a foreign-sourced active ingredient (bulk ezetimibe, HTSUS 2933.79.0800–7.9%). The application indicates that the savings from zone procedures will help improve the plant's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Extension of Time Limits for Preliminary Results of Antidumping Duty Administrative Reviews

The Department has received requests to conduct administrative reviews of the antidumping duty orders on antifriction bearings (other than tapered roller bearings) and parts thereof from France, Germany, Italy, Japan, and the United Kingdom. On June 19, 2001, the Department initiated these administrative reviews covering the period May 1, 2000, through April 30, 2001. See *Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocations in Part*, 66 FR 32934, June 19, 2001.

Because of the complexity of certain issues in each review and the large number of respondents in each review, it is not practicable to complete these reviews within the time limits mandated by section 751(a)(3)(A) of the Act. Therefore, in accordance with that section, the Department is extending the time limit for the preliminary results of these administrative reviews until April 1, 2002.

Dated: January 10, 2002.
