TINs will be used to process all electronic payments (refunds) made to licensees by electronic funds transfer by the Department of the Treasury (Treasury). Treasury will use TINs to determine whether the refund can be used to administratively offset any delinquent debts reported to the Treasury by other government agencies. In addition, TINs will be used to collect and report to the Treasury any delinquent indebtedness arising out of the licensee's or applicant's relationship with the NRC.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-250 and 50-251]

Florida Power and Light Company Turkey Point, Units 3 and 4; Notice of Acceptance for Docketing of the Application and Notice of Opportunity for a Hearing Regarding Renewal of License Nos. DPR-31 and DPR-41 for an Additional Twenty-Year Period

The U.S. Nuclear Regulatory Commission (the Commission) is considering an application for the renewal of Operating Licenses Nos. DPR-31 and DPR-41 which authorize Florida Power and Light Company (FPL) to operate Turkey Point, Units 3 and 4 at 2300 megawatts thermal. The renewed licenses would authorize the applicant to operate Turkey Point, Units 3 and 4 for an additional 20 years beyond the period specified in the current licenses. The current operating licenses for Turkey Point, Units 3 and 4 expire on July 19, 2012 and April 10, 2013, respectively.

FPL submitted an application to renew the operating licenses for Turkey Point, Units 3 and 4 on September 11, 2000. A Notice of Receipt of Application, "Florida Power and Light Company, Turkey Point, Units 3 and 4; Notice of Receipt of Application for Renewal of Facility Operating License Nos. DPR-31 and DPR-41, for an Additional Twenty-Year Period," was published in the **Federal Register** on September 26, 2000 (65 FR 57847).

The Commission's staff has determined that FPL has submitted information in accordance with 10 CFR 54.19, 54.21, 54.22, 54.23, and 51.53(c) that is complete and acceptable for docketing. The current Docket Nos. 50-250 for Operating License No. DPR-31 and 50-251 for Operating License No. DPR-41 will be retained. The docketing of the renewal application does not preclude requesting additional information as the review proceeds, nor does it predict whether the Commission will grant or deny the application.

Before issuance of a requested license renewal, the NRC will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the NRC's rules and regulations. In accordance with 10 CFR 54.29, the NRC will issue a renewed license on the basis of its review and findings that actions have been identified and have been or will be taken with respect to: (1) Managing the effects of aging during the period of extended operation on the functionality of structures and components that have been identified as requiring aging management review;
