History and Description of the Remains

At an unknown date, human remains representing, at minimum, three individuals were removed from Mesa Verde in Montezuma County, CO. They were acquired by Kalamazoo resident Donald Boudeman, who collected Native American material culture in the first half of the 20th century. In July of 1961, some years after her husband's death, Donna Boudeman donated the human remains to the Michigan State University Museum. In February of 2019, during an intertribal consultation, the remains of these individuals were found in the Michigan State University Forensic Anthropology Laboratory. The human remains belong to a child 6.5–8.5 years old and two adult females. No known individuals were identified. No associated funerary objects are present.

Mesa Verde was occupied by Ancestral Puebloan people from approximately A.D. 500 to 1200. All the individuals listed in this Notice of Inventory Completion are reasonably believed to be Puebloan, based on the provenience and documentation associated with the human remains. A relationship of shared group identity can be traced between Ancestral Puebloan people and modern Puebloan groups, based on oral tradition, historical evidence, archeological, geographical, and scientific studies.

Determinations Made by Michigan State University

- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and The Tribes.
