SUPPLEMENTARY INFORMATION:**I. Background**

The Occupational Employment Statistics (OES) survey is a Federal/State establishment survey of wage and salary workers designed to produce data on current occupational employment and wages. OES survey data assist in the development of employment and training programs established by the 1998 Workforce Investment Act (WIA) and the Perkins Vocational Education Act of 1998.

The OES program operates a periodic mail survey of a sample of non-farm establishments conducted by all fifty States, the District of Columbia, Guam, Puerto Rico, and the U.S. Virgin Islands. Over three-year periods, data on occupational employment and wages are collected by industry at the four- and five-digit North American Industry Classification System (NAICS) levels. The Department of Labor uses OES data in the administration of the Foreign Labor Certification process under the Immigration Act of 1990.

II. Current Action

Office of Management and Budget clearance is being sought for the Occupational Employment Statistics (OES) program. Occupational employment data obtained by the OES survey are used to develop information regarding current and projected employment needs and job opportunities. These data assist in the development of State vocational education plans. OES wage data provide a significant source of information to support a number of different Federal, State, and local efforts.

As part of an ongoing effort to reduce respondent burden, OES has several electronic submission options which are available to respondents. Respondents have the ability to submit data by email, or fillable online forms. In many cases, a respondent can submit existing payroll records and would not need to submit a survey form.

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

SUPPLEMENTARY INFORMATION:**I. Background**

Section 24(a) of the Occupational Safety and Health Act of 1970 requires the Secretary of Labor to develop and maintain an effective program of collection, compilation, and analysis of statistics on occupational injuries and illnesses. The Commissioner of Labor Statistics has been delegated the responsibility for "Furthering the purpose of the Occupational Safety and Health Act by developing and maintaining an effective program of collection, compilation, analysis and publication of occupational safety and health statistics." The BLS fulfills this responsibility, in part, by conducting the Survey of Occupational Injuries and Illnesses in conjunction with participating State statistical agencies. The BLS Survey of Occupational Injuries and Illnesses provides the Nation's primary indicator of the progress towards achieving the goal of safer and healthier workplaces. The survey produces the overall rate of occurrence of work injuries and illnesses by industry which can be compared to prior years to produce
