

results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2014-0025]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of pending NRC action to submit an information collection request to the Office of Management and Budget (OMB) and solicitation of public comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) invites public comment about our intention to request the OMB's approval for renewal of an existing information collection that is summarized below. We are required to publish this notice in the **Federal Register** under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* DOE/NRC Form 742, "Material Balance Report," and DOE/NRC Form 742C, "Physical Inventory Listing," and NUREG/BR-0007, "Instructions for the Preparation and Distribution of Material Status Reports."

2. *Current OMB approval number:* DOE/NRC Form 742: 3150-0004. DOE/NRC Form 742C: 3150-0058.

3. *How often the collection is required:* DOE/NRC Form 742 is submitted once a year within thirty days

after the start of a physical inventory as part of the material accounting and control procedures. DOE/NRC Form 742C is submitted once a year when licensees complete their physical inventory as part of the material accounting and control procedures.

4. *Who is required or asked to report:* DOE/NRC Form 742, Persons licensed to possess specified quantities of special nuclear material or source material. Any licensee, including nuclear reactor licensees, possessing, or who had possessed in the previous reporting period, at any one time and location, special nuclear material in a quantity totaling one gram or more shall complete DOE/NRC Form 742. In addition, each licensee, Federal or State, who is authorized to possess, at any one time or location, 1 kilogram of foreign obligated source material, is required to file with the NRC an annual statement of source material inventory which is foreign-obligated. DOE/NRC Form 742C, Persons licensed to possess specified quantities of special nuclear material or source material. Any licensee, including nuclear reactor licensees, possessing, or who had possessed in the previous reporting period, at any one time and location, special nuclear material in a quantity totaling one gram or more shall complete DOE/NRC Form 742C.

5. *The number of annual respondents:* DOE/NRC Form 742: 360 respondents. DOE/NRC Form 742C: 360 respondents.

6. *The number of hours needed annually to complete the requirement or request:* DOE/NRC Form 742: 1,260 hours. DOE/NRC Form 742C: 1,440 hours.

7. *Abstract:* The NRC is required to collect nuclear material transaction information for domestic safeguards use and make it available to the International Atomic Energy Agency (IAEA). Licensees use DOE/NRC Form 742 to report the material balance within 30 days after the start of a physical inventory of nuclear materials actually present at licensee's facilities, including the quantities of foreign obligated source material. Licensees use DOE/NRC Form 742C to report the material status based on a physical inventory of nuclear materials actually present at licensee's facilities. These forms enable the NRC to collect, retrieve, analyze, and submit the data to IAEA to fulfill its reporting responsibilities.

This information collection request will also categorize these forms as common forms. Once OMB approves the use of these common forms, all Federal agencies using the form may request use of this common form without additional 60- or 30-day notice and comment

requirements. At that point, each agency will account for its number of respondents and the burden associated with the agency's use.

Submit, by April 28, 2014, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?
