Final Approval Under OMB Delegated Authority of the Implementation of the Following Reports

Report title: the Consolidated Bank Holding Company Report of Equity

Investments in Nonfinancial Companies.

Agency form number: FR Y-12.

OMB control number: 7100-0300.

Frequency: Quarterly and semi-annually.

Reporters: bank holding companies.

Annual reporting hours: 14,112 hours.

Estimated average hours per response: 16 hours.

Number of respondents: 232.

Small businesses are affected.

General description of report: This information collection is mandatory (12 U.S.C. 1844(c)) and data may be exempt from disclosure pursuant to Sections (b)(4) and (b)(8) of the Freedom of Information Act (5 U.S.C. 552(b)(4) and (8)).

Abstract: The Federal Reserve will implement the mandatory FR Y-12, effective September 30, 2001. The FR Y-12 will collect information from certain domestic bank holding companies on their investments in nonfinancial companies on three schedules: Type of Investments, Type of Security, and Type of Entity within the Banking Organization. Large bank holding companies will report on a quarterly basis, and small bank holding companies will report semi-annually.

Current actions: On May 10, 2001, the Federal Reserve issued a **Federal Register** notice (66 FR 23929) requesting public comment on a proposal to implement the FR Y-12. The comment period ended on July 9, 2001, and the Federal Reserve received public comments from two domestic banking organizations. Both commenters stated that the manner and level of detail in which the Federal Reserve proposed to collect this information is unnecessary for monitoring the growth in nonfinancial equity investment portfolios. The first commenter suggested alternative monitoring through expanded disclosure on the Consolidated Financial Statements for Bank Holding Companies (FR Y-9C) in conjunction with analysis of information available in the Securities and Exchange Commission 10-Q and 10-K filings. However, institutions that will be required to file the FR Y-12 are a small subset of the institutions required to file the FR Y-9C. By expanding disclosures on the FR Y-9C, institutions not active in this business line may be confused and misleading information may be gathered as a result.

The second commenter suggested monitoring of this information through the examination process. For institutions active in this business line, annual reviews generally are conducted through the supervisory examination process. However, the FR Y-12 will

allow the Federal Reserve to monitor an institution's activity between review dates and help in the examination planning process. It also will serve as an "early warning" mechanism to identify institutions where equity investment activities are growing rapidly and that, therefore, may warrant special supervisory attention.

One commenter felt that the detailed information on Schedule A on the number of companies in which the bank holding company had invested was unnecessary. As originally proposed, the FR Y-12 required the reporting bank holding company to provide information separately on the number of direct investments in public entities, direct investments in nonpublic entities, and all indirect investments (lines 1 through 3 on Schedule A). In light of the comment and after further discussions, the Federal Reserve has decided that obtaining information on the total number of investments in the portfolio will be sufficient.

This same commenter also strongly disagreed that the FR Y-12 should be made publicly available, stating that disclosure of this information would likely be harmful to the competitive position of BHCs. The Board has determined that a reporting BHC may request confidential treatment for certain information on the FR Y-12 under the Freedom of Information Act if the BHC is of the opinion that the disclosure of specific commercial or financial information in the report would likely result in substantial harm to its competitive position, or that disclosure of the submitted information would result in an unwarranted invasion of personal privacy.

The initial **Federal Register** notice requested comment on the addition of a new item related to consolidated recognized gains or losses on equity investments in nonfinancial companies. No public comments were received on this item. Therefore, the Federal Reserve will add this item to Schedule A as memorandum item 3. Finally, the commenters suggested a number of clarifications to the reporting form and instructions. All of the clarifications mentioned in the comment letters have been addressed in the final form and instructions.

Board of Governors of the Federal Reserve System, August 20, 2001.

Jennifer J. Johnson,
Secretary of the Board.

Report of Proposed New Privacy Act System of Records

System Number: 09-90-0039.

System Name: National Disaster Claims Processing System.

A. System Purpose and Background Background

The Department of Health and Human Services (HHS) is the primary federal agency for health, medical and health-related social services under the Federal Response Plan. HHS provides for medical, mental health and other human services to victims of catastrophic disasters. The HHS Office of Emergency preparedness (OEP) is the office responsible for responding to requests for federal medical assistance for all national catastrophic disasters both natural and man-made.

OEP leads the National Disaster Medical System (NDMS) a partnership of four federal agencies—HHS, the Departments of Defense, Veterans Affairs and the Federal Emergency Management Agency. The NDMS was established in 1984 and has three components: direct medical care, patient movement, and definitive medical care. The definitive medical care is provided by hospitals that are part of the NDMS and agree to provide this service on an as needed basis. In order to provide expeditious processing and adjudication of medical claims from licensed providers and facilities arising from the treatment of disaster victims, a contractor for OEP will collect and process claims data, with OEP subsequently paying the claim.

System Purpose

The National Disaster Claims Processing System will justify and document reimbursement payments for services provided in connection to the NDMS. In order to provide this service and process claims, the contractor must collect data on individuals that includes Name, Social Security Number, Address, Dates of Care, Diagnostic Related Group/Current Procedure Terminology (DRG/CPT), Provider Name, Provider Address, Health Insurance Portability and Accountability Act (HIPAA) Provider Number, Amount Billed, Amount Allowed, Other Insurance Payment, and amount to be paid. In addition information from the providing hospital including the Employer Identification Number (EIN) and information for submitting electronic payment will be
